Reviving America: How Repealing Obamacare, Replacing the Tax Code and Reforming The Fed will Restore Hope and Prosperity Steve Forbes, Elizabeth Ames, 2015-12-04 Conservative icon Steve Forbes returns with his most powerful and provocative ideas yet The United States has been through one of the most tumultuous decades in recent history. Polls show people on both sides of the ideological divide believe that the country has gone off track. If something isn't done quickly, Americans face a bleak future—continuing decline and disarray in a world that grows ever more dangerous. Steve Forbes, two-time candidate for the GOP presidential nomination and Forbes Media Chairman, explains how today's malaise has been caused by years of Obama's destructive policies, a broken tax system, and the Federal Reserve's Soviet-style controls over credit and money. The problems are challenging. But Forbes tells us that, with the right policies, the country can bounce back faster than people think. In this compelling and much-needed book, he sets forth a three-part plan to revive America. Patient-Driven Healthcare: The problem with healthcare, Forbes says, is that Big Government, health insurance companies, and employers are in control, not you, the patient. The key to getting high-quality, affordable healthcare is increasing competition and choice, and putting patients in charge. Enact a Flat Tax: Today's complex, corrupt tax code must be scrapped. The best answer is a simple Flat Tax. Forbes shows how this very bold reform would free America from the IRS and unleash an unprecedented wave of prosperity. A Sound Dollar as Good as Gold: With its ever-fluctuating "fiat" dollar, the Federal Reserve has blocked a real recovery and is the prime cause of today's stagnant, crisis-ridden economy. The answer? Take the dollar out of the hands of the Washington politicians by returning to a monetary system with the value of the dollar linked to gold. A clear and vital guide, Reviving America shows how the United States can recover the optimism and entrepreneurial dynamism that made it the greatest nation in history. These are 21st century solutions—not the failed ideas of the recent past. Forbes offers specific ideas and plans, not generalities and bromides, and is challenging policy makers to do the same. Steve Forbes is the coauthor of Money, the New York Times bestseller Power Ambition Glory, and the Wall Street Journal bestseller How Capitalism Will Save Us. Forbes is the Chairman and Editor-in-Chief of Forbes Media, which published Forbes magazine, with a circulation of nearly 1 million readers. Combined with Forbes Asia and Forbes Europe, and the company's licensee editions, the magazine reaches close to 6 million global readers. Forbes.com reaches almost 70 million unique monthly visitors. Elizabeth Ames has co-authored three previous books with Steve Forbes: Money: How The Destruction of the Dollar Threatens The Global Economy—And What We Can Do About It; Freedom Manifesto: Why Free Markets Are Moral and Big Government Isn't; and the Wall Street Journal bestseller, How Capitalism Will Save Us: Why Free People and Free Markets Are The Best Answer In Today's Economy.

From Reform to Growth Vít Novotný, 2013 The global economic crisis that began in 2007 has posed huge challenges for European citizens and governments. The crisis has shown that the financial sector has not been adequately regulated and supervised, that governments and individuals have overspent, and that European economies are

suffering from structural problems. This book, a collaboration between the Centre for European Studies and its member foundations, assesses government responses to the crisis at the national, EU and regional levels, and also offers policy recommendations. Governments should work with one another and with EU institutions to improve bank supervision and regulatory mechanisms. They should undertake fiscal consolidation measures, bearing in mind that government deficits and debt incur costs that burden future generations. Finally, they should undertake structural reforms such as creating flexible labour markets, increasing the retirement age and shaping efficient public institutions.

Market Entry and Operational Decision Making in East-West Business Relationships Jorma Larimo,2013-04-03
Understand the dynamics of East-West relationships in business to make better decisions The Eastern expansion of the European Union has increased interest in this geographic region. *Market Entry and Operational Decision Making in East-West Business Relationships* presents 10 case studies that focus on firms in Central and Eastern Europe and the strategies used for success. Academics, researchers, and practitioners examine a variety of topics, including entry and marketing strategies of Western multinational companies, choices of locations for foreign direct investments, first mover advantages, entry behavior of retailing companies, dynamics in subsidiary operations, industry clusters, decision-making autonomy, and internationalization. *Market Entry and Operational Decision Making in East-West Business Relationships* provides information that is uniquely timely and practical to those in business in this region. The chapters bring the academic and the practical perspectives together by analyzing various research studies from different companies in several Central and Eastern European countries. This resource discusses companies and the decisions about where they begin and maintain operations, and why these strategies were chosen. The book provides a clear spotlight on the business decisions currently taking place in the East-West interaction. Topics in *Market Entry and Operational Decision Making in East-West Business Relationships* include: studies of four Estonian companies on their emergence and success factors a comparative study of performance measures of companies in Central and Eastern Europe a detailed look at the strategies of Finnish and Swedish companies in the Baltic states and Russia the location decisions of Italian firms a comparative study of in-store shopping behavior in Italy, France, and Poland the regionalization of multinational company strategies studies of Estonian companies, including the wood and forest industries and more *Market Entry and Operational Decision Making in East-West Business Relationships* is an essential resource that examines issues of critical importance to business researchers, practitioners, and policymakers.

Energy Law and Economics Klaus Mathis,Bruce R. Huber,2018-04-19 This book offers an edited volume for all readers who wish to gain an in-depth grasp of the economic analysis of recent developments in energy law and policy in Europe and the United States. In response to waning resources and heightened environmental awareness, many countries are now seeking to redefine their energy mix. Several energy sources are available: coal and oil, natural gas, and a variety of renewables. Yet which of them are capable of addressing core energy-related

concerns? Reliability, security, affordability, fairness, and sustainability all have to be taken into account. Further, once a target mix has been identified, two challenges remain for legal scholars: what role does the law play in achieving a specified energy mix, and, how can the law best fulfill that role? The essential energy concerns are just as important in defining the way we shape our energy mix as they are in defining the mix itself. An example of current challenges in energy law and policy can be seen in the pursuit by the German and Swiss governments of the so-called “Energiewende” (energy transition). These policies are intended to enable the transition from a non-sustainable use of fossil and nuclear energy to a more sustainable approach based on renewable energies. On the one hand, the goal is to achieve a decarbonization of the energy economy by reducing the use of fossil energy sources such as petroleum, carbon and natural gas. On the other, and in response to the Fukushima nuclear accident, a phase out is intended to eliminate the dangers of nuclear technologies. Achieving these goals poses tremendous challenges for the two countries’ energy policies – partly because the energy transition will not only affect energy production, but also energy consumption. From a Law and Economics perspective, a number of questions arise: to what extent is it justifiable to rely on markets and continued technological innovation, especially with regard to the present exploitation of scarce resources? To what extent is it necessary for states to intervene in energy markets? Regulatory instruments are available to create and maintain more sustainable societies: command and control regulations, restraints, Pigovian taxes, emission certificates, nudging policies, and more. If regulation in a certain legal field is necessary, which policies and methods will most effectively spur the sustainable consumption and production of energy in order to protect the environment while mitigating any potential negative impacts on economic development? Do neoclassical and behavioural economics provide us with a suitable framework for predicting the market’s complex reactions to a changing energy policy? This book provides theoretical insights as well as empirical findings in order to answer these vital questions.

The New Estonian Golden Age Alexander Grover, 2009-03-06 The New Estonian Golden Age introduces an alternative view on age-old and controversial topics that are holding up Estonian aspirations of prosperity. Estonia, known as The Baltic Tiger, is one of New Europe's most impressive economic turn-around stories since gaining independence from the Soviet Union in 1991. They implemented innovative ideas such as flat tax, online voting and e-government. At one point, the leaders were predicting that Estonia would become one of Europe's five richest nations. Now the nation is on the verge of an unprecedented economic crisis, the leaders have retracted this statement as too ambitious. This book contends that if leaders combine pragmatic long term vision with bold decisions, the dream can still come true.

Entrepreneurship, Cooperation and the Firm J. M. Ulijn, Dominique Drillon, Frank Lasch, 2007-01-01 The book you are about to read offers some very powerful insights into the link between entrepreneurship, industrial cooperation and the emergence of high-tech companies in Europe. It deals with the very essence of the potential that Europe can and should use in order to increase its competitiveness and retain at the same time its quality of living.

From the foreword by Janez Potocnik, EU Commissioner for Science Policy Presenting original and innovative research studies with a focus on new business development in science and technology, this book highlights the role and challenge of European cooperation to create new techno-ventures and encourage them to survive and even flourish. The book is an exceptional result of a distinctive network of European and American scholars, practitioners, and members of public institutions interested in the critical issues of emergence and survival of technology and knowledge based firms. The contributors study examples from both the old EU-member states such as France, Germany, the UK and the Netherlands, as well as newer countries such as Slovenia and Estonia. The book is unique in bringing culture and psychology together in the particular context of the nascent technopreneur. Using a plethora of different approaches, Entrepreneurship, Cooperation and the Firm will be of great interest to innovation and entrepreneurship policy makers at governmental levels, and also to those involved in research programs on entrepreneurship, innovation and organizational change. In addition, this book will be a stimulating read for academics, researchers and practitioners both inside and outside of the classroom.

Smart Cities, Smart Future Mike Barlow, Cornelia Levy-Bencheton, 2018-10-15 Are you curious about smart cities? You should be! By mid-century, two-thirds of us will live in cities. The world of tomorrow will be a world of cities. But will they be smart cities? Smart cities are complex blends of technologies, systems and services designed and orchestrated to help people lead productive, fulfilling, safe and happy lives. This remarkable book is a window into our shared future. In crisp language and sharp detail, Mike Barlow and Cornelia Lévy-Bencheton explain how smart cities are powerful forces for positive change. With keen eyes and warm hearts, they invite readers to imagine the world of tomorrow, a fascinating world of connected cities and communities. They capture and convey the depth and richness of the worldwide smart city movement. Smart Cities, Smart Future describes the impact of smart city projects on people in towns, cities and nations around the world. The book includes descriptions of ongoing smart city projects in North America, Europe, Asia and the Middle East. Looking Ahead to an Urban World No two smart cities are alike. No one can say with certainty or precision what the term “smart city” means. There is no standard definition or common template. Today, smart cities are works in progress. They emerge from our hopes and our dreams. This book provides you with the knowledge and insight you need to participate in the smart city movement. It explains how smart cities are “systems of systems” and introduces key concepts such as interoperability, open standards, resiliency, agility, adaptability and continuous improvement. Includes Detailed Glossary of Terms and Essential Vocabulary The book includes a detailed comprehensive glossary of essential smart city terms. The glossary will become your indispensable resource as you engage more deeply with the smart city movement and become more involved in planning our common future in an urban world. Carefully Researched and Crisply Written Smart Cities, Smart Future is carefully researched and fully documented. It includes interviews with leaders and experts in multiple disciplines essential to the development of smart cities, towns, regions, states and nations. Written in the clean style of modern journalism, the book offers a strong and compelling narrative of a changing world. It reminds us that we are responsible for choosing our destiny and

determining the shape of things to come. The smart city movement is gaining speed and momentum. Read this book, and enjoy the ride!

Artificial Intelligence and Machine Learning Powered Public Service Delivery in Estonia Martin Ebers, Paloma Krõõt Tupay, 2023-01-14 This book gives a comprehensive overview of the state of Artificial Intelligence (AI), especially machine learning (ML) applications in public service delivery in Estonia, discussing the manifold ethical and legal issues that arise under both European and Estonian law. Final conclusions and recommendations set out and analyze various policy options for the public sector, taking into account recent developments at the European level – such as the AIA proposal – as well as the experience of countries that have issued principles and guidelines or even laws for the use of ML in the public sector. “For two reasons, this study is relevant not only for an audience which is interested in Estonian administrative law. First, the authors base their legal analysis primarily on EU law and provide a state of the art-analysis of the relevant secondary legislation. This makes the book a reference text for the European debate on public sector AI governance. Second, this study is part of a larger research project in which four specific use cases of public sector AI have been developed and tested. The practical insights gained in these projects have provided the authors with an excellent understanding of the opportunities and risks of the technology, which distinguishes this legal analysis from similar enterprises.” Excerpt from the foreword by Professor Thomas Wischmeyer (University of Bielefeld)

Understanding Global Cultures Martin J. Gannon, Rajnandini Pillai, 2015-02-16 In the fully updated Sixth Edition of *Understanding Global Cultures: Metaphorical Journeys Through 34 Nations, Clusters of Nations, Continents, and Diversity*, authors Martin J. Gannon and Rajnandini Pillai present the cultural metaphor as a method for understanding the cultural mindsets of individual nations, clusters of nations, continents, and diversity in each nation. A cultural metaphor is any activity, phenomenon, or institution that members of a given culture consider important and with which they identify emotionally and/or cognitively, such as the Japanese garden and American football. This cultural metaphoric approach identifies three to eight unique or distinctive features of each cultural metaphor and then discusses 34 national cultures in terms of these features. The book demonstrates how metaphors are guidelines to help outsiders quickly understand what members of a culture consider important.

Entrepreneurship in Central and Eastern Europe Tõnis Mets,Arnis Sauka,Danica Purg,2018-03-14 The process of the transition to a market-oriented economy for countries from Central and Eastern Europe (CEE) and the Commonwealth of Independent States (CIS) started some 25 years ago. A new technology base triggered the fast growth of new investments into intangible assets by global economic leaders at the beginning of the 1990s, providing the basis for a move towards a knowledge economy. During the past 25 years, entrepreneurs in CEE and the CIS have reshaped traditional industries and created new industries, combining innovative ideas with traditional competencies. Yet we still do not know very much about how and why companies led by entrepreneurs develop, how they expand globally and what the role of new knowledge and innovation is in the internationalization process. Understanding the pathways of entrepreneurial development, especially growth through internationalization, is important for the overall development of countries in transition and beyond. *Entrepreneurship in Central and Eastern Europe: Development through Internationalization* provides an overview of entrepreneurship in a range of important emerging markets. This book aims to fill the gap in the literature by providing up-to-date data and case-based evidence. With coverage of a range of national firms from countries including Belarus, Estonia, Hungary, Poland, Latvia, Lithuania, Serbia, Slovakia, Slovenia and Ukraine, this book will be vital supplementary reading around international entrepreneurship and essential reading for those studying the business environment in this vital emerging market.
