*So Lovely The Feet* Dr. Garth Mundinger-Klow,2012-12-30 Nancy Sinatra sings, These boots are made for walking, conjuring up images of a woman's sexy feet in long boots... Among sexual preferences for body parts, feet and toes are the most popular, above hands, rear ends, mouths, and noses. Why is this? It has never been ascertained, although Freud had his usual penis-connected theories. Dr. Garth Mundinger-Klow sets out to discover why certain people have great sexual desires for feet, and why there are those who enjoy having their toes worshipped. Read these case studies if you dare--you will never walk the same again!

**Leonardo's Foot** Carol Ann Rinzler,2013-05-03 A Selection of the Scientific American, History, and BOMC2 Book Clubs “An in-depth look at the anatomy and history of feet reveals their often overlooked importance in human evolution, medicine and art.” —Science News “Stylish, informative, entertaining, and pleasantly personal . . . Whether Rinzler is exploring how our feet explain or illuminate such topics as evolution, disability, racism, diet, or desire, she maintains a fascinating perspective on the peculiarities of being human.” —Rain Taxi Review of Books “This neat little book draws a clear picture of our feet, providing understanding that extends far beyond the obvious. Readers often like to walk away from a book feeling they learned something—that the author left them with a new way to look at an old idea, and this book fulfills that need.” —City Book Review “Rinzler lifts the lowly human foot to new heights in this appealing book.” —Booklist (starred review) Leonardo’s Foot stretches back to the fossil record and forward to recent discoveries in evolutionary science to demonstrate that it was our feet rather than our brains that first distinguished us from other species within the animal kingdom. Taking inspiration from Leonardo da Vinci’s statement that “the human foot is a masterpiece of engineering and a work of art,” Carol Ann Rinzler leads us on a fascinating stroll through science, medicine, and culture to shed light on the role our feet have played in the evolution of civilization. Whether discussing the ideal human form in classical antiquity, the impressive depth of the arching soles on the figures in Sandro Botticelli’s Birth of Venus, an array of foot maladies and how they have affected luminaries from Lord Byron to Benjamin Franklin, or delving into the history of foot fetishism, Rinzler has created a wonderfully diverse catalog of details on our lowest extremities. This is popular science writing at its most entertaining—page after page of fascinating facts, based around the playful notion that appreciating this often overlooked part of our body is essential to understanding what it is to be human. Carol Ann Rinzler, a former nutrition columnist for the New York Daily News, has contributed to a number of publications, including the New York Times. She is the author of more than twenty books on health and medicine, including Nutrition for Dummies, an international bestseller translated into fourteen languages.

**America on Foot** Kerry Segrave,2006-03-01 Hippocrates, one of history's earliest known physicians, once asserted, Walking is man's best medicine. Over the last three centuries, people have endorsed walking for a variety of reasons--health among them. Before the 1700s, people walked as an essential part of their lifestyle. With the coming of the transportation revolution--and the advent of such conveyances as horse-drawn coaches, railways and automobiles--walking became something that was done increasingly out of choice rather than necessity. England's fashionable society engaged in afternoon promenades as a stylish fad. While America's vast distances and sparse settlements made this activity impractical, Americans nevertheless took to walking in other ways, including engaging in long distance walking competitions complete with spectators and prize money. Thus, for most of the twentieth century, the activity of walking was much more than a means of transportation. Beginning with the history of walking as a social activity, the book discusses the various issues which have affected walkers, including increased automobile traffic, the attention of the marketing industry and pedestrian regulations. The work examines the contemplative, psychological and observational qualities of walking as well as famous personalities--including Leonardo da Vinci, William Shakespeare, John Keats and John James Audubon--who endorsed these intellectual qualifications. During the 1970s fitness boom, walking was reinvented yet again, becoming an activity of numbers and equations as participants fought to maximize health benefits. The book concludes with a legal analysis of pedestrianism as it relates to sharing space with the automobile.
