Managing Airline Networks Markus Franke, 2020-12-28 Includes a description of basic network types, performance indicators for profitable networks, efficient processes and success factors for network management, and common optimisation models and tools. Descriptive overviews are supported by practical examples, and lead to a deep-dive case study. A section on trends in network management outlines new demand forecasting models, 'Big Data' applications, Machine Learning and AI use cases, and alternative optimisation models for airlines.

Metropolitan World Atlas Arjen van Susteren, 2005 With its wealth of facts and clean, abstract design, the Metropolitan World Atlas is a must-buy. Despite the burgeoning interest in metropolitan growth and globalization there has been no way of directly comparing metropolises - until now, that is. This atlas offers a unique survey of global trade networks and their impact on metropolitan space. It documents a total of 101 metropolises, analysing them in easy-to-read ground plans. It also includes index numbers and tables regarding such aspects as population, density, pollution, travel time, data traffic, air and water travel and the size of Central Business Districts. Its unexpected combination of ground plans and statistics makes this atlas a unique work of reference where for the first time metropolitan areas like Beijing, Lagos, London, Los Angeles, Rio de Janeiro and Tokyo can be compared with one another and in terms of their position in the global urban network.

Anchor for Angkor's Children Peter Keen, 2015-09-02 In this sincere, 'bolts and all' account, Peter Keen, a technical support volunteer in Cambodia, draws attention to the work of the Angkor Hospital for Children. It is a record of real people in live situations. The Angkor Hospital for Children is an organisation that has changed and continues to change the lives of many children in Cambodia. There is no safety net or social security in Cambodia. Families and friends are all important when times are tough. Peter Keen's photographs and descriptions give an insight into the work already achieved, and reveal a nation whose people shine out as examples of love and care. This book has been produced with the sole aim of raising sufficient funds to purchase test equipment for the service and repair of the medical equipment at Angkor Hospital for Children and to assist in further training of Biomedical Engineers at the hospital.

Configurations, Dynamics and Mechanisms of Multilevel Governance Nathalie Behnke, Jörg Broschek, Jared Sonnicksen, 2019-02-01 This edited volume provides a comprehensive overview of the diverse and multi-faceted research on governance in multilevel systems. The book features a collection of cutting-edge trans-Atlantic contributions, covering topics such as federalism, decentralization as well as various forms and processes of regionalization and Europeanization. While the field of multilevel governance is comparatively young, research in the subject has also come of age as considerable theoretical, conceptual and empirical advances have been achieved since the first influential works were published in the early noughties. The present volume aims to gauge the state-of-the-art in the different research areas as it brings together a selection of original contributions that are united by a variety of configurations, dynamics and mechanisms related to governing in multilevel systems.

AIR CRASH INVESTIGATIONS: JAMMED RUDDER KILLS 132, The Crash of USAir Flight 427 Hank Williamson, editor, 2011-10 The Boeing 737 has a history of rudder system-related anomalies, including numerous instances of jamming. A number of accidents and incidents were the result of the airplanes' unexpected movement of their rudders. During the course of the four and a half year investigation of the crash of USAir Flight 427 near Aliquippa, Pennsylvania, killing 132 people, the NTSB discovered that the PCU's dual servo valve could jam as well as deflect the rudder in the opposite direction of the pilots' input, due to thermal shock, caused when cold PCUs are injected with hot hydraulic fluid. This finally solved the mystery of sudden jamming of the rudders of this aircraft.

Airport capacity constraints and strategies for mitigation: A global perspective Marc Gelhausen, Peter Berster, Dieter Wilken, 2019-09-15 Capacities, Capacity Constraints and Capacity Reserves of Airports, Today and in the Future analyzes airport capacity constraints with empirical methods that forecast future capacities and their capacity shortfalls. When predicting the future of air traffic development, it is imperative for researchers and planners to possess the most accurate data for airport capacity constraints. The book discusses in detail the importance of airport capacity constraints on air traffic development, especially for international hubs, along with mitigation strategies for already packed airports. The book analyzes cross-sectional time-series data to provide greater insight into the problems of airport crowding and over-capacity. The authors go beyond mere strategies to derive capacity, adding estimates for comparable capacities and capacity constraints of airports worldwide. As expanding current airports becomes increasingly difficult, and time consuming-especially for hub-the study of current and future airport capacity constraints becomes ever more needed. Large international airports are especially essential to the global air transport network. The book provides insight into correctly assessing and quantifying the problem of limited airport capacity, while offering strategies for overcoming these issues for a healthy global air traffic network. Focuses on airport capacity constraints in the global air traffic network and their implications for the future of air traffic development Features empirical and model-based approaches that forecast airport capacities and capacity shortcomings Provides over capacity mitigation strategies based on sound and reliable data and methodology Addresses capacity constraints at hub airports, providing insight into correctly assessing and quantifying limited capacity for these important players in the global air transportation network Applies econometric models for the implication of restraining factors on the future volume and structure of air traffic

Persephone's Blade James T. Palmer, 2010-12-21 A PATTERN OF VIOLENT SUICIDES ACROSS THE GLOBE shakes the scientific community. Can the deaths be connected to a secretive biotechnology company dedicated to solving the problem of global warming? In pursuit of answers, XUSA biochemist and bereaved widower Dr. Marcus Black learns a beautiful, vicious killer will eliminate any man, woman, or child to hide the truth, including the only living person who can help, a convicted murderer with a shocking connection to his late wife. Rushing to help prevent a genocidal catastrophe unfolding in the Australian Outback, Marcus discovers a horrifying revelation about his wife, his friends, and himself. In one final twist, the fate of the elusive killer is sealed, but will Marcus and his XUSA colleagues be in time to save humanity itself?

Airport Marketing Nigel Halpern, Anne Graham, 2021-11-04 This accessible, up-to-date, comprehensive, and in-depth textbook introduces students and practitioners to the principles and practice of airport marketing as well as the major changes and future marketing challenges facing the airport sector. It applies principles of marketing within the airport industry, and examines airport marketing and its environment, how to define and measure the market for airport services, airport strategic marketing planning and individual elements of the airport marketing mix (product, price, distribution and promotion). The book integrates key elements of marketing theory with airport marketing in practice. Each chapter contains extensive

industry examples for different types of airports from around the world to build on the theoretical base of the subject and show real-life applications. This new second edition has been updated to include: New and expanded content on branding and the passenger experience, marketing partnerships, engagement marketing and customer relationship management. Three brand new chapters on digital marketing, marketing for a more sustainable future, and crisis communications and marketing, in light of the Covid-19 pandemic. New, global case studies and examples throughout. This comprehensive textbook written by two airport marketing experts will be essential reading for air transport students and future managers.

Quest: Finding Freddie Thomas Richard Spradlin, 2023-03-20
Quest: Finding Freddie By: Thomas Richard Spradlin
About the Book
Quest: Finding Freddie is the narrative of a case that Richard Spradlin had in 1976 as a General Partner in the Washington, D. C., law firm of Clifford & Warnke. It concerns the search for one of his firm's clients (known to his wife and friends as Freddie) who had suddenly gone missing in Lagos, Nigeria. A devout Jew, Freddie had simply disappeared on Saturday, August 14, 1976 (the Jewish Sabbath) while on a business trip to Nigeria. His disappearance was particularly disturbing since it occurred not long after the June 27, 1976 rescue by Israel Defense Forces of hostages being held by terrorists at the Entebbe airport in Uganda. As spectacular and heroic as the Entebbe rescue mission had been, it had caused extreme embarrassment for Uganda's President, Idi Amin Dada Oumee, who was also serving at the time as Chairman of the Organization of African Unity (OAU). In Nigeria, the political situation was even more uncertain due to tensions following an attempted military coup which had taken place on February 13, 1976. Although that coup failed, it nonetheless had resulted in the assassination of Nigeria's Head of State, General Murtala Rufai Ramat Muhammed. It was against this background that Spradlin was sent by his law firm on the quest to find Freddie.
