Atlas of Lacrimal Drainage Disorders Mohammad Javed Ali,

Tracking the Deep Biosphere through Time Henrik Drake,Magnus Ivarsson,2021-01-29 Deep biosphere research is at the scientific frontier of bio- and geo-related sciences, yet it is largely underexplored. In terms of volume, deep subsurface settings represent some of the largest microbial

habitats on the planet, and the combined biomass of the deep biosphere encompasses the largest living reservoir of carbon, excluding land plants. However, the paleo-record of the deep biosphere is still largely uncharted and neglected. The aim of this book is to highlight current research on deep life through time and bring together researchers with various perspectives. The book presents a collection of scientific contributions that provide a sample of forefront research in this field. The contributions involve a range of case studies of deep ancient life in continental and oceanic settings, of microbial diversity in sub-seafloor environments, and of the isolation of calcifying bacteria, as well as reviews on clay mineralization of fungal biofilms and on the carbon isotope records of the deep biosphere. Deciphering the fossil record of the deep biosphere is a challenging task but, when successful, will unlock doors to life's cryptic past.

Constituent Power Beyond the State Geneviève Nootens, 2021-12-30 The concept of constituent power plays a major part in modern political and legal theory— in how we think about the political. This book tackles the twofold issue of public authority and public autonomy in the modern conception of the political by analysing the notion of constituent power, its function in the modern political apparatus, and debates about its meaning and function in our own context. Focusing on contemporary debates on constitutionalism beyond the state, Geneviève Nootens assesses the prospects for recasting the notion of constituent power in a polycentric setting that challenges state sovereignty as embodying the autonomy of the political. She argues that constituent power belongs with the conceptual apparatus of a theory of government peculiar to a statist way of knowing, and being into, the world, and that it is too much dependent upon the statist framework for it to have critical purchase on the new mappings of public authority. Nootens stresses the critical need to frame public authority appropriately if we are to conceptualize a conception of collective

political agency that can sustain public autonomy in the current era. Constituent Power Beyond the State will be of interest to students and scholars of political theory, democratic theory, law, and constitutionalism.
