How to Get Followers on Twitter Steve Burns,2011-08 While other books will tell you all about how to use twitter, how to set up a profile, and inform you of the overwhelming amount of applications available to use with your twitter account. This twitter book is only about one thing, how to get and keep followers. The purpose of this book is to give twitter users who are frustrated with their small followings 100 ideas to help them build their following. By using the ideas found in this book consistently over a period of time it is possible to acquire 1000 followers. If you follow the principles of this book, you will see your followers grow. These are not my theories or opinions; these are the actual ideas I used to build my own twitter following to over 5000 in less than one year. Twitter has been a great help to me in both connecting with likeminded people and collaborating on business projects. Twitter was also the main outlet for promotions for my two published books that both reached the top 5% of all books sold on Amazon. I have helped others by sharing these ideas and I believe it will work for the readers of this book if they are patient and work on using these suggestions while also building a high quality twitter account through quality tweets. Use the ideas that fit your twitter goals and personality and skip the ones you do not like. I believe everyone will find enough tips in this book to gain a substantial following of people who want to hear what you have to say.

Complete Guide to Twitter Traffic Stu Covacevick,2021 ntroduction To Twitter Profits It's likely that you've heard of Twitter, and perhaps you've even tried to become an active member of this incredibly popular information network. With Twitter, people within the community post what are referred to as 'tweets'. Tweets are short messages and updates that people send out to everyone who chooses to follow them. Each time a tweet is submitted, it shows up on the public timeline, and is pushed down as other, new tweets are circulated throughout the network. And while Twitter requires consistent activity in order to really take full advantage of its incredible resources, you can begin building a targeted list in little time, while generating a massive 'following' of those who are interested in receiving your updates. Within the twitter community, people who choose to add you as a contact are referred to as 'followers', and similar to a mailing list, each follower can be considered a 'lead'. This is yet another way that growing a twitter following is similar to building an effective mailing list. Each follower you receive should be interested in the niche market you are catering to, so building massive following bases isn't the way to go. Instead, you want to build QUALITY lists of followers that are genuinely interested in your broadcasts and likely to respond to your offers and messages. Think about twitter in a similar way as you would when building a mailing list or newsletter base. If you have 100 targeted leads who have decided to subscribe to your ezine and actively respond to your offers, and on another list you have 1,000 leads who are not genuinely interested in what you are offering, which list do you believe would produce the best results or will be easier to monetize?
