Italians to America: March 1903-April 1903 Ira A. Glazier,Percy William Filby,1992 *Italians to America* is the first indexed reference work devoted to Italian immigrants to the United States. This series contains passenger list information in chronological order on the first major wave of Italian migration during the last two decades of the nineteenth century, as well as the beginning of the twentieth century. As with the highly regarded companion series on German immigrants, *Italians to America* presents the passenger lists in chronological order, including information on each person's age, sex, occupation, village of origin, and destination, plus the name of the ship, the port of embarkation, and the date of arrival. Each volume also contains an introduction on the history of Italian migration to the U.S. and a full name index, greatly simplifying the researcher's job.

The Revolt of the Catalans J. H. Elliott,1984-06-07 The revolution of Catalonia in 1640 was a signal event in seventeenth-century Europe. Its causes and antecedents - essential for an understanding of the revolution itself - form the basis of Professor Elliott's study of the Spanish monarchy at this time. They throw remarkable light on the whole question of the decline of Spain in the seventeenth century from its

position of pre-eminence in Europe. From the fierce suppression of Catalan bandits by their Castilian overlords during the second decade of the century, Professor Elliott traces the gradual deterioration of relations between the principality of Catalonia and the government in Madrid. He shows how Olivares, the favourite and chief minister of Philip IV, attempted to use Catalan resources to fight Spain's foreign wars, and how the growing tension led ultimately to a revolution, which he suggests played a crucial part in Spain's decline. Professor Elliott's story is almost entirely based on previously unknown documents found in the Spanish national and local archives. These sources enabled him to write the first full-scale treatment of Olivares and his policies. While exciting as a story in its own right, it also stands as a case-history of the perennial struggle between regional liberties and the claims of central governments.

Comparative and Transnational History Heinz-Gerhard Haupt, Jürgen Kocka, 2012 Since the 1970s West German historiography has been one of the main arenas of international comparative history. It has produced important empirical studies particularly in social history as well as methodological and theoretical reflections on comparative history. During the last twenty years however, this approach has felt pressure from two sources: cultural historical approaches, which stress microhistory and the construction of cultural transfer on the one hand, global history and transnational approaches with emphasis on connected history on the other. This volume introduces the reader to some of the major methodological debates and to recent empirical research of German historians, who do comparative and transnational work.

Mazzini Gaetano Salvemini, 1925

The Thirty Years War Ronald G. Asch, 1997 Historians have tried time and again to identify the central issues of the conflict which devastated Europe between 1618 and 1648. The Thirty Years War by Ronald G. Asch puts the religious and constitutional struggle in the Holy Roman Empire squarely back into the centre of events. However, other issues are not neglected. Thus the problems of war finance are shown to be an important key to the interaction between inter-state and domestic conflicts during the war. Equally, confessional tensions are analysed as a decisive factor linking international and domestic disputes, and the reader is provided with a succinct narrative account concentrating on the major turning points of the war.

Glare and Contrast Sensitivity for Clinicians M. Princeton Nadler, David Miller, Daniel J.

Nadler, 2012-12-06 There have been greater advances in our knowledge of the visual function and its disabilities in the past 50 years than had accumulated in all of the previous years. This applies not only to the basic science of biochemistry, physiology, physiopathology, and cytopathology but also to the diagnosis and treatment of visual dysfunction and ocular disease. These advances have been aided by a proliferation of ingenious instruments. When I began my residency in ophthalmology at The Wilmer Institute in 1938, one was supposed to learn not only the physiology of vision but also how to diagnose and treat all phases of ophthalmology including disabilities of the orbit, sclera, retina, lens, and cornea. In addition he or she was supposed to understand neuro-ophthalmology, ophthalmic genetics, and so-called uveitis. It soon became evident that no one could adequately comprehend all of these areas and, therefore, most young trainees today take a year or two of fellowship in a specialized area following their three-to five-year residency training. Following this they join a group of other ophthalmologists and specialize. Thus, they become more expert in the diagnosis and treatment in a limited area in ophthalmology. When I returned to The Wilmer Institute in 1955 as Head of the Department I was the only full-time member of the staff. To date we have some 28 full-time ophthalmologists working in highly specialized areas of our institution.

A Companion to Early Modern Naples, 2013-05-24 The new essays in this volume aim to introduce early modern Naples - the largest city in the Spanish global empire and one of Europe's largest cities - to readers unfamiliar with its history.

90 Two (HB) Dastan Khalili, 2022-02-23 90 Two (HB) By: Dastan Khalili DiaVerse, dia meaning "two"

and verse for the poetic rhyme, is a brand-new style of poetry where the only rule is all stanzas must have a maximum of two words. Created by poet Dastan Khalili, the style of DiaVerse breathes new life into poetry. The restraint of DiaVerse forces poets to use the purest forms of expression. 90 Two is ninety of Khalili's DiaVerse poems, written over the last five years. He combines his poetic verses with digital artwork and imagery, each conveying a sensation of inspiration that came to life with each poem.

New Catholic Encyclopedia: Baa-Cam Catholic University of America,2003 This 15 volume, second edition features revised and new articles. Among the 12,000 entries in the encyclopedia are articles on theology, philosophy, history, literary figures, saints, musicians and much more.

Application of Geographic Information Systems Bhuiyan Monwar Alam,2012 The importance of Geographic Information Systems (GIS) can hardly be overemphasized in today's academic and professional arena. More professionals and academics have been using GIS than ever - urban & regional planners, civil engineers, geographers, spatial economists, sociologists, environmental scientists, criminal justice professionals, political scientists, and alike. As such, it is extremely important to understand the theories and applications of GIS in our teaching, professional work, and research. "The Application of Geographic Information Systems" presents research findings that explain GIS's applications in different subfields of social sciences. With several case studies conducted in different parts of the world, the book blends together the theories of GIS and their practical implementations in different conditions. It deals with GIS's application in the broad spectrum of geospatial analysis and modeling, water resources analysis, land use analysis,

infrastructure network analysis like transportation and water distribution network, and such. The book is expected to be a useful source of knowledge to the users of GIS who envision its applications in their teaching and research. This easy-to-understand book is surely not the end in itself but a little contribution to toward our understanding of the rich and wonderful subject of GIS.

History in the Making J. H. Elliott, 2012-09-14 From the vantage point of nearly sixty years devoted to research and the writing of history, J. H. Elliott steps back from his work to consider the progress of historical scholarship. From his own experiences as a historian of Spain, Europe, and the Americas, he provides a deft and sharp analysis of the work that historians do and how the field has changed since the 1950s. The author begins by explaining the roots of his interest in Spain and its past, then analyzes the challenges of writing the history of a country other than one's own. In succeeding chapters he offers acute observations on such topics as the history of national and imperial decline, political history, biography, and art and cultural history. Elliott concludes with an assessment of changes in the approach to history over the past half-century, including the impact of digital technology, and argues that a comprehensive vision of the past remains essential. Professional historians, students of history, and those who read history for pleasure will find in Elliott's delightful book a new appreciation of what goes into the shaping of historical works and how those works in turn can shape the world of thought and action.

New Catholic Encyclopedia, 2002

Italy Revisited Mary Melfi, 2009 Taking an unconventional approach to autobiographical writing, this work serves as a double memoir, told in dialogue between a mother and a daughter. The conversation takes

place in a medieval town high up in the Italian mountains, as the author, a Canadian writer, draws out her mother's childhood memories of life in southern Italy at the beginning of the 20th century. As they re-create that vanished world, the pair also finds greater understanding of the tumultuous relationships that sometimes exist between immigrant mothers and their children.

New Catholic Encyclopedia: Ref-Sep, 2003 Articles contained in fifteen volumes describe issues relating to and affecting the Catholic Church, in areas such as history, ethics, spirituality, and social sciences. Annual supplements update the original volumes and also include new entries.
