737NG Training Syllabus Mike Ray,2013-02 737NG Training Syllabus is a highly detailed, full color book virtually crammed with original graphics and thousands of words of descriptive text that will provide a complete training syllabus for persons wishing to learn to

operate the 737NG jet airliner. While intended specifically for the Flight Simulation market, even professional airline pilots will find the information useful and informative. This is a guide intended to teach simmers how to fly the jet the way the Pros do. Learning to fly the 737NG like a real pilot is a challenging and exciting adventure awaiting computer-pilots. Captain Mike Ray's 737NG Training Syllabus IS the document that will make this transition not only possible, but entertaining and ... well, a whole lot more simple. Written for the beginner as well as the veteran simmer, the profusely illustrated material is crammed with details, diagrams, explanations and useful information. The material starts slowly but builds to a crescendo. It includes a section for the knows nothing Ab-initio wannabe pilot and builds to provide information and operational procedures that will provide interesting and useful insight to even the professional airline pilot community. This beautiful and unique document provides the access toolset to the knowledge base that will allow the ordinary garden variety flight sim addict to cross the bridge between operating the current state of the art home based PC flight simulation programs and the real airline style simulator. This book is a MUST HAVE item for the 737NG computer pilot who wants to fly the incredibly accurate add-on airplanes as if they were real pilots. This paperback Black and White version of Captain Mike Ray's book on training to fly the 737NG is a great bargain. You get all the same information that is in the pricier (but more beautiful) color version ... and the same graphic and text that makes the volume such a popular item for both professional airline pilots as well as Flight Simmers. So get a copy ...

and learn to fly the 737NG like the pros do.

Almost Aviation Mark Hurst,2016-11-11 ---AMAZON MARKETPLACE: PAY MORE, WAIT LONGER AND GET A USED BOOK!--- In 1993, when Microsoft began using the tag 'as real as it gets' on its flight simulators it was with a degree of artistic licence. Twenty years on, Microsoft has left the party but its legacy remains in Flight Simulator X and its cousin Prepare3D, developed by Lockheed Martin. But while display technology and sophisticated flight controls make suspension of disbelief ever easier, a wall remains between the

bedroom aviator and his virtual cockpit; nothing intrudes more than having to reach for the mouse to flip the switches. In the quest for true hardware control of their cockpits flight-sim enthusiasts walk an uneasy line between eye-wateringly expensive professional solutions and too-generic consumer units. The alternative is D.I.Y. This guide takes you end-to-end through - and beyond - the construction of scratch-built panels to control the FSX GPS and autopilot with no mouse or keyboard required. Using no more than basic DIY tools and a modicum of patience you can build professional-quality panels to navigate your default or payware aircraft on the GPS500 GPS or, for the more ambitious, on payware systems from Mindstar or Reality-XP. You can build a generic autopilot based on the Bendix King KFC 225 to hook into most of your default General Aviation aircraft and many payware add-ons. Based on the experience of developing a scratch-built cockpit from the ground up, this guide features step-by-step instructions, many photographs and invaluable background information that will help you make your cockpit as real as it gets.
