*Assistive Technology* Emily C. Bouck, 2015-12-31 Succinct, yet comprehensive, Assistive Technology is designed to help educators better understand assistive technology and how it can support students with disabilities from early childhood through transition into adulthood. This practical book considers the purpose of technology and the support it can provide rather than a student's disability categorization. Grounded in research and filled with engaging case studies and activities, author Emily C. Bouck offers an unbiased depiction of the advantages and limitations of technology. Readers are exposed to a full range of assistive technology including up-to-date coverage of low- and high-technology, as well as free and for-purchase options that can be used to support students with disabilities.

**Cases in Head and Neck Cancer** Bari Hoffman Ruddy, Henry Ho, Christine Sapienza, Jeffrey J. Lehman, 2016-05-06 Cases in Head and Neck Cancer: A Multidisciplinary Approach encompasses rich material and resources that demonstrate the complex interface between the diagnostic and clinical

information necessary to successfully manage patients with head and neck cancer. This must-read book contains cases written by leading experts in the field that cover a wide variety of head and neck cancers (i.e., tongue base, tonsil, laryngeal, HPV related, etc.) and treatment options, including minimally invasive surgery such as robotic surgery and combined modality treatment protocols. Specifically, this text addresses comprehensive cases from initial evaluation, diagnosis, imaging, and other physiological tests to multidisciplinary treatment management (surgery, chemotherapy, and radiation therapy). Additionally, approaches for the management of toxicities or morbidities of cancer treatment are presented, as well as care plans, discharge plans, and caregiver burden and survivorship issues. Moreover, material on health literacy, humanistic care, and improving communication with assistive technology has been included. Written by clinicians specializing in speech-language pathology, otolaryngology, medical and radiation oncology, pathology, nurse case management, radiology, dietetics, among other fields, this collection of authors provides one of the most complete presentations of the inner workings of the multidisciplinary care team. The adult cases of

head and neck cancer reviewed in this text exemplify current practice issues surrounding HPV, minimally invasive robotic surgery and combined modality treatments. Each author threads introductory comments throughout the cases illustrating the critical role of the speech-language pathologist, in particular, and how all clinicians must address coping with survivorship and caregiver burden issues. Cases in Head and Neck Cancer intends to teach future medical practitioners how to approach the complexities associated with head and neck cancer. Its vast number of images and videos allow for experiential driven classroom activities. This text will be an invaluable resource for the education of speech-language pathologists, medical students, nurse care managers, dieticians, and any person involved in a head and neck cancer team.

*Communication Alternatives in Autism* Edlyn Vallejo Peña, 2019-09-06 Ten autistic self-advocates share their experiences with alternative forms of communication such as rapid prompting method (RPM) and facilitated communication (FC), both highly controversial. Their narratives document the complexities that autistic individuals navigate--in both educational and community settings--when choosing to use approaches that utilize letter boards and keyboards. While the controversies remain--RPM requires further scientific study, and FC is subject to criticism about confirmation bias--these individuals share powerful stories in the context of aiming for disability rights. The book concludes with a chapter about best practices for educators, particularly for schools and colleges that have students who use these communication methods.

Augmentative and Alternative Communication Filip Loncke, 2020-10-09 Augmentative and Alternative Communication: Models and Applications, Second Edition describes augmentative and alternative communication (AAC) comprehensively and offers a framework for understanding how AAC intervention can be used in the process of communication. This textbook is intended to serve as the

primary text for graduate-level courses in augmentative and alternative communication in speech-language pathology programs. It also serves as an essential resource for practicing clinicians. **Ghost Boy** Martin Pistorius,2013-11-19 When you lose your voice, who will speak for you? When it all seems hopeless, how do you get through each day? In the New York Times bestseller Ghost Boy, Martin Pistorius tells the harrowing story of his return to life through the healing power of love and faith. In January 1988, a happy, healthy twelve-year-old Martin Pistorius came home from school with

a sore throat. Soon, he was sleeping all day, refusing meals, and starting to lose his voice. His doctors were mystified. Within eighteen months, his voice fell silent and his developing mind became trapped inside a body he couldn't control. Martin's parents were told that the unknown degenerative disease he was struggling with would mean that he had less than two years to live. He felt invisible--like a ghost of himself. The stress and heartache shook his family to the core, bringing his parents to the brink of separation. Their boy was gone--or so they thought. Martin started to come back to life. He couldn't make a sign or a sound, but he'd become aware of the world around him again and was finally finding his way back to himself. In these pages, you'll hear the highs and lows of Martin's journey from his own perspective, including: A family's resilience in the face of hardship The consequences of misdiagnosis The gift of a wild imagination Ghost Boy shares the beautiful, heart-wrenching story of a life reclaimed, a business created, a family transformed, and a new love that's blossomed. Martin's emergence from his own darkness invites us to celebrate our own lives and fight for a better life for those around us.

*Pete's a Pizza* William Steig,1998-09-05 Pete's father starts kneading the dough. Next, some oil is generously applied. (Its really water.) And then some tomatoes. (They're really checkers.) When the dough gets tickled, it laughs like crazy.

*The Cubies' ABC* Mary Chase Mills Lyall,2021-04-26 This book was written by Mary Mills Lyall in collaboration with her architect husband Earl Harvey Lyall, who also illustrated it. *The Cubies' ABC* is a delightful and humorous satirical alphabet book that makes fun of Cubists while pretending to be a kid's book. Three unidentified individuals are called The Cubies. Each has green hair and is one of three different colors: blue, mustard, and magenta. Instead of using cubes to build them, Earl Lyall used pyramids. They frequently feature jack-o'-lantern-like leering grins, have red triangle eyes and mouths, and have triangular shapes. They frequently scowl and come out as purposefully dim-witted. They swoon over anything Cubist and mock objectivity throughout the entire book.

*Mock My Words* Chandra Shekhar,2017-06 Chinese literary genius David Tan has just started teaching at Steinbeck University's prestigious freshman writing program. He has one small problem,

however--he speaks broken English. His students scorn him and his colleagues snub him. David craves support from his gorgeous American wife Laura, but she is too busy battling a sinister high-tech conspiracy at work to care about a husband she has stopped loving. Nor can he look for sympathy from his father, who had opposed David's marriage and has stopped speaking to him. The only joy in David's life is helping Chinese-American student Melissa develop her business plan--until she too turns him the cold shoulder. David's career and marriage are near collapse, Laura faces dismissal or worse, and Melissa's enterprise is on the verge of failure. Will fortune intervene? Wordless deftly interleaves marital drama, techno-thriller, and romantic comedy into a fast-paced narrative that bridges popular and literary fiction.

To Catch a Killer Sheryl Scarborough,2017-02-07 "A twisty, cold-case mystery custom made for

fans of Sara Shepard, PLL and Veronica Mars! The edge-of-your-seat plot, sinister backstory and smart, brave and irreverent main character made this whodunit unputdownable.”—Justine Magazine

In *To Catch a Killer*, a contemporary mystery by debut author Sheryl Scarborough, a teenage girl uses forensic science to solve the cold-case murder of her mother. Erin Blake has one of those names. A name that is inextricably linked to a grisly crime. As a toddler, Erin survived for three days alongside the corpse of her murdered mother, and the case—which remains unsolved—fascinated a nation. Her father's identity unknown, Erin was taken in by her mother's best friend and has become a relatively normal teen in spite of the looming questions about her past. Fourteen years later, Erin is once again at the center of a brutal homicide when she finds the body of her biology teacher. When questioned by the police, Erin tells almost the whole truth, but never voices her suspicions that her mother's killer has struck again in order to protect the casework she's secretly doing on her own. Inspired by her uncle, an FBI agent, Erin has ramped up her forensic hobby into a full-blown cold-case investigation. This new murder makes her certain she's close to the truth, but when all the evidence starts to point the

authorities straight to Erin, she turns to her longtime crush (and fellow suspect) Journey Michaels to help her crack the case before it's too late. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
