The Smell of Kerosene National Aeronautics and Space Administration, Donald L. Mallick, Peter W. Merlin, 2022-11-13 This book puts the reader in the pilot's seat for a day at the office unlike any other. The Smell of Kerosene tells the dramatic story of a NASA research pilot who logged over 11,000 flight hours in more than 125 types of aircraft. Donald Mallick gives the reader fascinating first-hand description of his early naval flight training, carrier operations, and his research flying career with NASA. After transferring to the NASA Flight Research Center, Mallick became involved with projects that further pushed the boundaries of aerospace technology. These included the giant delta-winged XB-70 supersonic airplane, the wingless M2-F1 lifting body vehicle, and triple-sonic YF-12 Blackbird. Mallick also test flew the Lunar Landing Research Vehicle and helped develop techniques used in training astronauts to land on the Moon.

Dive into succinct guidance that covers the gamut-- from installing Entity Framework Core, reverse engineering, forward engineering (including schema migrations), and data reading and modification with LINQ, Dynamic LINQ, SQL, Stored Procedures, and Table Valued Functions- to using third-party products such as LINQPad, Entity Developer, Entity Framework Profiler, EFPlus, and AutoMapper. You'll also appreciate excerpts of conceptual software architecture discussion around Entity Framework Core that might otherwise take years to learn.

**What You'll Learn**

- Understand the core concepts of Entity Framework Core, as well process models for existing databases (reverse engineering) and the generation of database schemas from object models (forward engineering)
- Study real-world case studies for hands-on EF Core instruction
- Get up to speed with valuable database access scenarios and code samples
- Discover workarounds to augment missing features in Entity Framework Core
- Use Entity Framework Core to write mobile apps
- Bonus online appendix covers Entity Framework Core 2.1 release updates

Advanced Modeling of Management Processes in Information Technology Zdzislaw Kowalczyk,Cezary Orłowski,2013-10-14 This book deals with the issues of modelling management processes of information technology and IT projects while its core is the model of information technology management and its component models (contextual, local) describing initial processing and the maturity capsule as well as a decision-making system represented by a multi-level sequential model of IT technology selection, which acquires a fuzzy rule-based implementation in this work. In terms of applicability, this work may also be useful for diagnosing applicability of IT standards in evaluation of IT organizations. The results of this diagnosis might prove valid for those preparing new standards so that – apart from their own visions – they could, to an even greater extent, take into account the capabilities and needs of the leaders of project and manufacturing teams. The book is intended for IT professionals using the ITIL, COBIT and TOGAF standards in their work. Students of computer science and management who are interested in the issue of IT project and technology management are also likely to benefit from this study. For young students of IT, it can serve as a source of knowledge in the field of information technology evaluation. This book is also designed for specialists in modelling socio-technical systems.

**Safety in the Skies** Cynthia C. Lebow,1999 The National Transportation Safety Board (NTSB) bears a significant share of the responsibility for ensuring the safety of domestic and international air travel. The NTSB relies on teamwork to resolve accidents; the parties that participate in an investigation may include manufacturers and operators, as well as the Federal Aviation Administration. This arrangement works well under most circumstances, despite inherent conflicts of interest may jeopardize, or be perceived to jeopardize, the integrity of the NTSB investigation. The NTSB's ability to lead investigations and to form expert teams is also seriously threatened by a lack of training,

equipment, and facilities; by poor control of information; and inadequate aids to project management.
