Eliminate Your Competition Sean O'Shaughnessey, 2018-05-14 Most salespeople lose the deal before they ever get started! It isn't uncommon for the customer to have already made a decision before most salespeople even learn of the opportunity. Most salespeople have to beat the preferred competitor by a significant margin just to be considered equivalent. Don't you wish that you could be the preferred vendor in all of your opportunities? Selling is a difficult career in which to make a living; it is not uncommon to have the commission check denied before the salesperson even gets a chance to win. Analysis of thousands of sales situations has made it phenomenally obvious that most salespeople begin their sales campaign so late in the decision-making process that they are virtually guaranteed to lose the order. To make matters worse, when they do start the campaign early enough, most salespeople do not know how to control the prospect adequately so that they can guarantee their victory. Typical turnover for a sales department is 10-20%. Many companies see turnover that approaches 40-60%! This turnover costs them 50% of their revenue-generating capability. In any organization that exceeds 25% turnover, the loss of trust with the customer can be astounding as the new salesperson tries to rebuild the entire relationship. In any given quarter dozens or hundreds of companies do not make their forecasted numbers and are dramatically punished by Wall Street. This book will provide the management of a company with a framework to teach their salespeople how to attain their quotas with higher profits. It will also allow salespeople to rise to the top of their organization and be the super-achievers who win awards, trips, bonuses, and respect. In this book, I will show you how to eliminate your competition and maximize your commission.

Transportation Decision Making Kumares C. Sinha, Samuel Labi, 2011-09-09 This pioneering text provides a holistic approach to decisionmaking in transportation project development and programming, which can help transportation professionals to optimize their investment choices. The authors present a proven set of methodologies for evaluating transportation projects that ensures that all costs and impacts are taken into consideration. The text's logical organization gets readers started with a solid foundation in basic principles and then progressively builds on that foundation. Topics covered include: Developing performance measures for evaluation, estimating travel demand, and costing transportation projects Performing an economic efficiency evaluation that accounts for such factors as travel time, safety, and vehicle operating costs Evaluating a project's impact on economic development and land use as well as its impact on society and culture Assessing a project's environmental impact, including air quality, noise, ecology, water resources, and aesthetics Evaluating alternative projects on the basis of multiple performance criteria Programming transportation investments so that resources can be optimally allocated to meet facility-specific and system-wide goals Each chapter begins with basic definitions and concepts followed by a methodology for impact assessment. Relevant legislation is discussed and available software for performing evaluations is presented. At the end of each chapter, readers are provided resources for detailed investigation of particular topics. These include Internet sites and publications of international and domestic agencies and research institutions. The authors also provide a companion Web site that offers updates, data for analysis, and case histories of project evaluation and decisionmaking. Given that billions of dollars are spent each year on transportation systems in the United States alone, and that there is a need for thorough and rational evaluation and decision making for cost-effective system preservation and improvement, this text should be on the desks of all transportation planners, engineers, and educators. With exercises in every chapter, this text is an ideal coursebook for the subject of transportation systems analysis and evaluation.

Gender and Diversity: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2018-08-03 Today, gender inequality and diversity are at the forefront of discussion, as the issue has become an international concern for politicians, government agencies, social activists, and the general public. Consequently, the need to foster and sustain diversity and inclusiveness in the interactions among various groups of people is relevant today more than ever. Gender and Diversity: Concepts, Methodologies, Tools, and Applications provides a critical look at gender and modern-day discrimination and solutions to creating sustainable diversity across numerous contexts and fields. Highlighting a range of topics such as anti-discrimination measures, workforce diversity, and gender inequality, this multi-volume book is designed for legislators and policy makers, practitioners, academicians, gender studies researchers, and graduate-level students interested in all aspects of gender and diversity studies.

Strategic Modelling and Business Dynamics John D. W. Morecroft, 2015-05-27 Insightful modelling of dynamic systems for better business strategy The business environment is constantly changing and organisations need the ability to rehearse alternative futures. By mimicking the interlocking operations of firms and industries, modelling serves as a 'dry run' for testing ideas, anticipating consequences, avoiding strategic pitfalls and improving future performance. Strategic Modelling and Business Dynamics is an essential guide to credible models; helping you to understand modelling as a creative process for distilling and communicating those factors that drive business success and sustainability. Written by an internationally regarded authority, the book covers all stages of model building, from conceptual to analytical. The book demonstrates a range of in-depth practical examples that vividly illustrate important or puzzling dynamics in firm operations, strategy, public policy, and everyday life. This updated new edition also offers a rich Learners' website with models, articles and videos, as well as a separate Instructors' website resource, with lecture slides and other course materials (see Related Websites/Extra section below). Together the book and websites deliver a powerful package of blended learning materials that: Introduce the system dynamics approach of modelling strategic problems in business and society Include industry examples and public sector applications with interactive simulators and contemporary visual modelling software Provide the latest state-of-the-art thinking, concepts and techniques for systems modelling The comprehensive Learners' website features models, microworlds, journal articles and videos. Easy-to-use simulators enable readers to experience dynamic complexity in business and society. Like would-be CEOs, readers can re-design operations and then re-simulate in the quest for well-coordinated strategy and better performance. The simulators include a baffling hotel shower, a start-up low-cost airline, an international radio broadcaster, a diversifying tyre maker, commercial fisheries and the global oil industry. Much more than an introduction, John Morecroft's Strategic Modelling and Business Dynamics uses interactive 'mini-simulators and microworlds' to create an engaging and effective learning environment in which readers, whatever their background, can develop their intuition about complex dynamic systems. John Sterman, Jay W. Forrester Professor of Management, MIT Sloan School of Management Illustrated by examples from everyday life, business and policy, John Morecroft expertly demonstrates how systems thinking aided by system dynamics can improve our understanding of the world around us. Stewart Robinson, Associate Dean Research, President of the Operational Research Society, Professor of Management Science, School of Business and Economics, Loughborough University

Consuming Cities Nicholas Low, 2000 This book is about cities as engines of consumption of the world's environment. It examines these issues through the impact of the Rio Declaration and assesses the extent to which it has made a difference.

Migration and Hybrid Political Regimes Rustamjon Urinboyev, 2020-12-01 A free open access ebook is available upon publication. Learn more at www.luminosoa.org. While migration has become an all-important topic of discussion around the globe, mainstream literature on migrants' legal adaptation and integration has focused on case studies of immigrant communities in Western-

style democracies. We know relatively little about how migrants adapt to a new legal environment in the ever-growing hybrid political regimes that are neither clearly democratic nor conventionally authoritarian. This book takes up the case of Russia—an archetypal hybrid political regime and the third largest recipients of migrants worldwide—and investigates how Central Asian migrant workers produce new forms of informal governance and legal order. Migrants use the opportunities provided by a weak rule-of-law and a corrupt political system to navigate the repressive legal landscape and to negotiate—using informal channels—access to employment and other opportunities that are hard to obtain through the official legal framework of their host country. This lively ethnography presents new theoretical perspectives for studying immigrant legal incorporation in similar political contexts.

Recodings Hal Foster,1999 A Village Voice Best Book and a 'lucid and provocative work that allows us to glimpse stirrings and upheavals in the hothouse of modern art.' - Los Angeles Times

Postmodern Culture Hal Foster,1985 In all the arts a war is being waged between modernists and postmodernists. Radicals have tended to side with the modernists against the forces of conservatism. Postmodern Culture is a break with this tendency. Its contributors propose a postmodernism of resistance - an aesthetic that rejects hierarchy and celebrates diversity. Ranging from architecture, sculpture and painting to music, photography and film, this collection is now recognised as a seminal text on the postmodernism debate. The essays are by Hal Foster, Jürgen Habermas, Kenneth Frampton, Rosalind Krauss, Douglas Crimp, Craig Owens, Gregory L. Ulmer, Fredric Jameson, Jean Baudrillard, and Edward W. Said.

Hard Core Cartels Recent progress and challenges ahead OECD,2003-05-27 This book reviews progress in the fight against hard core cartels. It quantifies the harm caused by cartels and identifies improved methods of investigation. It also examines progress in strengthening sanctions against businesses and individuals.

Sustainable Food System Assessment Alison Blay-Palmer,Damien Conaré,Ken Meter,Amanda Di Battista,Carla Johnston,2019-11-22 Sustainable Food System Assessment provides both practical and theoretical insights about the growing interest in and response to measuring food system sustainability. Bringing together research from the Global North and South, this book shares lessons learned, explores intended and actual project outcomes, and highlights points of conceptual and methodological convergence. Interest in assessing food system sustainability is growing, as evidenced by the Milan Urban Food Policy Pact and the importance food systems initiatives have taken in serving as a lever for attaining the UN Sustainable Development Goals. This book opens by looking at the conceptual considerations of food systems indicators, including the place-based dimensions of food systems indicators and how measurements are implicated in sense-making and visioning processes. Chapters in the second part cover operationalizing metrics, including the development of food systems indicator frameworks, degrees of indicator complexities, and practical constraints to assessment. The final part focuses on the outcomes of assessment projects, including impacts on food policy and communities involved, highlighting the importance of building connections between sustainable food systems initiatives. The global coverage and multi-scalar perspectives, including both conceptual and practical aspects, make this a key resource for academics and practitioners across planning, geography, urban studies, food studies, and research methods. It will also be of interest to government officials and those working within NGOs. The Open Access version of this book, available at <https://www.routledge.com/Sustainable-Food-System-Assessment-Lessons-from-Global-Practice/Blay-Palmer-Conare-Meter-Battista-Johnston/p/book/9781032083933>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Urban Crisis M. Nadarajah,Ann Tomoko Yamamoto,2007 Unprecedented urban growth makes sustainability in cities a crucial issue for policy makers, scholars and business leaders. This

emerging urban crisis challenges environment-based and economic-based approaches to sustainability, and highlights the complex and critical role that culture plays in ensuring that cities are viable for future generations. This publication assesses the use of cultural indicators as a tool for policymakers, drawing on case studies of Patan (Nepal), Penang (Malaysia), Cheongju (South Korea), and Kanazawa (Japan), and offers fresh insights into the role of culture in fostering community development, environmental awareness and balanced economic growth.
