Simple & Easy Forex Trading Strategies Josef Fluse, 2017-09-21 I have seen brand new Forex investors and traders around the world waste a serious amount of valuable education and training time on learning information that will not do them any good and can even cause them to lose some of their hard earned money right away in the live markets. No one wants that however it is a huge mistake that virtually all brand new Forex traders make because they don't know any better, after reading this book you will. I don't care where you trade from or what you trade, Dubai to Detroit or Mumbai to Manhattan doesn't matter because a chart is a chart and supply and demand is supply and demand, period, live markets don't work any other way no matter where in the world you are or what your trading even camels or goats. New Forex traders all around the world spend waaaaay too much time on looking for the magical combination of indicators, settings and colors they think will show them something that is going to help them make more money. There are no shortcuts or bells that go ding to tell you to enter the right position so stop looking right now and if you are using something like that and you're losing money that is why. All you need to see is right in front of you on the price chart and that is price and time. Those are the only things that professional Forex traders care about and nothing else. You can certainly use your chart like a crystal ball to tell you where price will go with a high degree of certainty. When you are done reading this book you will have an excellent basic explanation of what and what not to

do before you even study anything or do any kind of education. The information in this book will put you on the fast track to becoming a successful self-directed Forex investor and trader no matter where you trade from in the world or what you trade with very little money invested. This book gives you the brutal and harsh truth of what happens in real life, in real time and in real money in the world's live markets every day. There are no short cuts and you must do the time if you want to drive your own money train to the bank.

Day Trading IS Day Gambling Mar Ketmaker, 2017-01-18 It is huge step when you make the decision to become a day trader. Most brand new self-directed traders are getting into this business because they think they can make quick money and become rich beyond their dreams. While that may be true, it is not as easy as one thinks and certainly will not happen as soon as one thinks. There are only two groups of people who are doing business in the markets, the professionals and the retail investors and traders. New traders have no idea they are entering a business where there are people in the live market who will walk over dead bodies to make money. They are entering a business where the smart money in the business are looking to drain your trading capital account on a daily basis and most of the time they do because new people come into the business unprepared or at best under prepared as well as underfunded and have not developed a trading edge before they enter the market with real money. New self-directed traders prefer smaller time frames because that is what they are conditioned to think is the best way to trade. Just remember, the lower you go in time frame the more you are actually dramatically increasing your risk because you end up trading nothing but noise. Why would you want to do that, increase your risk? This book is the most brutal book about day trading a beginner will ever read and has information that professional traders don't want you to know about because brand new self-directed traders just entering the business are who the professionals make all of their money from. This book is meant to be encouraging and deterring at the same time for the brand new trader who is wandering wide eyed into the shark tank called the financial market and hopefully once you have read the entire book you will be frightened enough to rethink your day trading game plan for making money.

started. Best Tips for High Profit Day Trading is for beginners and will detail many of the things that a brand new trader must learn not to do before they can become consistently profitable in the live markets. You're heard the saying "just say no to drugs", just say no to day trading and you and your account will be waaaaay ahead of the game to start off. Don't say I didn't warn you, OK, continue with your insanity and read this entire book to give yourself a fighting chance. Many of the things I tell brand new investors and traders in all my books may sound like I am a broken record and some things you read may sound repetitive. I do that for a specific reason because much of what trading is about is doing those same actions over and over again repetitively to make money the same way every day. It is the only way professional traders do it and how they develop their edge to win in the live markets against the best market participants in the world. Trading is challenging for most people because they simply don't have tools or confidence to successful. Best Tips for High Profit Day Trading is important for beginners because it tells it like it is and gives an inside look at the markets, giving you the reality on what the market is really like, the way they are really run and tells you who runs them. My hope from Best Tips for High Profit Day Trading is that you understand how important it is to have a competitive edge when putting your hard earned money at risk in the markets. Each day, the wealth from trader accounts is transferred from those without an edge into the accounts of those who have developed that all needed important winning edge. Which one do you want to be? When you are done reading Best Tips for High Profit Day Trading you will have an excellent basic explanation of what and what not to do before you even study anything or do any kind of education. The information in Best Tips for High Profit Day Trading will put you on the fast track to becoming a successful self-directed supply and demand investor and trader.
