Times Tables Magic C Montgomery,2020-03-12 Discover a way to instantly recall times tables in a fun way for children young and old In 1 WEEK have your child learn the multiplication facts up to the 12 times table Improve right brained learning, and learn the multiplication facts in a fun visual way This is a proven method SIMPLE, and FUN method to learn multiplication for kids and or grownups! Through the use of memory hooks in the shape of characters, the stories go through the tables 3 is a butterfly, so 3x3 is the story of the two butterflies swimming a race and the big red balloon in the shape of a 9 is cheering them on! When pupils read 3 x 3 they recall the story of 9- the big red balloon cheering. Try it yourself and recall the answer in a few days time. It's a clever proven method engaging the right side of the brain and it works! Everyone said the best way was to just know the numbers and learn them by rote, but I just knew there had to be a better way than this. I started researching how memory and recall worked. The brain has it's own powerhouse technique for remembering things, and the use of color, imagination and association aid recalling intricate facts - fast! I decided to use these to teach my children the times tables, and it worked! Like magic. I've been asked to share the stories I created and hope this works for you and your children -and not just saves you time, but is a way of sitting down and letting both your imaginations go wild! Enjoy the journey! To keep the book simple and easy to learn it excludes the 2's, 10's, and the very easy 11 times tables up to 10 - but included 11x11, and 11x12. It's ideal for elementary schoolers, 3rd graders, even teaching maths for dyslexia. They WILL have fun!
