**Statement Respecting the Earl of Selkirk's Settlement Upon the Red River, in North America** John Halkett,1817

**Poems of William Cowper. Edited by J. S. Memes. New edition** William Cowper,1817

*Earl of Selkirk's Settlement* John Halkett,2006-03 In 1811, on land he received as a grant from the Hudson Bay Company in what is now Manitoba, the Earl of Selkirk established the Red River Colony. The colony met with conflict from the very beginning and was dispersed in 1815. The following year Selkirk arrived from Scotland to supervise. Selkirk became embroiled in litigation with the North West Company and the Canadian government, Selkirk believing that the whole affair was a conspiracy against him and the Hudson Bay Company. He also believed the British government was trying to restrict emigration to Canada to support the economy. This book was published as evidence of Selkirk's thwarted intentions to create a land of opportunity and, further, to clear his good name.

**Breaking the Fortress Line 1914** Clayton Donnell,2013-10-17 Breaking the Fortress Line 1914 offers a fascinating new perspective on the German offensive against France and Belgium in 1914. In graphic detail it describes the intense fighting that took place around the forts and fortified cities that stood in the path of the German invasion. The ordeal began with the German assault on the mighty fortress of Liège. They took twelve days to batter their way through the 'Gateway to Belgium', losing thousands of men in repeated frontal assaults, and they had to bring up the heaviest siege artillery ever used to destroy the defences.??This is the epic struggle that Clayton Donnell depicts in this compelling account of a neglected aspect of the battles that followed the outbreak of the Great War. Not only does he reconstruct the German attack on the strongpoints they encountered along the entire invasion line, but he traces the history and design of these fixed defences and analyses the massive military building programmes undertaken by the French, the Germans and the Belgians between 1871 and 1914.??Thousands of huge forts, infantry strongpoints, bunkers, casemates and shelters were dug out along the French and German borders. The German Moselstellung and Steinbruch-stellung were born. These massive concrete fortress systems with steel gun turrets and diesel motors to generate electricity were a completely new concept of fortress design.??As war approached, France and Germany devised plans to overcome each other's powerful armies and these border defences. The French plan avoided contact with the German fortress system. But the Kaiser's army faced twelve forts at Liège, nine more at Namur, and then the strongpoints of the first and second Séré de Rivières lines. Clayton Donnell provides a gripping narrative of the violent confrontation that followed.

**Focus on Fortifications** Rune Frederiksen,Mike Schnelle,Silke Muth,Peter Schneider,2016-05-31 With a collection of 57 articles in English, French and German, presenting the most recent research on ancient fortifications, this book is the most substantial publication ever to have issued on the topic for many years. While fortifications of the ancient cultures of the middle east and ancient Greek and Roman worlds were noticed by travelers and scholars from the very beginning of research on antiquity from the late 18th century onwards, the architectural, economic, logistical, political, urban and other social aspects of fortifications have been somewhat overlooked and underestimated by scholarship in the 20th century. The book presents the research of a new generation of scholars who have been analyzing those aspects of fortifications, many of them with years of experience in fieldwork on city walls. Much new evidence and a fresh look at this important category of built structure is now made available, and the publication will be of interest not only to the field of ancient architecture, but also to other sub-disciplines of archaeology and ancient history. The papers were presented at a conference in Athens in December 2012, and they all present material and discuss topics under seven headings that represent the most central themes in the study of fortification in antiquity: the origins of fortification, physical surroundings and building technique, function and semantics, historical context, the fortification of regions and regionally confined phenomena, the fortifications of Athens and new field research. The book is Volume 2 in the new series Fokus Fortifikation Studies, created by the German based international research network Fokus Fortifikation. The topics included have been identified by the network over many previous conferences and workshops as being the most important and as needing research and discussion beyond the network members. Volume 1 in the series, Ancient Fortifications: a compendium of theory and practice (Oxbow Books) will also appear in 2015 and together the two volumes bring the field of fortification studies up-to-date and will be an essential resource for many years to come.

*Fortifications of the Western Front 1914-18* Paddy Griffith,2013-08-20 Following the early battles of 1914 along the Marne and in the Ypres salient, World War I rapidly changed from a war of movement into one of attrition, with the opposing sides entrenching themselves in a line of fortified positions from the Flanders coastline to the Swiss border. This volume details the different styles of fortification used on the Western Front throughout the course of the war, from the early ditches of 1914 to the complicated systems of 1918. It explains the development of the 'defence in depth' German system and the British reaction to it, as well as illustrating the importance of the pre-war forts, particularly around Verdun.

*American Revolution [5 volumes]* Spencer C. Tucker,2018-09-14 With more than 1,300 cross-referenced entries covering every aspect of the American Revolution, this definitive scholarly reference covers the causes, course, and consequences of the war and the political, social, and military origins of the nation. This authoritative and complete encyclopedia covers not only the eight years of the American Revolutionary War (1775-1783) but also the decades leading up to the war, beginning with the French and Indian War, and the aftermath of the conflict, with an emphasis on the early American Republic. Volumes one through four contain a series of overview essays on the causes, course, and consequences of the American Revolution, followed by impeccably researched A-Z entries that address the full spectrum of political, social, and military matters that arose from the conflict. Each entry is cross-referenced to other entries and also lists books for further reading. In addition, there is a detailed bibliography, timeline, and glossary. A fifth volume is devoted to primary sources, each of which is accompanied by an insightful introduction that places the document in its proper historical context. The primary sources help readers to understand the myriad motivations behind the American Revolution; the diplomatic, military, and political maneuvering that took place during the conflict; and landmark documents that shaped the founding and early development of the United States.

*Libraries as Places: Buildings for the 21st century* Marie-Françoise Bisbrouck, Jérémie Desjardins, Céline Ménil, Florence Poncé, François Rouyer-Gayette, 2004-01-01 This book contains the proceedings of the 13th seminar of IFLA's Library Buildings and Equipment Section, which was co-organized with IFLA's Public Libraries Section this time. The event took place as one of the satellite meetings of the World Library and Information Congress 2003 in Berlin, and was held in Paris at the end of July 2003. Seminars like this have been held every two years (The Hague 1997, Shanghai 1999, Boston 2001) to allow architects and librarians to share experiences in the field of library planning and the building process. The goals of this seminar were to explore the issues affecting the future development of library space, and to help prepare to envision innovative library spaces that are responsive to user needs and community interests. This compilation of 12 papers given at the Paris seminar includes a huge amount of information regarding the state of the art in library building.
