Open Source Intelligence Tools and Resources Handbook i-intelligence,2019-08-17
2018 version of the OSINT Tools and Resources Handbook. This version is almost three times the size of the last public release in 2016. It reflects the changing intelligence needs of our clients in both the public and private sector, as well as the many areas we have been active in over the past two years.

Flight Physics E. Torenbeek,H. Wittenberg,2009-07-06 Knowledge is not merely everything we have come to know, but also ideas we have pondered long enough to know in which way they are related, and how these ideas can be put to practical use. Modern aviation has been made possible as a result of much scientific search. However, the very first useful results of this research became available a considerable length of time after the aviation pioneers had made their first flights. Apparently, researchers were not able to find an adequate explanation for the occurrence of lift until the beginning of the 21st century. Also, for the fundamentals of stability and control, there was no theory available that the pioneers could rely on. Only after the first motorized flights had been successfully made did researchers become more interested in the science of aviation, which from then on began to take shape. In modern day life, many millions of passengers are transported every year by air. People in the western societies take to the skies, on average, several times a year. Especially in areas surrounding busy airports, travel by plane has been on the rise since the end of the Second World War. Despite becoming familiar with the sight of a jumbo jet commencing its flight once or twice a day, many find it astonishing that such a colossus with a mass of several hundred thousands of kilograms can actually lift off from the ground.

Balloons, Airships, and Flying Machines Gertrude Bacon, 2022-06-03 *Balloons, Airships, and Flying Machines* by Gertrude Bacon presents an account of the evolution of aviation from the first balloons to the inventions of the early 20th century. It's a well-planned and incredibly written narrative of ballooning and early aviation, which makes it easily understandable for any reader. Gertrude Bacon (1874 - 1949) was an aeronautical pioneer. She accomplished a significant number of firsts for women in aviation. Gertrude promoted aeronautics through her writing and encouraged commercial and popular flying as fields for women. Content includes: The Origin of Ballooning The Coming of the Gas Balloon Famous Balloon Voyages of the Past The Balloon as a Scientific Instrument The Balloon in Warfare The Airship The Flying Machine Conclusion

Infrared Celestial Backgrounds Russell G. Walker, 1962 SURVEY OF OBSERVATIONAL DATA ON INFRARED EMISSION FROM CELESTIAL OBJECTS IS PRESENTED AND CORRELATED WITH RECENT THEORETICAL CALCULATIONS. Spectral distribution of the radiation is analyzed with regard to departures from blackbody radiation predictions based upon effective temperatures and stellar spectral classification. Application of these data to infrared systems is discussed and the infrared background radiance values due to the galactic and solar systems are calculated. (Author).

Maritime Law Yvonne Baatz, 2017-09-19 Now in its fourth edition, this authoritative guide covers all of the core aspects of maritime law in one distinct volume. Maritime Law is written by a team of leading academics and practitioners, each expert in their own field. Together, they provide clear, concise and fully up-to-date coverage of topics ranging from bills of lading to arrest of ships, all written in an accessible and engaging style. As English

law is heavily relied on throughout the maritime world, this book is grounded in English law whilst continuing to analyse the key international conventions currently in force. Brand new coverage includes: The entry into force of the Hague Convention on Choice of Court Agreements, 2005 and greater detail on Regulation (EU) No 1215/2012 of the European Parliament and of the Council of 12 December 2012 on jurisdiction and the recognition and enforcement of judgments in civil and commercial matters (recast). The entry into force of the Nairobi International Convention on the Removal of Wrecks, 2007. Discussion on the Arctic Sunrise and Duzgit Integrity arbitrations and the Enrica Lexie Incident (Italy v India), Provisional Measures in the International Tribunal for the Law of the Sea. Analysis of the Insurance Act 2015. Comment on recent cases including London Steam Ship Owners Mutual Insurance Association Ltd v Spain (The Prestige) and PST Energy 7 Shipping LLC v OW Bunker Malta Ltd (The Res Cogitans). This book is a comprehensive reference source for students, academics and legal practitioners worldwide, especially those new to maritime law or a particular field therein.

Fundamentals of Fighter Design Ray Whitford, 2004 Traces the development of fighter design from World War One to the present day. Covers aerodynamics, stability and control, propulsion, structures and materials, avionics, armaments and tactics. The drawings and charts make this an informative book for enthusiasts and those with a professional interest in aircraft design.

Internet of Things: A Hands-On Approach Arshdeep Bahga, Vijay Madisetti, 2014-08-09 Internet of Things (IoT) refers to physical and virtual objects that have unique identities and are connected to the internet to facilitate intelligent applications that make energy,

logistics, industrial control, retail, agriculture and many other domains smarter. Internet of Things is a new revolution of the Internet that is rapidly gathering momentum driven by the advancements in sensor networks, mobile devices, wireless communications, networking and cloud technologies. Experts forecast that by the year 2020 there will be a total of 50 billion devices/things connected to the internet. This book is written as a textbook on Internet of Things for educational programs at colleges and universities, and also for IoT vendors and service providers who may be interested in offering a broader perspective of Internet of Things to accompany their own customer and developer training programs. The typical reader is expected to have completed a couple of courses in programming using traditional high-level languages at the college-level, and is either a senior or a beginning graduate student in one of the science, technology, engineering or mathematics (STEM) fields. Like our companion book on Cloud Computing, we have tried to write a comprehensive book that transfers knowledge through an immersive hands on approach, where the reader is provided the necessary guidance and knowledge to develop working code for real-world IoT applications. Additional support is available at the book's website: www.internet-of-things-book.com

Organization The book is organized into 3 main parts, comprising of a total of 11 chapters. Part I covers the building blocks of Internet of Things (IoTs) and their characteristics. A taxonomy of IoT systems is proposed comprising of various IoT levels with increasing levels of complexity. Domain specific Internet of Things and their real-world applications are described. A generic design methodology for IoT is proposed. An IoT system management approach using NETCONF-YANG is described. Part II introduces the reader to the programming aspects of Internet of Things

with a view towards rapid prototyping of complex IoT applications. We chose Python as the primary programming language for this book, and an introduction to Python is also included within the text to bring readers to a common level of expertise. We describe packages, frameworks and cloud services including the WAMP-AutoBahn, Xively cloud and Amazon Web Services which can be used for developing IoT systems. We chose the Raspberry Pi device for the examples in this book. Reference architectures for different levels of IoT applications are examined in detail. Case studies with complete source code for various IoT domains including home automation, smart environment, smart cities, logistics, retail, smart energy, smart agriculture, industrial control and smart health, are described. Part III introduces the reader to advanced topics on IoT including IoT data analytics and Tools for IoT. Case studies on collecting and analyzing data generated by Internet of Things in the cloud are described.

Longman Student Grammar of Spoken and Written English Douglas Biber, Susan Conrad, Geoffrey Leech, 2003-06-10 Simplified and reorganized, while avoiding much of the technical detail of Longman grammar of spoken and written English (LGSWE).

Open Source Intelligence Techniques Michael Bazzell, 2016 This book will serve as a reference guide for anyone that is responsible for the collection of online content. It is written in a hands-on style that encourages the reader to execute the tutorials as they go. The search techniques offered will inspire analysts to think outside the box when scouring the internet for personal information. Much of the content of this book has never been discussed in any publication. Always thinking like a hacker, the author has identified new ways to use various technologies for an unintended purpose. This book will improve

anyone's online investigative skills. Among other techniques, you will learn how to locate: Hidden Social Network Content, Cell Phone Owner Information, Twitter GPS & Account Data, Hidden Photo GPS & Metadata, Deleted Websites & Posts, Website Owner Information, Alias Social Network Profiles, Additional User Accounts, Sensitive Documents & Photos, Live Streaming Social Content, IP Addresses of Users, Newspaper Archives & Scans, Social Content by Location, Private Email Addresses, Historical Satellite Imagery, Duplicate Copies of Photos, Local Personal Radio Frequencies, Compromised Email Information, Wireless Routers by Location, Hidden Mapping Applications, Complete Facebook Data, Free Investigative Software, Alternative Search Engines, Stolen Items for Sale, Unlisted Addresses, Unlisted Phone Numbers, Public Government Records, Document Metadata, Rental Vehicle Contracts, Online Criminal Activity.

Productivity Knowhow Dick Smythe, 2016-11-03 Productivity improvement is the biggest issue facing any manager at any level in any organisation in any sector - and the biggest peacetime issue facing any government minister too. Dick Smythe was educated at Bolton School, graduated in pure mathematics and statistics at St Andrews University and then took a masters in Operations Research at Birmingham University. He was then recruited by Europe's leading consultancy of the day, PA Consulting Group, and went on to set up and grow their Productivity Services Division into a significant part of the business, becoming a PA director and sitting on their UK management consultancy board - whilst there, he led a joint study with the CBI into UK productivity, and presented the results on

TV, radio and to the national press with Director General Sir John Banham - The Times leader commented: It is refreshing to come across something that has its feet firmly planted on the ground Since then, he has mixed productivity consultancy work with playing the property and stock markets, skippering his own boat in the Fastnet and many other ocean yacht races and keeping his golf handicap down to single figures As the late Peter Drucker once said, managers have always sought something which lets them 'do their job with less effort, in less time, yet with greater impact'.

The Threat of Thanos (Marvel Avengers) Arie Kaplan,2018-07-10 Marvel's Avengers take on the cosmic bad guy Thanos in this all-new action-packed Little Golden Book! Our Currency, Our Country John Redwood, 1997 One of the keenest debates of the 1990s is that of whether Great Britain should join the European single currency. At the centre of this parliamentary debate is John Redwood. Using his experience as an industrialist, financier and politician, he explains the far-reaching implications of a single currency. Redwood states that monetary union would lead to a European superstate controlled by Brussels, where major issues would be decided that would affect British taxes, employment and benefits. His view is clear, for the sake of the country, Britain must retain its own currency.
