*THE POLICE OFFICER'S GUIDE TO OPERATING AND SURVIVING IN LOW-LIGHT AND NO-LIGHT CONDITIONS* Tony L. Jones,2002-01-01 The majority of crimes occur during the hours of darkness, and fully two-thirds of all shooting incidents in which police officers on duty are killed take place during hours of diminished light. The goal of this unique book is to increase officers' awareness that training in low-light and no-light conditions is necessary in order for them to prevail in such situations, to help facilitate correct decision making under these conditions, and to help them understand the use of a myriad of illumination tools available for professional use today. Major topics include: (1) dim-light and no-light doctrine, including navigation techniques, threat location, threat acquisition, and threat identification; (2) flashlight doctrine, including many examples of engaging a threat using a flashlight; (3) low-light weapon sighting systems; (4) techniques used for signalling during dim-light and no-light conditions; and (5) illumination technologies supporting tactical and emergency operations, including infrared systems, thermal imagers, night vision systems, strobe lights, and lasers. Through the use of the techniques described throughout this unique and comprehensive book, the skill, professionalism, and ability of police officers to operate and survive in dim-light, no-light, and artificial light conditions will be enhanced

**The Off-Camera Flash Handbook** Vanessa Joy,2020-01-06

If your past attempts at learning flash have all ended in failure (not to mention tears and/or blind rage), then *The Off-Camera Flash Handbook* is about to change everything for you. For years, photographer Vanessa Joy has been using off-camera flash to create gorgeous portraits that look like they were shot in the most beautiful natural light at the perfect time of day. Well, guess what? That consistent look was not created thanks to the most amazing luck with the weather. No. It was created by a pro photographer who mastered her use of off-camera flash. And with her down-to-earth and practical explanations, that's exactly what Vanessa teaches you in this book.

Vanessa breaks down off-camera flash into an easy-to-understand approach, and instead of focusing on the gear and the settings (which are also included, of course), she focuses on the kinds of shots you want to make. This book is about learning to use off-camera flash easily and quickly so that you can create beautiful, natural-looking light in any situation, at any time you need it...regardless of the weather or time of day.

The book is divided into three parts. Part One covers the fundamentals of off-camera flash, and it does so without blasting you with a firehose of information. Instead, Vanessa gives you the basics you need so that you can start shooting right away without becoming overwhelmed with technical jargon.

Once you're set up and ready to go, Vanessa jumps right into Part Two with specific photo scenarios and real-world situations where you'll learn key techniques for using your flash to create consistent, beautiful photographs. For each scenario, Vanessa provides the goal for the shoot, a gear list, the step-by-step shooting instructions, and images that show both the progress of the shoot and the behind-the-scenes shots or lighting diagrams of the setup. She also discusses problems you may encounter, variations on the shot, and additional practical scenarios for each situation.

Just a few examples include:

- Recreating the golden hour at any time
- Shooting groups

- Making indoors look like outdoors
- Enhancing natural light
- Using flash at events
- Working in harsh sunlight
- Creating silhouettes
- Shooting at sunset
- Fixing an ugly-light room
- And much more

Finally, Part Three tackles the questions you'll likely have once you've got the basics under your belt and you're already creating great photos with your off-camera flash—things like high-speed sync, sync speed, a practical understanding of the inverse square law, etc. There is also a helpful FAQ section at the end of the book.

Florens is a master of lighting, so lighting diagrams are provided for each image, making it easy for readers to adapt the setups to their own subjects and shooting style. **Flash!** Kate Flint,2017-11-28 **Flash!** presents a fascinating cultural history of flash photography, from its mid-nineteenth century beginnings to the present day. All photography requires light, but the light of flash photography is quite distinctive: artificial, sudden, shocking, intrusive, and extraordinarily bright. Associated with revelation and wonder, it has been linked to the sublimity of lightning. Yet it has also been reviled: it's inseparable from anxieties about intrusion and violence, it creates a visual disturbance, and its effects are often harsh and create exaggerated contrasts. **Flash!** explores flash's power to reveal shocking social conditions, its impact on the representation of race, its illumination of what would otherwise remain hidden in darkness, and its capacity to put on

display the most mundane corners of everyday life. It looks at flash's distinct aesthetics, examines how paparazzi chase celebrities, how flash is intimately linked to crime, how flash has been used to light up - and interrupt - countless family gatherings, how flash can 'stop time' allowing one to photograph rapidly moving objects or freeze in a strobe, and it considers the biggest flash of all, the atomic bomb. Examining the work of professionals and amateurs, news hounds and art photographers, photographers of crime and of wildlife, the volume builds a picture of flash's place in popular culture, and its role in literature and film. Generously illustrated throughout, *Flash!* brings out the central role of this medium to the history of photography and challenges some commonly held ideas about the nature of photography itself.
