Decisions of the Federal Maritime Commission United States. Federal Maritime Commission, 1985

Decisions United States. Federal Maritime Commission, 1999

Compendium of GAO's Views on the Cost Saving Proposals of the Grace Commission: Individual issue analyses United States. General Accounting Office, 1985 In response to a congressional request, GAO examined issues studied and recommendations made by the President's Private Sector Survey on Cost Control, better known as the Grace Commission, to determine whether: (1) the issues and recommendations made on program management and cost control had merit; (2) legislation would be necessary to implement the recommendations; (3) implementation efforts were completely underway; and (4) the savings estimates were realistic. GAO found that many of the issues studied and recommendations made by the Commission had overall merit and that, while many have already been implemented by legislative or administrative action, many more require additional legislative action to be fully implemented. However, GAO questioned the accuracy of many of the associated savings estimates, found flaws in the methodology used to develop some of the estimates, and found that the description of the methodology used in some estimates was insufficient to allow an assessment of its validity. In most of the instances where GAO questioned the methodology used, it believed that the savings were overstated. GAO supported management improvement issues more frequently than policy-oriented issues; however, policy-oriented issues constitute a large portion of the total estimated savings. GAO does not support restructuring federal subsidy programs and fixing federal health care costs to a percentage of the gross national product, and it disagreed with selected aspects of recommendations to reduce civilian and military retirement benefits. GAO support was most extensive in the areas aimed at strengthening federal management systems, federal automatic data processing operations, federal credit and cash management efforts, and civilian

procurement and property management activities. GAO has made similar or related recommendations in nearly half of the areas in which it agreed with the Commission. Additional legislative action would be necessary to fully implement approximately half of the recommendations analyzed.

Disaster Medicine Pocket Guide: 50 Essential Questions Henri F Julien, 2022-10-19 A very handy practical book written by French doctors specialised in disaster medicine, this guide offers their core experience condensed in 50 small, easily digestible chapters. Each chapter is designed to enable the reader to “know”, “understand”, and learn what to “do” in the concerned situation, ensuring the crucial information is easily on hand and available. Facing disasters, whether natural or man-made, technological or social, what are the risks and the consequences of such hazards on victims? What kind of care to provide? How to get organised, to have the appropriate resources, and to protect oneself as a responder? The French emergency and healthcare preparedness has followed a unique path. The responding medical doctors have followed in the footsteps of Dominique Larrey, a military surgeon and the father of emergency medicine. For him, the on-scene presence of doctors is paramount to organise the entire healthcare and emergency response, an innovative method that has proven its efficacy. This book is intended for all healthcare and emergency staff, doctors, paramedics or first aiders in ambulances or in emergency services who might come to deal with a massive influx of injured, poisoned, or traumatised victims. The management of multiple concomitant emergencies requires specific know-how and skills. May this guide contribute to the dissemination of a validated French know-how and thus to save lives and alleviate suffering.

Essential Firepower Alex Tatistcheff, 2019-05-06 This book is focused on Firepower essentials. In it, you will find practical, best practice recommendations for configuring and using Firepower. Each best practice is listed in the table of contents so you can quickly find it along with an explanation of why it is important. Essential Firepower will help you learn how to effectively configure and use this system, what is important, and what

is not. The best way to use this book is to read each of the recommendations with their associated explanation and decide if they are right for you. Not every recommendation will be applicable to your Firepower deployment. However, you will find that most will provide valuable real-world information and insight into the type of tuning that will bring out the true value and potential of your Firepower system. The goal of this book is not to be just another tome on the switches, knobs and dials available to configure and tune the Firepower NGFW. The primary focus is to provide pragmatic, real-life information and advice to network and security administrators who use this system day-to-day. You will get the benefit of the author's 14 years of experience as a user, instructor and consultant with the Sourcefire 3D and FireSIGHT/Firepower system. If you are ready to learn the practical application of Firepower technology, and to gain understanding you won't get from the official documentation, then this book is for you.

Shipping, Part 500 to End U S Office of the Federal Register, 2013-02-04

S. 1356, Ocean Shipping Reform Act of 1995 United States. Congress. Senate. Committee on Commerce, Science, and Transportation, 1996

Shipping Conferences under EC Antitrust Law Luis Ortiz Blanco, 2007-06-26

Liner conferences are among the oldest surviving cartels in the world. Created in the 1870s they have existed since on all the world's shipping routes. With the approval or tacit acquiescence of governments everywhere, they fix freight rates, control capacity and share markets. The United Nations Code of Conduct for Liner Conferences (1974) granted them global recognition and prompted the European Community to recommend Member States to join the Convention on the Liner Code (1979) and to grant them the most generous and extraordinary block exemption from EC antitrust rules ever (1986). The European Commission's administration of the block exemption has clarified some of its aspects and, to a certain extent, limited its scope; but until very recently, it has not questioned the appropriateness of the exceptionally lenient treatment of liner shipping cartels in the European Union. After a report by the OECD Secretariat (2002) recommending abolition of antitrust immunity for shipping cartels in member countries, the European Commission launched a review of the block exemption (2003) which has led to its repeal (2006). This book studies first the origins, the early history and the regulation of liner conferences in the world and in the European Community, focusing in particular on the Regulation which granted a block exemption to liner conferences. Then, it examines one by one the four conditions for a block exemption to be granted under EC law, and concludes that none of them is fulfilled by shipping cartels. Finally, it proposes some alternative scenarios and solutions for the adequate enforcement of antitrust law in the maritime sector once the block exemption has been repealed.
