Reeds Vol 13: Ship Stability, Powering and Resistance Jonathan Ridley,Christopher Patterson,2014-04-21 This indispensable guide to ship stability covers topics such as flotation and buoyancy, small angle, large angle and longitudinal stability, water density effects, bilging, ship resistance, and advanced hydrostatics. Each chapter has a comprehensive list of aims and objectives at the start of the topic, followed by a check-list at the end of the topic for students to ensure that they have developed all the relevant skills before moving onto the next topic area. The book features over 170 worked examples with fully explained solutions, enabling students to work through the examples to build up their knowledge and develop the necessary key skills. The worked examples, which range in difficulty from very simple one-step solutions to SQA standard exam questions and above, are predominantly based on a hypothetical ship, with the reader supplied with extracts from a typical data book for the ship which replicates those found on real ships, enabling the reader to develop and practise real-life skills.

The Shaping Shaikh Dejan Aždajić,2020-01-20 Islam is more than a system of rigid doctrines and normative principles. It is a diverse mosaic of subjective, often contradictory interpretations and discrepant applications that prohibit a narrow, one-dimensional approach. This book argues that to uncover this complex reality and achieve a more accurate understanding of Islam as a lived religion, it is imperative to consider Islam from the point of view of human beings who practice their faith. Consequently, this book provides an important contribution through a detailed ethnographic study of two contemporary Sufi communities. Although both groups shared much in common, there was a fundamental, almost perplexing range of theological convictions and ritual implementations. This book explores the mechanism that accounts for such diversity, arguing for a direct correlation between Sufi multiformity and the agency of the spiritual leader, the Shaikh. Empirical research regarding the authority by which Shaikhs subjectively generate legitimate adaptations that shape the contours of religious belief are lacking. This study is significant, because it focuses on how leadership operates in Sufism, highlighting the primacy of the Shaikh in the selection and appropriation of inherited norms.
