Gene Therapy and Cancer Research Focus Rebecca N. Campbell,2008 Genes, which are carried on chromosomes, are the basic physical and functional units of heredity. Genes are specific sequences of bases that encode instructions on how to make proteins. Although genes get a lot of attention, it's the proteins that perform most life functions and even make up the majority of cellular structures. When genes are altered so that the encoded proteins are unable to carry out their normal functions, genetic disorders can result. Gene therapy is an experimental treatment that involves introducing genetic material into a person's cells to fight disease. Gene therapy is being studied in clinical trials for many different types of cancer and for numerous other diseases. The volume presents significant new research results in this promising field.

EBOOK: Services Marketing: Integrating Customer Focus Across the Firm Alan Wilson,Valarie Zeithaml,Mary Jo Bitner,Dwayne Gremler,2012-06-16 The Second European Edition of Services Marketing: Integrating Customer Focus Across the Firm by Wilson, Zeithaml, Bitner and Gremler uniquely focuses on the development of customer relationships through quality service. Reflecting the increasing importance of the service economy, Services Marketing is the only text that put the customer's experience of services at the centre of its approach. The core theories, concepts and frameworks are retained, and specifically the gaps model, a popular feature of the book. The text moves from the foundations of services marketing before introducing the gaps model and demonstrating its application to services marketing. In the second edition, the book takes on more European and International contexts to reflect the needs of courses, lecturers and students. The second edition builds on the wealth of European and International examples, cases, and research in the first edition, offering more integration of European content. It has also be fully updated with the latest research to ensure that it continues to be seen as the text covering the very latest services marketing thinking. In addition, the cases section has been thoroughly examined and revised to offer a range of new case studies with a European and global focus. The online resources have also been fully revised and updated providing an excellent package of support for lecturers and students.

Data, analytics and delivery for impact in focus 2022: priorities for regions and countries ,2022-06-30

Focus on Impact Wendy Lipton-Dibner,2015-10-06 Never in the history of capitalism has there been a greater need for a shift in business focus. Consumers are cynical, skeptical and cautious, opening a new opportunity for difference-makers. We need to move away from the traditional money-driven business focus and focus all product design, marketing and delivery on making an immediate and lasting impact on people's lives. This how-to manual provides proven strategies to build and grow any retail or service business that's focused on impact with step-by-step, proven formulas to make it happen.

Finding Your Leadership Focus Douglas B. Reeves,2011 In his new book, author and international keynoter Douglas Reeves addresses a major challenge faced by today's school leaders: an ever-growing load of programs and initiatives. Reeves contends that program overload not only taxes leadership resources, but actually hurts rather than improves student performance. Drawing on recent research findings, this book shows how leaders can pare down from a proliferation of initiatives to determine what is truly most important based on their local concerns, challenges, populations, and other school factors. Identifying a specific set of leadership practices that are more strongly associated with improvements in student achievement, Reeves provides explicit guidelines for how school leaders can improve their most critical leadership decisions by simultaneously engaging in three essential strategies: monitoring teaching and leadership practices, building high degrees of efficacy among staff members, and focusing on a smaller number of priorities. Finding Your Leadership Focus is essential reading for new and veteran principals, teacher leaders, and PLC book study groups.

Focus Groups Graham R. Walden,2009-10-01 Physicians, health researchers, and nurses make extensive use of focus groups. Thus, researchers and readers need access to the realm of applications of focus group methodology in the wide variety of medical and health sciences. In this second installment of a two-volume examination of ten recent years (1998-2007) of focus group studies and research literature, author Graham R. Walden turns his attention from the arts, humanities, and non-medical sciences to the medical and health sciences, concentrating on a broad range of studies in books, book chapters, and journal articles that are available in English. Focus Groups, Volume II: A Selective Annotated Bibliography: Medical and Health Sciences covers over 500 articles on a multitude of topics in the medical and health sciences, such as the health profession and the practice of medicine, public health, and several different bodily systems and types of diseases. The annotations in this bibliography describe the content of a source document to help the reader discern whether pursuit of the full text is appropriate or desirable. This book offers significant benefits to all medical personnel; graduate and undergraduate students; professional focus group practitioners; and individuals seeking increased awareness of studies that have been conducted in the health arena.

City Logistics 1 Eiichi Taniguchi,Russell G. Thompson,2018-05-24 This volume of three books presents recent advances in modelling, planning and evaluating city logistics for sustainable and liveable cities based on the application of ICT (Information and Communication Technology) and ITS (Intelligent Transport Systems). It highlights modelling the behaviour of stakeholders who are involved in city logistics as well as planning and managing policy measures of city logistics including cooperative freight transport systems in public-private partnerships. Case studies of implementing and evaluating city logistics measures in terms of economic, social and environmental benefits from major cities around the world are also given.

10 Minutes and Beyond George Bair Ed D,Fabio Tagliasacchi,Fabio Tagliasacchi Mba,2016-11-27 The purpose of this book is to develop a healthy exploration of the means and delivery of

substance abuse treatment from the point in time when an individual is referred until treatment plan objectives are accomplished. The primary focus will be the structure that provides the services versus the actual treatment methodology. Culture helps to create and recreate the reason for organizational existence; these values and beliefs tend to drive the end product of the facility. Interestingly enough, the client is both the means and the ends, defining the organizational mission, and the primary reason for its existence.

Patient Flow Randolph Hall,2013-12-11 This book is dedicated to improving healthcare through reducing delays experienced by patients. With an interdisciplinary approach, this new edition, divided into five sections, begins by examining healthcare as an integrated system. Chapter 1 provides a hierarchical model of healthcare, rising from departments, to centers, regions and the “macro system.” A new chapter demonstrates how to use simulation to assess the interaction of system components to achieve performance goals, and Chapter 3 provides hands-on methods for developing process models to identify and remove bottlenecks, and for developing facility plans. Section 2 addresses crowding and the consequences of delay. Two new chapters (4 and 5) focus on delays in emergency departments, and Chapter 6 then examines medical outcomes that result from waits for surgeries. Section 3 concentrates on management of demand. Chapter 7 presents breakthrough strategies that use real-time monitoring systems for continuous improvement. Chapter 8 looks at the patient appointment system, particularly through the approach of advanced access. Chapter 9 concentrates on managing waiting lists for surgeries, and Chapter 10 examines triage outside of emergency departments, with a focus on allied health programs Section 4 offers analytical tools and models to support analysis of patient flows. Chapter 11 offers techniques for scheduling staff to match patterns in patient demand. Chapter 12 surveys the literature on simulation modeling, which is widely used for both healthcare design and process improvement. Chapter 13 is new and demonstrates the use of process mapping to represent a complex regional trauma system. Chapter 14 provides methods for forecasting demand for healthcare on a region-wide basis. Chapter 15 presents queueing theory as a method for modeling waits in healthcare, and Chapter 16 focuses on rapid delivery of medication in the event of a catastrophic event. Section 5 focuses on achieving change. Chapter 17 provides a diagnostic for assessing the state of a hospital and using the state assessment to select improvement strategies. Chapter 18 demonstrates the importance of optimizing care as patients transition from one care setting to the next. Chapter 19 is new and shows how to implement programs that improve patient satisfaction while also improving flow. Chapter 20 illustrates how to evaluate the overall portfolio of patient diagnostic groups to guide system changes, and Chapter 21 provides project management tools to guide the execution of patient flow projects.

Towards A Sustainable Arctic: International Security, Climate Change And Green Shipping Michael Goodsite,Niklas Swanstrom,2023-03-23 The Arctic's environment, economics and politics are changing rapidly, and the conflicting interests among stakeholders mean that it lacks sustainable political and military cooperation. States bordering the Arctic — Russia, Canada, the United States, and the Nordic countries — as well as those further afield — such as China and Japan — all recognize the economic benefits of the region, but struggle to address the security challenges and the potential environmental impact of activities conducted there. This book provides a snapshot of the subject areas connecting transport, environmental security, resource development, and military security, featuring new material written after Russia's second invasion of Ukraine.
