Fish Flies Terry Hellekson, 2005 This is the definitive book on fly-tying, with thousands of fly patterns included for the enthusiast. Expert angler, fly tier, and author Terry Hellekson addresses everything from the history of fly-fishing around the world to the history of fly tying and fly-tying materials. Hellekson shares interviews with fly-tying greats of years past, along with the fascinating history and background of some of the popular individual flies, making this a great read. His colorful recollections of people and events will intrigue and delight even the most serious fly tier. He also shares years of wisdom and knowledge on fly-tying colors; fly patterns; fly-tying tools, hooks, and materials; and fly-fishing and fly-tying methods. Hellekson' depicts hundreds of intricate patterns for dry flies, wet flies, and nymphs. Mayfly, stonefly, and caddisfly species are widely represented with simulations of the phases of their respective life cycles. Detailed patterns for terrestrials, damselflies and dragonflies, leeches and worms, midges, crustaceans, streamers, shad flies, steelhead flies, Atlantic salmon flies, Spey flies, Pacific salmon flies, and salmon and steelhead dry flies round out the book. This encyclopedia is organized

into two distinct parts: the first section describes the origins of fly-fishing; the concepts of vision and perception of color; and the tools and materials from which artificial flies are created. It addresses dry flies, wet flies, nymphs, stoneflies, mayflies, and caddisflies. The second section of the book thoroughly attends to the simulation of other insect orders, such as terrestrials and crustaceans, and then delves into the specifics of streamers, shad flies, steelhead flies, and more. Even a fly-fishing novice will be enthralled with illustrations that clarify the patterns in a reader-friendly style. Line illustrations throughout, plus more than 2,950 detailed fly patterns-including 695 flies shown in full color-make this a comprehensive fly-tying encyclopedia beyond compare. Terry Hellekson was born into the world of fly-fishing and spent his early life in Happy Camp, California, where his father had a fly-fishing guide service on the Klamath and Trinity rivers during the 1940s and 1950s. Hellekson not only fly-fished and tied flies as a youth, but he developed many new fly patterns and eventually became immersed in all phases of the fly-fishing and fly-tying businesses. He founded Fly Fishing Specialties, a wholesale and retail business. He continually exchanges information with leading experts in fly-fishing and fly tying. Hellekson has traveled the world discovering sources for fly-tying materials and other products that he sold on the international market. He has also fished many of the great lakes and rivers of the world, traveling to such far off places as Kashmir to test the waters of the

Himalayas. Hellekson is one of the founders of the Northern Utah Fly Fishers and the Granite Bay Fly Casters in northern California. Through fly-tying classes and fly-fishing clinics, he has taught countless numbers of fly fishers the fine points of the sporting art. Besides the many articles he has written on fly-fishing and fly tying, he has authored two books, *Popular Fly Patterns* (1976) and *Fish Flies* (1995), with this revised edition the culmination of a lifetime of work. He has also made generous contributions to the works of other authors. He now lives and fishes with his wife, Patricia, in Montana, where they have the famous Kootenai River at their doorstep.

Fly Patterns Taff Price, 1991-05-01 In the last ten years, fly fishing has exploded as an international sport. This global guide to fly-tying features over 600 different flies from around the world, including all the newest fly patterns and the fishing techniques they involve. Hundreds of full-color illustrations show you what each fly looks like, and detailed tying instructions show you how to make them, including what kinds of feathers, hooks, and threads to use. You get fascinating facts about how and when the flies were invented and where they are used. You see how to translate

European patterns such as the cul de canard (from the feathers surrounding the preen glands of ducks) to the rivers of the American West, or how to take bead-head flies, developed in Alpine lake fishing in Austrian and Switzerland, and use the rich waters of the South Pacific. You'll catch up on fast-growing new methods for challenging exotic sea species, particularly bonefish, permit, and tarpon, and see where in the Republic of South Africa the fishing is great for little-known, hard-fighting saltwater species such as the Garrick, Springer, Kingfish, and more than 30 others. Many of the names for the flies featured here give evidence of their international origins: Argentine Blonde, Chernobyl Crab, Fledermaus, Kenya Bug. Others are named for their target prey: Bonefish Puff, Permit Fly, Rainbow Mohawk, Tarpon Streamer. Still others such as Disco Mouse, Moose Turd, Rat-faced McDougal, and Sea-ducer, serve as reminders that the fly fishermen's colorful sense of humor and adventure is alive and well.
