The Cars That Henry Ford Built Beverly Rae Kimes,2005-08-21 At the time, in 1978, when *The Cars That Henry Ford Built* was first published, sending a copy for Henry Ford II to review seemed a vain request·Automobile Quarterly founding editor and publisher L. Scott Bailey was told that Mr. Ford (never comments on a book written about Ford.÷ Two weeks later came an unexpected exhortation from Henry Ford II: (My grandfather would have loved this book.÷ Ford then specially ordered 20 copies bound in white leather·needed in two weeks. The rush order was necessitated by an upcoming trip to Japan. As is culturally customary to offer a gift that honors one's ancestors, Henry Ford II specifically chose *The Cars That Henry Ford Built* to give to his Japanese hosts. Such high-level praise is derived from the book's fresh approach to the subject of Henry Ford, both in its study of the man and his cars, as well as the exceptional pictorial presentation. Presented for the first time in full color, there is every model Henry Ford produced from the Quadricycle he put together as a young man in 1896 to the famous V8 Ford on the production lines four and a half

decades later during his failing years. Probably no other individual in automobile history more accurately mirrored in his cars his view of himself and of America as he saw it. Join award-winning historian and author Beverly Rae Kimes as she presents lively historical text that captures Henry growing and aging as his cars grew and aged, each lock-stepped together through history. Over 100 full-color photographs further bring the man and his creations to life.

Kar-Kraft Charlie Henry, 2017-06-15 The story of Kar-Kraft began, as did many others in the automotive industry, with an axe to grind. In 1963, Ford was seriously interested in

purchasing Ferrari. Ferrari was a legendary brand with considerable success in racing, and Ford saw the acquisition as a great way to be instantly successful in the racing arena. When Enzo Ferrari realized that Ford would not give him complete control of the racing program, he backed out of the deal late in the process. Ford had spent millions in vetting and audits, which then set in motion a vengeful response against Ferrari. The result was the unthinkable: Ford beat Ferrari at Le Mans. Ford wanted to become competitive quickly, but it did not have the race history or resources in house. To remedy the situation, Ford searched the U.K. for an independent company to help accelerate its race car development. It first settled on Lola Cars and set up Ford Advanced Vehicles. Later, Ford brought its LeMans effort to the U.S. and the Kar-Kraft relationship was established. Although Kar-Kraft was technically an independent company, it really only had one customer: Ford Special Vehicles. Kar-Kraft's story doesn't begin and end with the GT 40 that took the win away from Ferrari at Le Mans. Ford expanded upon the program and organized an all-out assault on racing in general. Cars were prepared for Trans-Am, NASCAR, NHRA, and Can-Am competition. Street versions of the Boss 429 were assembled under its roof. And fabled prototypes including the LID Mustang, Boss 302 Maverick, and Mach 2C were all assembled in Ford's contracted race shop. And then, out of the blue, its doors closed for good on a cold day in 1970. History tells us that Ford won Le Mans, the Daytona 500, and the Trans-Am championship. But it doesn't tell us how this was accomplished. Author Charlie Henry (a former Kar-Kraft employee) has enlisted the help of many of his former co-workers to bring you the very first book ever published on Ford's all-encompassing special projects facility, Kar-Kraft. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

It is full of anecdotes from owners, dealers and Ford executives complete with a comprehensive bibliography based on authentic period material from the Ford Motor Company. The Ford GT SAE International,2004-03-08 In the 1960's very little science and

engineering had been applied to the art of motor racing. As a result, there was no general agreement about the best technical approach to generating speed on a road racing track. Each car maker viewed the problem through the lenses of their own history and capabilities. The cars on the starting grid demonstrated how varied these histories were. When Ford first assaulted Le Mans in 1964, the company followed a similarly casual approach by initially purchasing a race car design from the English firm Lola. This car's numerous shortcomings soon led Ford to apply its considerable engineering and developmental resources to the project, and the result was the one-two-three finish in 1966. First place finishes followed in 1967, 1968 and 1969. It is the fabulous victories by Ford in the 1960's that inspired the new 2005 Ford GT. Based on a concept car the new production car embodies the characteristic proportions and styling elements of the original GT. Under its skin, however, it has little in common with the original other than its mid-engine layout. The 2005 Ford GT must function as a street car, with a climate control system, moderate interior noise levels, a reasonable ride, and the ability to operate in extremes of hot and cold. The seven original SAE papers from the 1960's contained in this book provide a wonderful insight into the development of the original Ford GT, during what many consider to be the technically most interesting period of sports car racing. The 11 SAE papers about the new GT included in this volume explain how Ford engineers managed to meet numerous modern-day requirements while staying true to the spirit of the original.

Ford Tough Patrick R. Foster, 2017-06 Ford Tough: 100 Years of Ford Trucks tells the entire Ford truck story from the very beginning, when Ford got its start in truck production.
