**Creating Great Visitor Experiences** Stephanie Weaver, 2016-07-11 Museum and other non-profit professionals have begun to realize that the complete visitor experience is the key to repeat attendance, successful fundraising, and building audience loyalty. Taking lessons learned by successful experience-shapers in the for-profit world, Stephanie Weaver distills this knowledge for museums and other organizations which depend on visitor satisfaction for success. Is your institution welcoming? Are the bathrooms clean? Does the staff communicate well? Are there enough places to sit? These practical matters may mean more to creating a loyal following than any exhibit or program the institution develops. Weaver breaks the visitor experience down to 8 steps and provides practical guidance to museums and related institutions on how to create optimal visitor experiences for each of them. In a workshop-like format, she uses multiple examples, exercises, and resource links to walk the reader through the process.

**Making Computerized Provider Order Entry Work** Philip Smith, 2012-09-19 Despite all the jokes about the poor quality of physician handwriting, physician adoption of computerized provider order entry (CPOE) in hospitals still lags behind other industries' use of technology. As of the end of 2010, less than 22% of hospitals had deployed CPOE. Yet experts claim that this technology reduces over 80% of medication errors and could prevent an estimated 522,000 serious medication errors annually in the US. Even though the federal government has offered \$20 billion dollars in incentives to hospitals and health systems through the 2009 stimulus (the ARRA HITECH section of the American Recovery and Reinvestment Act of 2009), many organizations are struggling to implement advanced clinical information systems including CPOE. In addition, industry experts estimate that the healthcare industry is lacking as many as 40,000 persons with expertise in clinical informatics necessary to make it all happen by the 2016 deadline for these incentives. While the scientific literature contains numerous studies and stories about CPOE, no one has written a comprehensive, practical guide like *Making CPOE Work*. While early adopters of CPOE were mainly academic hospitals, community hospitals are now proceeding with CPOE projects and need a comprehensive guide. *Making CPOE Work* is a book that will provide a concise guide to help both new and experienced health informatics teams successfully plan and implement CPOE. The book, in a narrative style, draws on the author's decade-long experiences of implementing CPOE at a variety of academic, pediatric and community hospitals across the United States.

**Walter Camp and the Creation of American Football** Roger R Tamte, 2018-07-25 Walter Camp made the development of football—indeed, its very creation—his lifelong mission. From his days as a college athlete, Camp's love of the game and dedication to its future put it on the course that would allow it to seize the passions of the nation. Roger R. Tamte tells the engrossing but forgotten life story of Walter Camp, the man contemporaries called the father of American football. He charts Camp's leadership as American players moved away from rugby and for the first time tells the story behind the remarkably inventive rule change that, in Camp's own words, was more important than all the rest of the legislation combined. Trials also emerged, as when disputes over forward passing, the ten-yard first down, and other rules became so public that President Theodore Roosevelt took sides. The resulting political process produced losses for Camp as well as successes, but soon a consensus grew that football needed no new major changes. American football was on its way, but as time passed, Camp's name and defining influence became lost to history. Entertaining and exhaustively researched, *Walter Camp and the Creation of American Football* weaves the life story of an important sports pioneer with a long-overdue history of the dramatic events that produced the nation's most popular game.

*Healthy, Active and Outside!* Janice Filer, 2008-01-17 'There's a growing awareness that for the good of their health, children need to be out and about more, with their friends, exploring the outdoor world in their own way.' - Nicola Butler, Director of the Free Play Network It is widely acknowledged that children today do not get outdoors often enough and there are serious concerns about children's activity levels and rising associated behavioural, mental and health problems. With such structured and technology-driven lives, it is easy for young children to stay indoors, play on computers and not socialise with other children in a healthy and active way. This book not only supports 'playing out' as an integral part of children's natural growth and development, but also provides early years workers with a full programme of outdoor physical activities to promote physical, social and behavioural skills. This book is a guidebook to setting up an outdoor physical activity programme in any early years setting. The book focuses on how getting outdoors and taking part in physical activities will provide children with positive fun experiences to enhance their general learning and development. The programme can be adapted to suit any timescale - from a whole term to one or two days. Key features include showing practitioners: how to make the most of their outdoor area for all children step by step explanations to the outdoor activities how to engage participants (including parents) how to set up and plan activities ideas for group and individual assessment how to carry out risk assessments how an outdoors programme can change children's lives for the better.
