Endotherapy in Biliopancreatic Diseases: ERCP Meets EUS Massimiliano Mutignani,Jörg G. Albert,Carlo Fabbri,2020-06-26 This volume presents the technical and cultural state of the art of two of the riskiest, most complex and operator-dependent digestive operative techniques: endoscopic retrograde cholangiopancreatography (ERCP) and endoscopic ultrasonography (EUS). The authors compare old and new techniques, shedding light on the most recent and innovative scientific findings, including those in the field of anatomic pathology and molecular biology considered relevant for the analysis of tissue samples collected during EUS. In view of the technical difficulties specific to these techniques, the book also offers access to online-videos and numerous images, making it a valuable resource both for physicians approaching these techniques for the first time as well as for those already using them. Organized into 7 sections, it describes in detail all techniques related to ERCP/EUS, together with any specific technical equipment required. It also presents a new paradigm based on the latest results in the areas of prevention, diagnosis and management of the most common complications. Clinical outcomes presented in international literature, as well as algorithms – both based on scientific evidence and expert findings – are illustrated and compared to alternative treatments.

*Diaminds* Mihnea C. Moldoveanu,Roger L. Martin,2010-01-01 What constitutes successful thinking in business? What are the techniques used by some of the top minds in the business world to solve problems and create value? In *Diaminds*, Mihnea Moldoveanu and Roger Martin, creators of the Integrative Thinking curriculum at the Rotman School of Management, draw upon numerous case studies and interviews - as well as theories and models from cognitive psychology, epistemology, analytic philosophy, and semiotics - to present a new conception of successful intelligence that is immediately applicable to business situations. The 'diamind' (or dialogical mind) is characterized by a number of qualities: the ability to simultaneously hold opposing plans, models, and courses of action in mind while retaining the ability to act (bi-stability), logical depth and informational breadth in one's thinking processes (meliorism), the ability to choose among various representations of the world, the self, and others (choicefulness), and the capacity to think about how to analyse and solve a problem while at the same time thinking about the problem itself (polyphony). The authors discuss these concepts in detail, and provide examples and exercises throughout to encourage readers to examine and re-engineer their own thought patterns to develop these qualities and cultivate their own 'diaminds'.

Should you wait for the next version? Are you being led down an electronic dead-end? This book answers such questions with insights into older technologies that are still viable, practical advice on current office options and predictions on what will arrive in the near future. Whether you are self-employed, an entrepreneur looking to start up a small business or a corporate looking to become more efficient, this book could hold the key to your streamlined success.
