Regulating and Managing Food Safety in the EU Harry Bremmers,Kai Purnhagen,2018-08-01 This book analyses EU food law from a regulatory, economic and managerial perspective. It presents an economic assessment of strategies of food safety regulation, and discusses the different regulatory regimes in EU food law. It examines the challenges of food safety in the internal market as well as the regulatory tools that are available. The book's generic theorising and measurement of regulatory effects is supplemented by detailed analysis of key topics in food markets, such as health claims, enforcement strategies, and induced risk management at the level of the organizations producing food. The regulatory effects discussed in the book range from classical regulatory analysis covering e.g. effects of ex-ante versus ex-post regulation and content-related versus information-related regulation to new regulatory options such as behavioral regulation. The book takes as its premise the idea that economic considerations are basic to the design and functioning of the European food supply arena, and that economic effects consolidate or induce modification of the present legal structures and principles. The assessments, analyses and examination of the various issues presented in the book serve to answer the question of how economic theory and practice can explain and enhance the shaping and modification of the regulatory framework that fosters safe and sustainable food supply chains. □ □

Handbook of Behavior, Food and Nutrition Victor R. Preedy,Ronald Ross Watson,Colin R. Martin,2011-04-15 This book disseminates current information pertaining to the modulatory effects of foods and other food substances on behavior and neurological pathways and, importantly, vice versa. This ranges from the neuroendocrine control of eating to the effects of life-threatening disease on eating behavior. The importance of this contribution to the scientific literature lies in the fact that food and eating are an essential component of cultural heritage but the effects of perturbations in the food/cognitive axis can be profound. The complex interrelationship between neuropsychological processing, diet, and behavioral outcome is explored within the context of the most contemporary psychobiological research in the area. This comprehensive psychobiology- and pathology-themed text examines the broad spectrum of diet, behavioral, and neuropsychological interactions from normative function to occurrences of severe and enduring

psychopathological processes.

Food Ethics Education Rui Costa, Paola Pittia, 2017-10-27 The book is divided in 3 sections, each containing several chapters: Section 1 includes chapters that identify and discuss several ethical issues along the food chain, with particular detail of issues in the food industry and in consumer behavior; Section 2 includes chapters that present the basis of a code of conduct in the food profession as well as the description of existing codes of conduct of food industry and food scientist professionals, including ethics of publishing, and also ethics in risk communication; Section 3 includes chapters based on case studies with examples of teaching approaches currently used in teaching food ethics, easy to implement and already tested and confirmed as successful examples that engage students in this topic. Although professional ethics in food supply chain is claimed as an essential topic to be addressed in any degree program, few higher education institutions that currently include a module on ethics in their study programs. In general, it is argued that ethics is a topic addressed along the curriculum and embedded in the contents of the modules. However, ethics, for its importance, needs a different teaching and educational approach, and this book achieves that..

Round Trip Shamontiel L. Vaughn, 2007-08-01 College graduation is usually the time to collect a cap and gown, pick a career, and set foot in the real world. For three graduates, their graduation days will be yet another crash course. Memo reaches out to Seleste, but his recently paroled father pulls his attention another way. Jermaine believes in no secrets in marriage, but after proposing to Cara, she may not be ready to divulge the truth, regardless of what her ex-filing Arnez decides. The wedding is in Atlanta, the graduation is in Chicago, unfinished business is in the boroughs of New York, and news that one of the crew may have AIDS is circulating. How will they cope?

The Joy of Eating Jane K. Glenn, 2021-11-05 This volume explores our cultural celebration of food, blending lobster festivals, politicians' roadside eats, reality show chef showdowns, and gravity-defying cakes into a deeper exploration of why people find so much joy in eating. In 1961, Julia Child introduced the American public to an entirely new, joy-infused approach to cooking and eating food. In doing so, she set in motion a food renaissance that is still in full bloom today. Over the last six decades, food has become an increasingly more diverse, prominent, and joyful point of cultural interest. The Joy of Eating discusses in detail the current golden age of food in contemporary American popular culture. Entries explore the proliferation of food-themed television shows, documentaries, and networks; the booming popularity of celebrity chefs; unusual, exotic, decadent, creative, and even mundane food trends; and cultural celebrations of food, such as in festivals and music. The volume provides depth and academic gravity by tying each entry into broader themes and larger contexts (in relation to a food-themed reality show, for example, discussing the show's popularity in direct relation to a significant economic event), providing a brief history behind popular foods and types of cuisines and tracing the evolution of our understanding of diet and nutrition, among other explications.

Civil Affairs: Soldiers Become Governors Harry Lewis Coles, Albert Katz Weinberg, 1964 A documentary history with brief narrative introductions illustrating the evolution of civil affairs policy and practice in the Mediterranean and European theaters.

United States Army in World War II Harry L. Coles, Albert K. Weinberg, 1986 A documentary history with brief narrative introductions illustrating the evolution of civil affairs policy and practice in the Mediterranean and European theaters. Most important of all, in World War II soldiers became governors in a much broader sense than ever before—so much more than was foreseen that the Army's specialized training proved scant preparation for perhaps the most important phase of their role. They became not merely the administrators of civilian life for the Army's immediate needs but at the same time the executors and at times even, by force of circumstances, the proposers of national and international political policy. This broader role arose from the fact that in World War II the Allies strove to realize from the very beginning of occupation political aims that had usually not been implemented during war or, if during war at all, not until active hostilities had ended. Thus, in enemy countries civil affairs officials were immediately to extirpate totalitarian governmental and economic systems, in liberated countries they were as soon as possible to aid in restoring indigenous systems and authorities, and in both types of countries they were to make an all-out effort to effect gradual transition toward the envisaged postwar national and international order.

The Omnivorous Mind John S. Allen, 2012-05-30 In this gustatory tour of human history, Allen suggests that the everyday activity of eating offers deep insights into our cultural and biological heritage. Beginning with the diets of our earliest ancestors, he explores eating's role in our evolving brain before considering our contemporary dinner plates and the preoccupations of foodies.
