Interaction of Morphology and Syntax Zygmunt Frajzyngier,Erin Shay,2008-05-21 The present volume deals with hitherto unexplored issues on the interaction of morphology and syntax. These selected and invited papers mainly concern Cushitic and Chadic languages, the least-described members of the Afroasiatic family. Three papers in the volume explore one or more typological characteristics across an entire language family or branch, while others focus on one or two languages within a family and the implications of their structures for the family, the phylum, or linguistic typology as a whole. The diversity of topics addressed within the present volume reflects the great diversity of language structures and functions within the Afroasiatic phylum.

Uncertainty and Intelligent Information Systems Ronald R. Yager,2008

Intelligent systems are necessary to handle modern computer-based technologies managing information and knowledge. This book discusses the theories required to help provide solutions to difficult problems in the construction of intelligent systems. Particular attention is paid to situations in which the available information and data may be imprecise, uncertain, incomplete or of a linguistic nature. The main aspects of clustering, classification, summarization, decision making and systems modeling are also addressed. Topics covered in the book include fundamental issues in uncertainty, the rapidly emerging discipline of information aggregation, neural networks, Bayesian networks and other network methods, as well as logic-based systems.
