A History of Broadcasting in the United States Erik Barnouw,1966 Tells how radio and television became an integral part of American life, of how a toy became an industry and a force in politics, business, education, religion, and international affairs.

Sounds of Change Christopher H. Sterling,Michael C. Keith,2009-09-15 When it first appeared in the 1930s, FM radio was a technological marvel, providing better sound and nearly eliminating the static that plagued AM stations. It took another forty years, however, for FM's popularity to surpass that of AM. In *Sounds of Change*, Christopher Sterling and Michael Keith detail the history of FM, from its inception to its dominance (for now, at least) of the airwaves. Initially, FM's identity as a separate service was stifled, since most FM outlets were AM-owned and simply simulcast AM programming and advertising. A wartime hiatus followed by the rise of television precipitated the failure of hundreds of FM stations. As Sterling and Keith explain, the 1960s brought FCC regulations allowing stereo transmission and requiring FM programs to differ from those broadcast on co-owned AM stations. Forced nonduplication led some FM stations to branch out into experimental programming, which attracted the counterculture movement, minority groups, and noncommercial public and college radio. By 1979, mainstream commercial FM was finally reaching larger audiences than AM. The story of FM since 1980, the authors say, is the story of radio, especially in its many musical formats. But trouble looms. Sterling and Keith conclude by looking ahead to the age of digital radio--which includes satellite and internet stations as well as terrestrial stations--suggesting that FM's decline will be partly a result of self-inflicted wounds--bland programming, excessive advertising, and little variety.

TOWERS IN THE SAND Donn R. Colee Jr.,2016-08-30 Broadcasting touches almost every person in the United States every day. But like the air we breathe, we seldom give it a second thought. *Towers in the Sand* is the only comprehensive history of Florida's broadcasting industry, 1922-2016, the people who brought the stations to life, and the events that saw the state grow from boom to bust and back again to now the nation's third most populous. Over a decade in the making and fully referenced and indexed, *Towers in the Sand* tells stories from over eighty Florida broadcasting pioneers and current leaders, from the Keys to the Panhandle. A celebration of broadcasting's proudest moments through hard-hitting journalism and editorials, lifesaving moments through decades of hurricanes, and lighthearted moments with favorite personalities and promotions. *Towers in the Sand* also laments the loss of a national treasure as most stations were transformed from local community partners to lines on corporate balance sheets. As broadcasting sits at the precipice of a very uncertain future, the author hopes through this work to engage thought, conversation, and action to ensure its continued relevance in society.

Early FM Radio Gary L. Frost,2010-04-01 The commonly accepted history of FM radio is one of the twentieth century's iconic sagas of invention, heroism, and tragedy. Edwin Howard Armstrong created a system of wideband frequency-modulation radio in 1933. The Radio Corporation of America (RCA), convinced that Armstrong's system threatened its AM empire, failed to develop the new technology and refused to pay Armstrong royalties. Armstrong sued the company at great personal cost. He died despondent, exhausted, and broke. But this account, according to Gary L. Frost, ignores the contributions of scores of other individuals who were involved in the decades-long struggle to realize the potential of FM radio. The first scholar to fully examine recently uncovered evidence from the Armstrong v. RCA lawsuit, Frost offers a thorough revision of the FM story. Frost's balanced, contextualized approach provides a much-needed corrective to previous accounts. Navigating deftly through the details of a complicated story, he examines the motivations and interactions of the three communities most intimately involved in the development of the technology--Progressive-era amateur radio operators, RCA and Westinghouse engineers, and early FM broadcasters. In the process, Frost demonstrates the tension between competition and collaboration that goes hand in hand with the emergence and refinement of new technologies. Frost's study reconsiders both the social construction of FM radio and the process of technological evolution. Historians of technology, communication, and media will welcome this important reexamination of the canonic story of early FM radio.

Apocalyptic Ruin and Everyday Wonder in Don DeLillo's America Michael Naas,2022-10-20 *Apocalyptic Ruin and Everyday Wonder in Don DeLillo's America* is a fresh and engaging study of "last things" in Don DeLillo's works--things like death, mourning, and the decline of the American empire, but then also the apocalypse, the last judgment, and the end of the world more generally. Michael Naas untangles complex themes in short, witty chapters that highlight and celebrate DeLillo's inventive and playful writing, employing a novel approach to literary criticism. Making no use of secondary sources, the book is entirely a discussion of DeLillo's work, accessible to any level of readership while maintaining a firm grasp of the theory necessary to make this unique argument. And yet, this book is also about all the things that double or shadow those last things in the very same works, like the wonder of language or the radiance of everyday events. From *Americana* (1971) up through *Zero K* (2016) and *The Silence* (2020), and perhaps like no other American author, Don DeLillo has created meaning by contrasting, juxtaposing or, as Naas calls it here, "contrabanding" first and last things, conflicting or opposing forces such as life and death, creation and destruction, consumption and waste, everyday wonder and apocalyptic ruin, the origins of language and the end of the world. In his adept demonstration of how DeLillo has returned repeatedly to these "last things," Naas shows how the works of Don DeLillo have been there for more than half a century to remind us of one simple and yet profound truth--nothing lasts forever.

The Concise Encyclopedia of American Radio Christopher H. Sterling,Cary O'Dell,2010-04-12 The average American listens to the radio three hours a day. In light of recent technological developments such as internet radio, some argue that the medium is facing a crisis, while others claim we are at the dawn of a new radio revolution. The Concise Encyclopedia of American Radio is an essential single-volume reference guide to this vital and evolving medium. It brings together the best and most important entries from the three-volume Museum of Broadcast Communications Encyclopedia of Radio, edited by Christopher Sterling. Comprised of more than 300 entries spanning the invention of radio to the Internet, The Concise Encyclopedia of American Radio addresses personalities, music genres, regulations, technology, programming and stations, the golden age of radio and other topics relating to radio broadcasting throughout its history. The entries are updated throughout and the volume includes nine new entries on topics ranging from podcasting to the decline of radio. The Concise Encyclopedia of American Radio include suggestions for further reading as complements to most of the articles, biographical details for all person-entries, production credits for programs, and a comprehensive index.

The West in Early Cinema Nanna Verhoeff,2006-01-01 Verhoeff investigates the emergence of the western genre, made in the first two decades of cinema (1895-1915). By analyzing many unknown and forgotten films from international archives she traces the relationships between films about the American West, their surrounding films, and other popular media such as photography, painting, (pulp) literature, Wild West Shows and popular ethnography. Through this exploration of archival material she raises new questions of historiography and provides a model for historical analysis. These first traces of the Western film reveal a preoccupation with presence and actuality that informs us about the way in which film, as new medium, took shape within the context of its contemporary visual culture. In The West in Early Cinema gaat Nanna Verhoeff op zoek naar de nog onbekende beginjaren van het westerngenre tijdens de eerste twee decennia van het medium film 1895-1915). Aan de hand van onbekende en vergeten films uit internationale filmarchieven traceert zij de relaties tussen films over het Westen, omringende filmgenres uit deze periode, en andere populaire media als fotografie, schilderkunst, (pulp)literatuur, Wild West Shows en populaire etnografie. Deze sporen van het genre tonen een grote actualiteit en variatie, die laat zien op welke manier de film als nieuw medium een vorm vond binnen de toenmalige visuele cultuur.
