Flashman and the Angel of the Lord George MacDonald Fraser,2013-07-02 "A jolly read."—The Wall Street Journal The tenth installment in The Flashman Papers finds Captain Harry Flashman of Her Majesty's Secret Service in the antebellum South, where the irrepressible, globe-trotting Victorian becomes the target of blackmailing beauties. Evading danger, bedding women, and profiting from every opportunity, Flashman once again weasels his way into history, this time in John Brown's raid of Harper's Ferry, just before the Civil War. As a result of Flashy's leeching, lying, cheating, and stealing on land, on sea, and on the rails, not only did John Brown become a martyr, Lincoln became president, and the nation plunged into a bloodbath.

The Phoenix and the Carpet Edith Nesbit,2021-08-04 The Phoenix and the Carpet - Edith Nesbit - The Phoenix and the Carpet is a fantasy novel for children, written in 1904 by E. Nesbit. It is the second in a trilogy of novels that began with Five Children and It (1902), and follows the adventures of the same five protagonists – Cyril, Anthea, Robert, Jane and the Lamb. Their mother buys the children a new carpet to replace the one from the nursery that was destroyed in an accidental fire. The children find an egg in the carpet which hatches into a talking Phoenix. The Phoenix explains that the carpet is a magical one that will grant them three wishes per day. The five children go on many adventures which eventually wears out their magical carpet. The adventures of the children are continued and conclude in the third book of the trilogy, The Story of the Amulet (1906). This middle volume of the trilogy that began with Five Children and It and concludes with The Story of the Amulet deviates somewhat from the other two because the Psammead gets only a brief mention, and because in this volume the children live with both of their parents and their younger brother—the Lamb—in their home in London. Consequently, there is less loneliness and sense of loss in this volume than in the other two. In both of the other volumes, circumstances have forced the children to spend a protracted period away from their familiar London home and their father; in Amulet, their mother and the Lamb are absent as well. A continuing theme throughout The Phoenix and the Carpet is, appropriately enough, the ancient element of fire. The story begins shortly before November 5, celebrated in England as Guy Fawkes Night. Traditionally, children light bonfires and set off fireworks on this night. The four children have accumulated a small hoard of fireworks but are too impatient to wait until November 5 to light them, so they set off a few samples in the nursery. This results in a fire that destroys the carpet. Their parents purchase a second-hand carpet which, upon arrival, is found to contain an egg that emits a weird phosphorescent glow. The children accidentally knock this egg into the fire: it hatches, revealing a golden Phoenix who speaks perfect English. It develops that this is a magical carpet, which can transport the children to anywhere they wish in the present time, although it is only capable of three wishes per day. Accompanied by the Phoenix, the children have exotic adventures in various climes. There is one moment of terror for the children when their youngest brother, the Lamb, crawls onto the carpet, babbles some incoherent baby talk, and vanishes. Fortunately, the Lamb only desired to be with his mother. At a few points in the novel, the children find themselves in predicaments from which the Phoenix is unable to rescue them by himself; he goes to find the Psammead and has a wish granted for the children's sake. In addition, in the end, the carpet is sent to ask the Psammead to grant the Phoenix's wish. These offstage incidents are the only contribution made by the Psammead to this story.

Stiff: The Curious Lives of Human Cadavers Mary Roach, 2004-05-17 Beloved, best-selling science writer Mary Roach's "acutely entertaining, morbidly fascinating" (Susan Adams, *Forbes*) classic, now with a new epilogue. For two thousand years, cadavers – some willingly, some unwittingly – have been involved in science's boldest strides and weirdest undertakings. They've tested France's first guillotines, ridden the NASA Space Shuttle, been crucified in a Parisian laboratory to test the authenticity of the Shroud of Turin, and helped solve the mystery of TWA Flight 800. For every new surgical procedure, from heart transplants to gender confirmation surgery, cadavers have helped make history in their quiet way. "Delightful—though never disrespectful" (Les Simpson, *Time Out New York*), *Stiff* investigates the strange lives of our bodies postmortem and answers the question: What should we do after we die? "This quirky, funny read offers perspective and insight about life, death and the medical profession. . . . You can close this book with an appreciation of the miracle that the human body really is." —Tara Parker-Pope, *Wall Street Journal* "Gross, educational, and unexpectedly sidesplitting." —*Entertainment Weekly*

The Delfly G.C.H.E. de Croon, M. Perçin, B.D.W. Remes, R. Ruijsink, C. De Wagter, 2015-11-26 This book introduces the topics most relevant to autonomously flying flapping wing robots: flapping-wing design, aerodynamics, and artificial intelligence. Readers can explore these topics in the context of the Delfly, a flapping wing robot designed at Delft University in The Netherlands. How are tiny fruit flies able to lift their weight, avoid obstacles and predators, and find food or shelter? The first step in emulating this is the creation of a micro flapping wing robot that flies by itself. The challenges are considerable: the design and aerodynamics of flapping wings are still active areas of scientific research, whilst artificial intelligence is subject to extreme limitations deriving from the few sensors and minimal processing onboard. This book conveys the essential insights that lie behind success such as the Delfly Micro and the Delfly Explorer. The Delfly Micro, with its 3.07 grams and 10 cm

wing span, is still the smallest flapping wing MAV in the world carrying a camera, whilst the DelFly Explorer is the world's first flapping wing MAV that is able to fly completely autonomously in unknown environments. The DelFly project started in 2005 and ever since has served as inspiration, not only to many scientific flapping wing studies, but also the design of flapping wing toys. The combination of introductions to relevant fields, practical insights and scientific experiments from the DelFly project make this book a must-read for all flapping wing enthusiasts, be they students, researchers, or engineers.

Procedural Generation in Game Design Tanya Short, Tarn Adams, 2017-06-12 Making a game can be an intensive process, and if not planned accurately can easily run over budget. The use of procedural generation in game design can help with the intricate and multifarious aspects of game development; thus facilitating cost reduction. Readers will learn to create randomized maps, weave accidental plotlines, and manage complex systems that are prone to unpredictable behavior. Tanya Short’s and Tarn Adams’ Procedural Generation in Game Design offers a wide collection of chapters from various experts that cover the implementation and enactment of procedural generation in games. Designers from a variety of studios provide concrete examples from their games to illustrate the many facets of this emerging sub-discipline. Sacred Games Vikram Chandra, 2011-03-03 An enormously satisfying, exciting and enriching book, Vikram Chandra's novel draws the reader deep into the lives of detective Sartaj Singh and Ganesh Gaitonde, the most wanted gangster in India. Sartaj, the only Sikh inspector in the whole of Mumbai, is used to being identified by his turban, beard and the sharp cut of his trousers. But 'the silky Sikh' is now past forty, his marriage is over and his career prospects are on the slide. When Sartaj gets an anonymous tip off as to the secret hideout of the legendary boss of the G-company, he's determined that he'll be the one to collect the prize.
