Airport Capacity Constraints and Strategies for Mitigation Marc C. Gelhausen,Peter Berster,Dieter

Wilken,2019-11-18 When predicting the future of air traffic development, it is imperative for researchers and planners to have the most accurate information about airport capacity constraints. Airport capacity constraints and strategies for mitigation: A global perspective analyses airport capacity constraints with empirical methods that forecast future capacities and capacity shortfalls. The book discusses in detail the importance of airport capacity constraints on air traffic development, especially for international hubs, along with mitigation strategies for already congested airports. It analyses empirical data to provide greater insight into the problems of airport congestion and capacity shortage. The authors present detailed global traffic forecasts for the years 2030 and 2040, and mitigation strategies for overcoming the problem of limited airport capacity. As expanding current airports becomes increasingly difficult, and time consuming – especially for hubs – the study of current and future airport capacity constraints becomes ever more needed. This book provides detailed information about how to correctly assess and quantify the problem of limited airport capacity, while offering strategies for overcoming these issues for a healthy global air traffic network. Focuses on airport capacity constraints in the global air traffic network and their implications for the future of air traffic development Features empirical and model-based approaches that forecast airport capacities and capacity shortcomings Provides over capacity mitigation strategies based on sound and reliable data and methodology Addresses capacity constraints at hub airports, providing insight into how to correctly assess and quantify limited capacity for these important players in the global air transportation network Applies econometric models for the implication of restraining factors on the future volume and structure of air traffic

Flight and Concealment Susanna Schrafstetter,2022-09-06 Between ten thousand and twelve thousand Jews tried to escape Nazi genocide by going into hiding. With the help of Jewish and non-Jewish relatives, friends, or people completely unknown to them, these U-boats, as they came to be known, dared to lead a life underground. Flight and Concealment brings to light their hidden stories. Deftly weaving together personal accounts with a broader comparative look at the experiences of Jews throughout Germany, historian Susanna Schrafstetter tells the story of the Jews in Munich and Upper Bavaria who fled deportation by going underground. Archival sources and interviews with survivors and with the Germans who aided or exploited them reveal a complex, often intimate story of hope, greed, and sometimes betrayal. Flight and Concealment shows the options and strategies for survival of those in hiding and their helpers, and discusses the ways in which some Germans enriched themselves at the expense of the refugees.

Law, Fiction and Activism in a Time of Climate Change Nicole Rogers,2019-08-14 The book examines the narratives of climate change which have developed and which are currently evolving in three areas: law, fiction and activism. Narratives of climate change generated by litigants, judges, writers of fiction and activists are having, and will have, a profound effect on the way we respond to the climate change crisis. Acknowledging the prevalence of

unreliable narrators, this book explores the reliability and significance of different forms of climate narrative. The author analyses overlapping themes and points of intersection, considering the recurrent motif of the trickster, the prominence of the child, the significance and ongoing viability of the rights discourse, and the increasingly prevalent emergency framing with its multiple implications for law's empire. She asks how law, fiction and activism measure up as textual and performative fora for telling the story of climate change and anticipating a climate-changed future. And, in addition, how can they help foster transformative narratives which empower us to confront the climate change crisis? This highly topical, cross-disciplinary work will be of interest to anyone concerned about the growing climate emergency and makes a valuable contribution to climate law, environmental law, the environmental humanities and ecocriticism.
