Report of Activities, Army Ground Forces, World War II. United States. Army Field Forces, 1946

Special Forces in the War on Terror Leigh Neville, 2015-05-20 A fascinating insight into US and Coalition Special Forces operating in Iraq, Afghanistan, Somalia and Mali. Within weeks of 9/11, United States Special Operations Forces were dropping into Afghanistan to lead the war against Al Qaeda and the Taliban. For over a decade, special forces have been fighting a hidden war in Iraq, Pakistan, Syria, Somalia, Mali and Afghanistan, facing off against a range of insurgents from organisations like al Qaeda, al Shabaab, Boko Haram and the Taliban. Leigh Neville draws on recently declassified material and first-hand accounts from his SOF contacts to lift the veil of secrecy from these operations, giving an unprecedented blow-by-blow description of major Special Forces operations, culminating in SEAL Team 6's Operation Neptune Spear and the killing of Osama bin Laden. Detailing the special equipment, tactics, machinery and training that these Special Operatives received and used this impressive volume shows how the world's elite soldiers fought against overwhelming odds around the world.

Special Forces at War Shelby L. Stanton, 2008-06-15 "A rare insider's experience paired with a scholarly historical approach, making it an essential standout for any military library." —Midwest Book Review More than 8.7 million Americans reported for military duty in Southeast Asia, but only a select few wore the Green Beret, the distinctive symbol of the U.S. Army Special Forces. These elite soldiers played a crucial role during the protracted conflict. *Special Forces at War: an Illustrated History, Southeast Asia 1957-1975* by wartime veteran and military historian Shelby L. Stanton shows Special Forces' activity from the first deployments of Green Berets into battle, through their training, wartime advisory, border surveillance, strike force, and special operations roles. Unprecedented in scope, this photographic history features rare and unpublished images, providing an exclusive, insider view of covert activities such as Project Delta, whose Special Forces-trained Vietnamese commandos posed as North Vietnamese Army or Viet Cong troops behind communist lines. It depicts Special Forces' camps before, during, and after enemy assaults. It features an array of lethal weapons used by resourceful Green Berets fighting to preserve their remote outposts, as well as allied and enemy documents and propaganda. From ordinary camp life to special missions, no aspect of Special Forces activities during the Second Indochina War has been overlooked. Stanton knows his subject first hand. During six years of active duty as an infantry officer in the U.S. Army, he served as a paratrooper platoon leader, an airborne ranger advisor to the Royal Thai Army Special Warfare Center, and a Special Forces long-range reconnaissance team commander in Southeast Asia before being wounded in combat in Nam Yu, Laos.

On War Carl von Clausewitz, 1908

Daring to Win David Eshel, 1998-03-19 Written by a former officer in the Israeli Defence Force, this is a selection of some of the most exciting episodes fought by elite forces in history. Beginning with the great commando actions of World War Two, the author goes on to describe elite actions in the Middle East, the Falklands, Vietnam and Central America. He covers actions for all kinds of special forces: air, land and sea.

The Armed Forces of World War II Andrew Mollo, 2002-02-01 For many years, military historians and artists, collectors of militaria, war-gamers and war enthusiasts in general have felt the need for a comprehensive record of the uniforms, insignia and organisation of the fighting men of World War II. This remarkable book provides just such a record. Andrew Mollo is one of the leading British military historians with a worldwide reputation and his book is the result of years of study and research. His text not only details the design of uniforms and insignia but also describes their effectiveness in the field and how this affected the fighting ability of the troops themselves. An impressive series of 350

full-colour drawings has been specially commissioned for this book. These are supported by 160 photographs of the combatants in action, along with 53 plates of insignia. The authenticity of the drawings, together with the comprehensive descriptions, make *The Armed Forces of World War II* an invaluable source of reference for all students of military uniform.

The Army Air Forces in World War II Wesley F. Craven, James L. Cate, 1979-12-01

The Utility of Force Rupert Smith, 2008-02-12 From a highly decorated general, a brilliant new way of understanding war and its role in the twenty-first century. Drawing on his vast experience as a commander during the first Gulf War, and in Bosnia, Kosovo, and Northern Ireland, General Rupert Smith gives us a probing analysis of modern war. He demonstrates why today's conflicts must be understood as intertwined political and military events, and makes clear why the current model of total war has failed in Iraq, Afghanistan, and other recent campaigns. Smith offers a compelling contemporary vision for how to secure our world and the consequences of ignoring the new, shifting face of war.

Encyclopedia of Elite Forces in the Second World War Michael E. Haskew, 2007 The Second World War saw the formation and employment of a large number of specialist units in all the many theatres. The most celebrated Special Forces were the units such as the SAS, Long Range Desert Group and the American OSS but this book looks at the much wider spectrum. It embraces special-to-purpose formations such as the Chindits (in Burma), parachute forces (of Germany and the Allies), specially formed air force units such as the Dambusters, Hans-Ulrich Rudel's Tank Busting Stuka Squadrons, the US Flying Tigers and the Doolittle Raiders and Memphis Belle Bomber team. "At sea the activities of the midget submarine crews, torpedo operators and the mighty German battleships are examined. "All this and much besides make *Elite Forces of the Second World War* a thrilling, highly informative and most attractive book. "AUTHOR: Michael E. Haskew has been writing and researching military history subjects for 20 years. He is the editor of *WWII History Magazine* and is the author of *The Sniper At War*. He also served as editor of *The World War II Desk Reference* with The Eisenhower Center For American Studies. An expert on special forces activities during World War II, Mr. Haskew has written extensively on the topic. He lives in Chattanooga, Tennessee. SELLING POINTS: Satisfied the demand for books on Special Forces and small specialist units, whether on land, sea or in the air. "Covers all participants' elite forces, their actions and their commanders. 120 photos

Mobile Guerrilla Force James C. Donahue, 2013-01-15 There have been many accounts of Special Forces operations in Vietnam, but none can match this book for intensity, insight, and drama, and for capturing the essence of special operations and the men who volunteer for them. The award-winning author was a member of the Mobile Guerrilla Force, an experimental Special Forces unit conceived to emulate the tactics of Viet Cong guerrillas. This authentic firsthand account of Operation Blackjack-31 chronicles the Force's first foray into War Zone D--the VC's secret zone about which allied intelligence knew little or nothing--in January 1967 when 13 hand-picked Green Berets and a company of free Cambodian guerrillas slipped into the VC secret zone. Their orders were to conduct guerrilla operations for an undetermined period, without artillery support or possibility of reinforcement. Detachment A-303 turned the suicide mission into a dramatic success. With surgical precision and a novelist's grasp of dialogue, timing, and dramatic pacing, the author puts the reader on the ground with the Force for 31 days without respite. A surprisingly fresh description of close-in combat, Donahue's account stands as a powerful testament to the few who mattered little in the big picture but who were all that mattered to each other. Blackjack-31 was a historic departure from the conventional military thinking

that dominated the war in Vietnam and clearly demonstrated that American-led indigenous forces could conduct guerrilla operations against the enemy.

The New Face of War Bruce D. Berkowitz, 2010-05-11 As American and coalition troops fight the first battles of this new century -- from Afghanistan to Yemen to the Philippines to Iraq -- they do so in ways never before seen. Until recently, information war was but one piece of a puzzle, more than a sideshow in war but far less than the sum total of the game. Today, however, we find information war revolutionizing combat, from top to bottom. Gone are the advantages of fortified positions -- nothing is impregnable any longer. Gone is the reason to create an overwhelming mass of troops -- now, troop concentrations merely present easier targets. Instead, stealth, swarming, and zapping (precision strikes on individuals or equipment) are the order of the day, based on superior information and lightning-fast decision-making. In many ways, modern warfare is information warfare. Bruce Berkowitz's explanation of how information war revolutionized combat and what it means for our soldiers could not be better timed. As Western forces wage war against terrorists and their supporters, in actions large and small, on several continents, *The New Face of War* explains how they fight and how they will win or lose. There are four key dynamics to the new warfare: asymmetric threats, in which even the strongest armies may suffer from at least one Achilles' heel; information-technology competition, in which advantages in computers and communications are crucial; the race of decision cycles, in which the first opponent to process and react to information effectively is almost certain to win; and network organization, in which fluid arrays of combat forces can spontaneously organize in multiple ways to fight any given opponent at any time. America's use of networked, elite ground forces, in combination with precision-guided bombing from manned and unmanned flyers, turned Afghanistan from a Soviet graveyard into a lopsided field of American victory. Yet we are not invulnerable, and the same technology that we used in Kuwait in 1991 is now available to anyone with a credit card and access to the Internet. Al Qaeda is adept in the new model of war, and has searched long and hard for weaknesses in our defenses. Will we be able to stay ahead of its thinking? In Iraq, Saddam's army is in no position to defeat its enemies -- but could it defend Baghdad? As the world anxiously considers these and other questions of modern war, Bruce Berkowitz offers many answers and a framework for understanding combat that will never again resemble the days of massive marches on fortress-like positions. *The New Face of War* is a crucial guidebook for reading the headlines from across our troubled planet.

Special Forces and Missions W. Dale Brown, Marion Ferguson Briggs, 2004 Few individuals combine the native intelligence, stamina, self-confidence, and resourcefulness necessary for work that special forces are sent to do. If there is a single trait that characterises these modern warriors, it is a ferociously assertive can-do attitude, a belief in their own invincibility. It shines through whether they are asked to help whip a friendly army into shape or to kill the enemy, unhesitatingly, with almost unimaginable violence, often in face-to-face encounters. Every major power and many lesser ones have assembled forces with special-operations skills. This book looks at the operations and skills of the special forces of each country.

The Last Battle Stephen Harding,2013-05-07 The incredible story of the unlikely battle of World War II, when a small group of American soldiers joined forces with German soldiers to fight off fanatical SS troops May, 1945. Hitler is dead, the Third Reich is little more than smoking rubble, and no GI wants to be the last man killed in action against the Nazis. The Last Battle tells the nearly unbelievable story of the unlikely battle of the war, when a small group of American tankers, led by Captain Lee, joined forces with German soldiers to fight off fanatical SS troops seeking to capture Castle Itter and execute the stronghold's VIP prisoners. It is a tale of unlikely allies, startling bravery, jittery suspense, and desperate combat between implacable enemies.

Special Forces Berlin James Stejskal,2017-02-15 The previously untold story of a Cold War spy unit, "one of the best examples of applied unconventional warfare in special operations history" (Small Wars Journal). It is a little-known fact that during the Cold War, two US Army Special Forces detachments were stationed far behind the Iron Curtain in West Berlin. The existence and missions of the two detachments were highly classified secrets. The massive armies of the Soviet Union and its Warsaw Pact allies posed a huge threat to the nations of Western Europe. US military planners decided they needed a plan to slow the expected juggernaut, if and when a war began. This plan was Special Forces Berlin. Their mission—should hostilities commence—was to wreak havoc behind enemy lines and buy time for vastly outnumbered NATO forces to conduct a breakout from the city. In reality, it was an ambitious and extremely dangerous mission, even suicidal. Highly trained and fluent in German, each of these one hundred soldiers and their successors was allocated a specific area. They were skilled in clandestine operations, sabotage, and intelligence tradecraft, and were able to act, if necessary, as independent operators, blending into the local population and working unseen in a city awash with spies looking for information on their every move. Special Forces Berlin left a legacy of a new type of soldier, expert in unconventional warfare, that was sought after for other deployments, including the attempted rescue of American hostages from Tehran in 1979. With the US government officially acknowledging their existence in 2014, their incredible story can now be told—by one of their own.
