Yamada's Atlas of Gastroenterology Daniel K. Podolsky, 2016-01-14 Access to accurate, high-quality images is vital for ensuring effective management of patients with GI complaints. The fifth edition of Yamada's Atlas of Gastroenterology sees the return of the gold-standard multi-media atlas that provides gastroenterologists with an outstanding visual tool covering all facets of the field. Every GI disorder from liver abscesses, endocrine neoplasms of the pancreas, to motility disorders of the esophagus are fully illustrated through the use of endoscopic ultrasonographs, computed tomography scans, magnetic resonance images, radionuclide images, and angiograms.

Rust Jonathan Waldman, 2015-03-10 Finalist for the Los Angeles Times Book Prize ** A Wall Street Journal Best Book of the Year Rust has been called "the great destroyer," the "pervasive menace," and "the evil." "This look at corrosion—its causes, its consequences, and especially the people devoted to combating it—is wide-ranging and consistently engrossing" (The New York Times). It is the hidden enemy, the one that challenges the very basis of civilization. This entropic menace destroys cars, fells bridges, sinks ships, sparks house fires, and nearly brought down the Statue of Liberty's torch. It is rust—and this book, full of wit and insight, disasters and triumphs—is its story. "Jonathan Waldman's first book is as obsessive as it is informative...he takes us deep into places and situations that are too often ignored or unknown" (The Washington Post). In Rust, Waldman travels from Key West to Prudhoe Bay, meeting people concerned with corrosion. He sneaks into an abandoned steelworks and nearly gets kicked out of Can School. He follows a high-tech robot through an arctic winter, hunting for rust in the Alaska pipeline. In Texas, he finds a corrosion engineer named Rusty, and in Colorado, he learns of the animosity between the galvanizing industry and the paint army. Along the way, Waldman recounts stories of flying pigs, Trekkies, rust boogers, and unlikely superheroes. The result is a man-versus-nature tale that's as fascinating as it is grand, illuminating a hidden phenomenon that shapes the modern world. Rust affects everything from the design of our currency to the composition of our tap water, and it will determine the legacy we leave on this planet. This exploration of corrosion, and the incredible lengths we go to fight it, is "engrossing...brilliant...Waldman's gift for narrative nonfiction shines in every chapter....Watching things rust: who would have thought it could be so exciting" (Natural History).

Shreir's Corrosion , 2009-02-27 This four-volume reference work builds upon the success of past editions of Elsevier's Corrosion title (by Shreir, Jarman, and Burstein), covering the range of innovations and applications that have emerged in the years since its publication. Developed in partnership with experts from the Corrosion and Protection Centre at the University of Manchester, Shreir's Corrosion meets the research and productivity needs of engineers, consultants, and researchers alike. Incorporates coverage of all aspects of the corrosion phenomenon, from the

science behind corrosion of metallic and non-metallic materials in liquids and gases to the management of corrosion in specific industries and applications Features cutting-edge topics such as medical applications, metal matrix composites, and corrosion modeling Covers the benefits and limitations of techniques from scanning probes to electrochemical noise and impedance spectroscopy

Fluorinated Coatings and Finishes Handbook Laurence W. McKeen,2006-03-16
The Handbook of Fluorinated Coatings and Finishes: The Definitive User's Guide is both a reference and a tutorial for understanding fluoropolymer coatings. It discusses the basics of fluorocoating formulations, including ingredients and production processes. Also covered are the coating and curing processes, and defects and trouble-shooting solutions when things do not work as expected, testing performance, and sample commercial applications. It addresses important questions frequently posed by end-user design engineers, coaters, and coatings suppliers in their quest for superior product qualities and shorter product and process development time.

Fitzgerald William Bunge,2011-03-15 This on-the-ground study of one square mile in Detroit was written in collaboration with neighborhood residents, many of whom were involved with the famous Detroit Geographical Expedition and Institute. Fitzgerald, at its core, is dedicated to understanding global phenomena through the intensive study of a small, local place. Beginning with an 1816 encounter between the Ojibwa population and the neighborhood's first surveyor, William Bunge examines the racialized imposition of local landscapes over the course of European American settlement. Historical events are firmly situated in space--a task Bunge accomplishes through liberal use of maps and frequent references to recognizable twentieth-century landmarks. More than a work of historical geography, Fitzgerald is a political intervention. By 1967 the neighborhood was mostly African American; Black Power was ascendant; and Detroit would experience a major riot. Immersed in the daily life of the area, Bunge encouraged residents to tell their stories and to think about local politics in spatial terms. His desire to undertake a different sort of geography led him to create a work that was nothing like a typical work of social science. The jumble of text, maps, and images makes it a particularly urgent book--a major theoretical contribution to urban geography that is also a startling evocation of street-level Detroit during a turbulent era. Johnston's Historical Atlas W. & A.K. Johnston Limited,1880

Atlas Anthony Rwaka,2014-09-16 Earth is a legend amongst legends; it survived the meteors that decimated the dinosaurs, it survived the coming of the great comet half its size and most importantly it survived humans, its greatest threat. In time humans realized that they could not survive without the Earth and peace emerged and with that came great civilizations. These civilizations prospered and grew; the earth was no longer enough, they needed more, more than just the moon, sun and the stars. They expanded past their moon, at first they found nothing but as their minds developed so did their

technology. Finally they found it, they were scared at first but in time they embraced it and finally came to terms with the fact that they were not alone and as time would allow it, the Earth grew with the rest of the seven great planets in the solar system. There was no more need for exploration, no more room for questions, this is was an era of solutions. Solutions that brought great nations together, continents became countries and race; became a thing of the past. Peace was no longer a distant reality but as time would have it, nothing lasts forever; Earth became part of a solution, a solution that would cost it all its inhabitants, will the Earth survive once more?
