Theoretical-Practical Theology Volume 4: Redemption in Christ Petrus Van Mastricht, 2023-06-01 Petrus van Mastricht's Theoretical-Practical Theology presents one of the most comprehensive methods of treating Christian doctrine. In it, Mastricht treats every theological topic according to a four-part approach: exegetical, dogmatic, elenctic, and practical. As a body of divinity, it combines a rigorous, scholastic treatment of doctrine with the pastoral aim of preparing people to live for God through Christ. Students and pastors will find it a valuable model for moving from the text of Scripture to doctrinal formulation that will edify the people of God. Volume 4, *Redemption in Christ*, examines God's great work of obtaining redemption in the Mediator, Jesus Christ. Mastricht sets the stage with a discussion about the covenant of grace as God's eternal purpose of restoration and restitution for the elect of fallen humanity. From that vantage point, he uses the remainder of the volume to address the glorious procurer of this covenantal grace. Mastricht walks us through the dignity, names, person, offices, states, and redemptive accomplishment of Jesus Christ. This volume helps us learn the significance of the One who secured so great a redemption for the people of God.

Nuclear Science Abstracts ,1959 NSA is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976, pre-dating the prestigious INIS database, which began in 1970. NSA existed as a printed product (Volumes 1-33) initially, created by DOE's predecessor, the U.S. Atomic Energy Commission (AEC). NSA includes citations to scientific and technical reports from the AEC, the U.S. Energy Research and Development Administration and its contractors, plus other agencies and international organizations, universities, and industrial and research organizations. References to books, conference proceedings, papers, patents, dissertations, engineering drawings, and journal articles from worldwide sources are also included. Abstracts and full text are provided if available.

Illustrating Asia John A. Lent, 2001-11-30 Illustrations used for story-telling and mirth-making have enlivened Asian walls, scrolls, books, public and private places, and artifacts for millennia. Often playful and humorous, Asian pictorial stories lent conspicuous elements to contemporary comic art, particularly with their use of narrative nuance, humor, satire, and dialogue. *Illustrating Asia* is a fascinating book on a subject that is of wide and topical interest. All of the articles consider cartoon and/or comic art in the historical and social setting of seven South, Southeast, and East Asian countries:

India, Taiwan, Malaysia, Indonesia, Sri Lanka, China, and Japan. The contributors treat comic and narrative art—including comic books, comic strips, picture books, and humor and fan magazines—in both historical and socio-cultural perspectives, as well as portrayals of ancient Chinese philosophy, gender, and the enemy in cartoons and comics. Contributors: Laine Berman, John A. Lent, Fusami Ogi, Rei Okamoto, Ronald Provencher, Aruna Rao, Kuiyi Shen, Shimizu Isao, Shu-chu Wei, Yingjin Zhang.

Speech Recognition in Adverse Conditions Sven Mattys,Ann R. Bradlow,Matthew H. Davis,Sophie Scott,2013-12-19 Speech recognition in ‘adverse conditions’ has been a familiar area of research in computer science, engineering, and hearing sciences for several decades. In contrast, most psycholinguistic theories of speech recognition are built upon evidence gathered from tasks performed by healthy listeners on carefully recorded speech, in a quiet environment, and under conditions of undivided attention. Building upon the momentum initiated by the Psycholinguistic Approaches to Speech Recognition in Adverse Conditions workshop held in Bristol, UK, in 2010, the aim of this volume is to promote a multi-disciplinary, yet unified approach to the perceptual, cognitive, and neuro-physiological mechanisms underpinning the recognition of degraded speech, variable speech, speech experienced under cognitive load, and speech experienced by theoretically relevant populations. This collection opens with a review of the literature and a formal classification of adverse conditions. The research articles then highlight those adverse conditions with the greatest potential for constraining theory, showing that some speech phenomena often believed to be immutable can be affected by noise, surface variations, or attentional set in ways that will force researchers to rethink their theory. This volume is essential for those interested in speech recognition outside laboratory constraints.

Inherited Retinal Disease Hyeong-Gon Yu, 2022-03-11 This book presents the latest knowledge and expert guidance on all aspects of inherited

retinal diseases, including molecular genetics, diagnosis, clinical features, general principles of treatment, novel treatment methods, and genetic counseling. Recent years have witnessed great advances in understanding of the genetic and cytological background of these diseases. Genetic analysis methods such as next generation sequencing have remarkably reduced the cost and time required for massive analysis of patients' samples. Studies on gene therapy and stem cell therapy have been successfully carried out in animal models, and gene therapy is now available for Leber congenital amaurosis caused by RPE65 mutations. Against this background, *Inherited Retinal Disease* will be an invaluable up-to-date resource for ophthalmologists, medical students, and researchers in ocular inflammation. In addition to supplying essential information on each individual disorder, it features many interesting cases contributed by global leaders in the field as well as clinical photographs obtained with newer imaging techniques and numerous images of rare but clinically important diseases.
