**Rapid Clinical Pharmacology** Andrew Batchelder, Charlene Rodrigues, Ziad Alrifai, 2011-09-13 This pocket reference guide is a must for all medical students and junior doctors preparing for exams in pharmacology or needing a rapid reminder during a clinical attachment. In light of the growing pressures on those who prescribe drugs to patients, increasing emphasis has been placed on the importance of pharmacology in the undergraduate medical curriculum. Rapid Clinical Pharmacology, with its concise, easy-to-use approach, offers an appealing format for students to use in both clinical practice and exam preparation and its 'one-page per drug/class' layout easily facilitates the generation of a personal student formulary. Each chapter of the book mirrors each section of the BNF to allow easy cross-referencing and then each chapter is divided into consistent sections as per other books in the Rapid series. Rapid Clinical Pharmacology will also be available as a mobile application for iPhone, iPod Touch, iPad and Blackberry. See [wiley.com/go/mededapps](http://wiley.com/go/mededapps) for further details.

**Neonatal Formulary** Sean Ainsworth,2020-03-13 Neonatal Formulary provides comprehensive guidance on the safe use of the drugs prescribed during pregnancy and commonly given to babies during labour and delivery, as well as during lactation and the first year of life. Treating the journey from pregnancy to parenthood as a continuous event, the new edition contains updated information on how the drugs affect both mother and baby. The first part of the book focuses on drug storage, drug licensing, and drug prescribing. In addition, it explains to why the metabolism of drugs differs in premature and sick infants, and why the practice of extrapolating doses from adult studies is unsafe. Patient safety, excipients, and therapies that affect drugs are also covered. Part 2 consists of monographs for over 250 drugs that may find use in the neonatal unit, and possibly outside it. Each monograph is divided into sections covering use, pharmacology, treatment, drug interactions or other administration, information, supply and administration, and references. The monographs are evidence-based and include links to the Cochrane Database of Systematic Reviews, and national guidelines. The third part presents information on additional drugs, and groups of drugs, that are often taken by mothers during pregnancy, labour, or during breast feeding. The drugs discussed in this section all affect the foetus or infant. Containing far more detail than is available in the British National Formulary for Children, and with additional online material featuring updates related to specific drugs and dosing, Neonatal Formulary is an essential guide for neonatologists, neonatal nurses, hospital pharmacists, obstetric staff, advanced nurse practitioners and for all health care professionals caring for pregnant women and their infants in the first year of life.
