Flying Low Joseph Furbee Gordon,2001 Flying a Piper Cub aircraft for artillery fire direction at the front lines against German forces in World War II was hazardous. Shot down twice, Joe Gordon survived to tell what it was like being a pilot of such a plane in combat. The Piper Cub aircraft, flying at the leading edge of American armored divisions, was especially useful as a spotter plane. The advantage of the view a few hundred feet above the leading tanks often resulted in devastating artillery fire raining down upon the enemy just where and when it was needed the most. Joe Gordon fought with the 65th Armored Artillery Battalion in battles from the German border with the Netherlands to the Rhine River and from the Rhine to the Elbe River until almost the end of the European war in May 1945.--Inside back dust cover.

Star Wars: Light of the Jedi (The High Republic) Charles Soule,2021-01-05 #1 NEW YORK TIMES BESTSELLER • Long before the First Order, before the Empire, before even *The Phantom Menace* . . . Jedi lit the way for the galaxy in *The High Republic* It is a golden age. Intrepid hyperspace scouts expand the reach of the Republic to the furthest stars, worlds flourish under the benevolent leadership of the Senate, and peace reigns, enforced by the wisdom and strength of the renowned order of Force users known as the Jedi. With the Jedi at the height of their power, the free citizens of the galaxy are confident in their ability to weather any storm But the even brightest light can cast a shadow, and some storms defy any preparation. When a shocking catastrophe in hyperspace tears a ship to pieces, the flurry of shrapnel emerging from the disaster threatens an entire system. No sooner does the call for help go out than the Jedi race to the scene. The scope of the emergence, however, is enough to push even Jedi to their limit. As the sky breaks open and destruction rains down upon the peaceful alliance they helped to build, the Jedi must trust in the Force to see them through a day in which a single mistake could cost billions of lives. Even as the Jedi battle valiantly against calamity, something truly deadly grows beyond the boundary of the Republic. The hyperspace disaster is far more sinister than the Jedi could ever suspect. A threat hides in the darkness, far from the light of the age, and harbors a secret that could strike fear into even a Jedi's heart.

Only The Light Moves Francis A Doherty,2023-11-01 *Only the Light Moves* tells the story of a twenty-four-year-old US Army pilot who volunteered to fly covert S.O.G., or Studies and Observations Group, reconnaissance missions over the Ho Chi Minh Trail, a region that came to represent not only the

United States' war with Vietnam, but also the "secret war" with Laos and Cambodia. But this is not simply a war story; it is a love story about flying. Captain Francis A. Doherty spent every day for ten months above the jungle battlefield in a Cessna O-1 Bird Dog. The first all-metal fixed-wing aircraft ordered for and by the United States Army following the Army Air Forces' separation from it in 1947, the single-engine Bird Dog was a liaison and observation aircraft. And for this role, it was completely unarmed. It was from the cockpit of a Bird Dog that Captain Doherty observed this illusive war, perhaps searching out enemy troop movements or calling down waiting F-4 Phantoms to strike a new target. It was a war in which he followed his father's footsteps in his dream to become a pilot, and where he learned a compassion that extended both to his comrades and the civilians caught in the middle of that terrible war. In *Only the Light Moves* Captain Doherty only reveals the highs and lows of his year at war in Vietnam but expands beyond his time in the conflict. He explores the emotional struggle he and his comrades faced after they returned home, reconciliations with lost faith, and the incredible impact of war on families. We are also given an insight into Francis' subsequent journey to becoming a commercial airline pilot. His story makes no effort to glorify the violence that took the lives of so many. There are no broad stroke proclamations about the war, only a very personal, sensitive account of a terrible conflict seen through the eyes of a then young pilot in the air, illuminating the reality and the cost of when one's country decides to go to war.

Fly By Knights Roger D. Graham,2022-08-15 By the time of the Vietnam War, the U.S. military had transitioned to jet aircraft. Yet leaders soon learned prop-driven planes could still play a role in counterinsurgency warfare. World War II-era Douglas B-26 light bombers proved effective in close air support and interdiction, beginning with Operation Farm Gate in 1961. Forty B-26s were remanufactured as improved A-26 attack aircraft, which destroyed hundreds of North Vietnamese supply vehicles on the Ho Chi Minh Trail in 1966-1969. The personal recollections of 37 pilots, navigators, maintenance and armament personnel, and family members, tell the harrowing story of B-26 and A-26 Air Commando Wing combat operations in Vietnam and Laos.

Russia in Transition Frank Columbus, 2003 Historically, the United States and Russia have had an enigmatic relationship, and the decade since the end of the Cold War has not completely cleared the ambiguity between the two nations. Russia itself faces several problem areas in its ongoing transition from communism and the old Soviet government to democratic society. Among Russia's quandaries are the war with Chechnyan separatists, organised crime, government corruption, arms control, the emergence of free markets, and international relations with NATO and the UN. The start of the American-led war on terrorism has brought Russia even more into focus as a key ally in opposing insurgency and militants. This book studies the wide array of dilemmas facing Russia both domestically and internationally.

Biplanes at War Wray R. Johnson, 2019-04-16 Unlike the relative uniformity of conventional warfare, the peculiarities of small wars prevent a clear definition of rules and roles for military forces to follow. During the small wars era, aviation was still in its infancy, and the US military had only recently begun battling in the skies. The US Marine Corps recognized that flexibility and ingenuity would be critical to the successful conduct of small wars and thus employed the new technology of aviation. In *Biplanes at War: US Marine Corps Aviation in the Small Wars Era, 1915–1934*, author Wray R. Johnson provides a riveting history of the marines' use of aviation between the world wars, a time in which young soldiers were volunteering to fly in combat when flying itself was a dangerous feat. Starting with Haiti in 1915, *Biplanes at War* follows the marines' aviation experiences in Haiti, the Dominican Republic, China, and Nicaragua, chronicling how marines used aircraft to provide supporting fires (e.g., dive-bombing) to ground troops in close contact with irregular opponents, evacuate the sick and wounded, transport people and cargo (e.g., to assist humanitarian operations), and even support elections in furtherance of democracy. After years of expanding the capabilities of airplanes far beyond what was deemed possible, the small wars era ended, and the US Marines Corps transitioned into an amphibious assault force. The legacy of the marines' ability to adapt and innovate during the small wars era endures and provides a useful case study. *Biplanes at War* sheds light on how the marines pioneered roles and missions that have

become commonplace for air forces today, an accomplishment that has largely gone unrecognized in mainstream histories of aviation and air power.

Selling War Steven J. Alvarez,2016-03-01 In the spring of 2004, army reservist and public affairs officer Steven J. Alvarez waited to be called up as the U.S. military stormed Baghdad and deposed Saddam Hussein. But soon after President Bush's famous PR stunt in which an aircraft carrier displayed the banner Mission Accomplished, the dynamics of the war shifted. *Selling War* recounts how the U.S. military lost the information war in Iraq by engaging the wrong audiences--that is, the Western media--by ignoring Iraqi citizens and the wider Arab population, and by paying mere lip service to the directive to Put an Iraqi face on everything. In the absence of effective communication from the U.S. military, the information void was swiftly filled by Al Qaeda and, eventually, ISIS. As a result, efforts to create and maintain a successful, stable country were complicated and eventually frustrated. Alvarez couples his experiences as a public affairs officer in Iraq with extensive research on communication and government relations to expose why communications failed and led to the breakdown on the ground. A revealing glimpse into the inner workings of the military's PR machine, where personnel become stewards of presidential legacies and keepers of flawed policies, *Selling War* provides a critical review of the outdated communication strategies executed in Iraq. Alvarez's candid account demonstrates how a fundamental lack of understanding about how to wage an information war has led to the conditions we face now: the rise of ISIS and the return of U.S. forces to Iraq.

Mustang the Inspiration Philip Kaplan,2013-02-19 If it looks right, it will probably fly right a tired old saying among airmen, but one that persists. Think if you will of the handful of aeroplanes that most people would probably agree are the best-looking examples of all. The list is short but distinguished and the proof is in the enthusiastic common view of most pilots who have flown them for nearly all, it was love at first sight and first flight. For most that little list includes the Vickers-Supermarine Spitfire, the Douglas DC-3, the Hawker Hunter, the Lockheed Constellation, the Concord, and the North American Mustang. Of these, the Spitfire and Mustang stand out and remain extra special to the majority of pilots who have been privileged to fly them. One common thread exists among those who have experienced both of these fine machines; an opinion that seems to hold up even after a lifetime of flying the best the aviation design community has created. While the Spitfire may have a slight edge in light-touch handling, if I have to go to

war in one type, I'll take the Mustang every time. This comprehensive account of the Mustang aircraft charts the operational history of the craft and also relays a the personal stories and experiences of the men who flew the 'Cadillac of the skies' as it has been described. A vivid and enthralling history set to appeal to aviation enthusiasts looking for more than just a mere operational history of the Mustang's exploits.

The Crisis ,2003-05 The Crisis, founded by W.E.B. Du Bois as the official publication of the NAACP, is a journal of civil rights, history, politics, and culture and seeks to educate and challenge its readers about issues that continue to plague African Americans and other communities of color. For nearly 100 years, The Crisis has been the magazine of opinion and thought leaders, decision makers, peacemakers and justice seekers. It has chronicled, informed, educated, entertained and, in many instances, set the economic, political and social agenda for our nation and its multi-ethnic citizens.

Everyday War Greta Lynn Uehling,2023-02-15 Everyday War provides an accessible lens through which to understand what noncombatant civilians go through in a country at war. What goes through the mind of a mother who must send her child to school across a minefield or the men who belong to groups of volunteer body collectors? In Ukraine, such questions have been part of the daily calculus of life. Greta Uehling engages with the lives of ordinary people living in and around the armed conflict over Donbas that began in 2014 and shows how conventional understandings of war are incomplete. In Ukraine, landscapes filled with death and destruction prompted attentiveness to human vulnerabilities and the cultivation of everyday, interpersonal peace. Uehling explores a constellation of social practices where ethics of care were in operation. People were also drawn into the conflict in an everyday form of war that included provisioning fighters with military equipment they purchased themselves, smuggling insulin, and cutting ties to former friends. Each chapter considers a different site where care can produce interpersonal peace or its antipode, everyday war. Bridging the fields of political geography, international relations, peace and conflict studies, and anthropology, Everyday War considers where peace can be cultivated at an everyday level.

Gunship Ace Al J. Venter,2012-01-19 "Spotlights the career of a fascinating modern warrior, while also shedding light on some of the conflicts that have raged throughout the world" (Tucson Citizen). A former South African Air Force pilot who saw action throughout the region from the 1970s on, Neall Ellis is the best-known mercenary combat aviator alive. Apart from flying Alouette helicopter gunships in Angola, he fought in the Balkan war for

the Islamic forces, tried to resuscitate Mobutu's ailing air force during his final days ruling the Congo, flew Mi-8s for Executive Outcomes, and piloted an Mi-8 fondly dubbed "Bokkie" for Colonel Tim Spicer in Sierra Leone. Finally, with a pair of aging Mi-24 Hinds, Ellis ran the Air Wing out of Aberdeen Barracks in the war against Sankoh's vicious RUF rebels. As a "civilian contractor," Ellis has also flown helicopter support missions in Afghanistan, where, he reckons, he had more close shaves than in his entire previous four decades. From single-handedly turning the enemy back from the gates of Freetown to helping rescue eleven British soldiers who'd been taken hostage, Ellis's many missions earned him a price on his head, with reports of a million-dollar dead-or-alive reward. This book describes the full career of this storied aerial warrior, from the bush and jungles of Africa to the forests of the Balkans and the merciless mountains of Afghanistan. Along the way the reader encounters a multiethnic array of enemies ranging from ideological to cold-blooded to pure evil, as well as examples of incredible heroism for hire.
