*Taking Food Public* Psyche Williams Forson,Carole Counihan,2013-09-13 The field of food studies has been growing rapidly over the last thirty years and has exploded since the turn of the millennium. Scholars from an array of disciplines have trained fresh theoretical and methodological approaches onto new dimensions of the human relationship to food. This anthology capitalizes on this particular cultural moment to bring to the fore recent scholarship that focuses on innovative ways people are recasting food in public spaces to challenge hegemonic practices and meanings. Organized into five interrelated sections on food production – consumption, performance, Diasporas, and activism – articles aim to provide new perspectives on the changing meanings and uses of food in the twenty-first century.

**Allergen Management in the Food Industry** Joyce I. Boye,Samuel Benrejeb Godefroy,2011-01-14 This book comprehensively addresses the sources of allergenic contaminants in foods, their fate during processing, and the specific measures that need to be taken to minimize their occurrence in foods. The book provides up-to-date information on the nine major allergens (as well as other emerging allergens) and practical guidelines on how these allergens can be identified and controlled during production and processing. Starting with an introduction to food allergens, the book follows with sections on food allergen management during production and processing, guidelines for the processing of specific allergen-free foods, techniques for hypo-allergenization and allergen detection, and allergen-free certification.

Food Security in Small Island States John Connell,Kristen Lowitt,2019-06-25 This book provides a contemporary overview of the social-ecological and economic vulnerabilities that produce food and nutrition insecurity in various small island contexts, including both high islands and atolls, from the Pacific to the Caribbean. It examines the historical and contemporary circumstances that have accompanied the shift from subsistence production to the consumption of imported, processed foods and drinks, and the impact of this transition on nutrition and the rise of non-communicable diseases. It also assesses the challenges involved in reversing this trend, and how more effective social and economic policies, agricultural and fisheries strategies, and governance arrangements could promote more resilient and sustainable small island food systems. It offers both theoretical and practical perspectives, and brings together a broad range of policy areas, e.g. agriculture, food, commerce, health, planning and socio-economic policy. Given its scope, the book offers a valuable resource for a range of disciplines in a number of regional contexts, and for the growing number of scholars and practitioners working on and in small island states. It will be of particular value as the first book to examine the diversity and commonalities of island states around the globe as they confront issues of food security.
