Martin J. Murray

The Greatest Lie on Earth (Expanded Edition) Edward Hendrie, 2018-09-12 This book reveals the mother of all conspiracies. It sets forth biblical proof and irrefutable evidence that will cause the scales to fall from your eyes and reveal that the world you thought existed is a myth. The most universally accepted scientific belief today is that the earth is a globe, spinning on its axis at a speed of approximately 1,000 miles per hour at the equator, while at the same time it is orbiting the sun at approximately 66,600 miles per hour. All of this is happening as the sun, in turn, is supposed to be hurtling through the Milky Way galaxy at approximately 500,000 miles per hour. The Milky Way galaxy, itself, is alleged to be racing through space at a speed ranging from 300,000 to 1,340,000 miles per hour. What most people are not told is that the purported spinning, orbiting, and speeding through space has never been proven. In fact, every scientific experiment that has ever been performed to determine the motion of the earth has proven that the earth is stationary. Yet, textbooks ignore the scientific proof that contradicts the myth of a spinning and orbiting globe. Christian schools have been hoodwinked into teaching heliocentrism, despite the clear teaching in the bible that the earth is not a sphere and does not move. This book reveals the evil forces behind the heliocentric deception, and why scientists and the Christian churches have gone along with it.

The Flying Springbok Lionel Friedberg, 2021-07-31 An artistic rendering of

the African antelope, the Springbok, was depicted with stylized wings to serve as the logo of South African Airways (SAA) for well over 60 years. It was replaced by a new corporate identity when the airline was rebranded after the demise of apartheid, the release of Nelson Mandela from political incarceration, and the introduction of a non-racist democratic society in South Africa in the mid-nineties. As a state-owned entity, many people once saw SAA as the 'apartheid airline.' For a time, travel on board its aircraft was restricted to whites only, but this was later changed to include members of all the country's diverse racial groups. SAA pioneered flight throughout Africa during the colonial era, long before airports, supply services, radio and weather forecasting capabilities even existed. Its staff and equipment served with the Allies in Europe and North Africa during WWII and it met the enormous challenge of having to circumvent African airspace when flying to destinations abroad after most African nations closed their skies to it in protest against the country's racist policies in the early sixties. Over the years the airline grew into one of the world's major domestic, regional, and international carriers. Its long history was eventually terminated and replaced by a new entity in 2020 with the outbreak of the coronavirus pandemic. In its original incarnation it could proudly boast of being one of the world's oldest and longest-surviving international carriers. It is still seen by many around the world as the airline with that much revered and fondly remembered emblem, the Flying Springbok.

The Global Tourism System Scarlett Cornelissen,2017-05-15 Focusing on the political economy of the international tourism sector in the era of globalization and its impact in developing contexts, this book employs a case study analysis of South Africa to assess how international tourism as a global system of trade, production, exchange and governance plays out in developing countries. It also examines its benefits and disadvantages for these countries. Scarlett Cornelissen explores the nature and extent of global tourism production, consumption and regulation and how these bear upon developmental prospects, specifically in the South. She also highlights lessons for other developing countries about the limitations and possibilities for greater linkage to the global tourism system. The book is suitable for both scholars and practitioners interested in global tourism, international political economy, development, Africa and cultural studies.

The World of Flying Saucers: A Scientific Examination of a Major Myth of the Space Age Lyle Gifford Boyd,Donald H. Menzel,2022-01-17 This book examines historical accounts and photographs of UFOs seen over the skies of the USA up to the 1960s. The author has examined a large amount of information and compared accounts with scientific explanations of the same events.

The Frightened Land Jennifer Beningfield,2006-11-07 An investigation into the spatial politics of separation and division in South Africa, principally during the apartheid years, and the effects of these physical and conceptual barriers on the land. In contrast to the weight of literature focusing on post-apartheid South Africa, the focus of this book includes the spatial, political and cultural landscape practices of the apartheid government and also refers to contemporary work done in Australia, England and the US. It probes the uncertainty and ambiguity of identities and cultures in post-apartheid society in order to gain a deep understanding of the history that individuals and society now confront. Drawing on a wealth of research materials including literature, maps, newspapers, monuments, architectural drawings, government legislation, tourist brochures, political writing and oral histories, this book is well illustrated throughout and is a unique commentary on the spatial politics of a time of enormous change.

Encyclopedia of African Airlines Ben R. Guttery, 1998 The rainy season, terrain, and financial hardships have made the construction of highways and railroads nearly impossible in many parts of Africa. This lack of modern infrastructure has been overcome in some part by the development of air transportation. Hundreds of carriers--both small and large, government owned and private--have connected all parts of the continent. Together, they have had a tremendous impact on the African economy and the people. Country-by-country, this comprehensive reference work provides brief histories of over 700 airlines in 54 African nations. Each entry has the years of operation of the carrier, along with information on its origin, growth, and route

structure. Aircraft usage, including registration numbers and nicknames, is covered in many cases. Any crashes involving aircraft in the carrier's fleet are also noted. An appendix gives the location of all major African airports.

Panic City Martin J. Murray, 2020-03-10 Despite the end of white minority rule and the transition to parliamentary democracy, Johannesburg remains haunted by its tortured history of racial segregation and burdened by enduring inequalities in income, opportunities for stable work, and access to decent housing. Under these circumstances, Johannesburg has become one of the most dangerous cities in the world, where the yawning gap between the 'haves' and 'have-nots' has fueled a turn toward redistribution through crime. While wealthy residents have retreated into heavily fortified gated communities and upscale security estates, the less affluent have sought refuge in retrofitting their private homes into safe houses, closing off public streets, and hiring the services of private security companies to protect their suburban neighborhoods. Panic City is an exploration of urban fear and its impact on the city's evolving siege architecture, the transformation of policing, and obsession with security that has fueled unprecedented private consumption of 'protection services.' Martin Murray analyzes the symbiotic relationship between public law enforcement agencies, private security companies, and neighborhood associations, wherein buyers and sellers of security have reinvented ways of maintaining outdated segregation practices that define the urban poor as suspects.
