Montaje de cuadros de control y dispositivos eléctricos y electrónicos de sistemas domótico Miguel Ángel Sánchez Hernández, El Ser Humano, desde el principio de su existencia, ha pretendido adaptar cuanto le rodea de la forma más confortable, eficiente y agradable posible. En este sentido, la domótica es la esencia de esa pretensión, de manera que la tecnología actual ha desarrollado, en los últimos años, un tejido industrial destinado exclusivamente a la automatización de viviendas y edificios. Este desarrollo conlleva la necesidad de la formación de técnicos especialistas en el conocimiento de dichas tecnologías, de su campo de aplicación, y de las técnicas de gestión, montaje, mantenimiento y planificación de instalaciones domóticas e inmóticas. El contenido de esta obra responde a la necesidad del técnico de disponer de una referencia actualizada y fiable, de contenido técnico, que abarque todos los contenidos, teóricos y prácticos, que el alumno necesita para el desarrollo formativo de esta actividad. Presumed Guilty: How the Supreme Court Empowered the Police and Subverted Civil Rights Erwin Chemerinsky, 2021-08-24 An unprecedented work of civil rights and legal history, *Presumed Guilty* reveals how the Supreme Court has enabled racist policing and sanctioned law enforcement excesses through its decisions over the last half-century. Police are nine times more likely to kill African-American men than they are other Americans—in fact, nearly one in every thousand will die at the hands, or under the knee, of an officer. As eminent constitutional scholar Erwin Chemerinsky powerfully argues, this is no accident, but the horrific result of an elaborate body of doctrines that allow the police and, crucially, the courts to presume that suspects—especially people of color—are guilty before being charged. Today in the United States, much attention is focused on the enormous problems of police violence and racism in law enforcement. Too often, though, that attention fails to place the blame where it most belongs, on the courts, and specifically, on the Supreme Court. A “smoking gun” of civil rights research, *Presumed Guilty* presents a groundbreaking, decades-long history of judicial failure in America, revealing how the Supreme Court has enabled racist practices, including profiling and intimidation, and legitimated gross law

enforcement excesses that disproportionately affect people of color. For the greater part of its existence, Chemerinsky shows, deference to and empowerment of the police have been the *modi operandi* of the Supreme Court. From its conception in the late eighteenth century until the Warren Court in 1953, the Supreme Court rarely ruled against the police, and then only when police conduct was truly shocking. Animating seminal cases and justices from the Court's history, Chemerinsky—who has himself litigated cases dealing with police misconduct for decades—shows how the Court has time and again refused to impose constitutional checks on police, all the while deliberately gutting remedies Americans might use to challenge police misconduct. Finally, in an unprecedented series of landmark rulings in the mid-1950s and 1960s, the pro-defendant Warren Court imposed significant constitutional limits on policing. Yet as Chemerinsky demonstrates, the Warren Court was but a brief historical aberration, a fleeting liberal era that ultimately concluded with Nixon's presidency and the ascendancy of conservative and "originalist" justices, whose rulings—in *Terry v. Ohio* (1968), *City of Los Angeles v. Lyons* (1983), and *Whren v. United States* (1996), among other cases—have sanctioned stop-and-frisks, limited suits to reform police departments, and even abetted the use of lethal chokeholds. Written with a lawyer's knowledge and experience, *Presumed Guilty* definitively proves that an approach to policing that continues to exalt "Dirty Harry" can be transformed only by a robust court system committed to civil rights. In the tradition of Richard Rothstein's *The Color of Law*, *Presumed Guilty* is a necessary intervention into the roiling national debates over racial inequality and reform, creating a history where none was before—and promising to transform our understanding of the systems that enable police brutality.

Stars in My Pocket Like Grains of Sand Samuel R. Delany, 2014-01-07 In this far-future classic, sexual attraction is a science, gender is a whole new construct, and information is both precious and perilous . . . With a burst of radiation to the brain, an angry young man is transformed into a dim-witted slave—suitable only for the most brutal work. But the tragedy of Rat Korga is the prologue to the story of Marq Dyeth, an "industrial diplomat," who travels from world to world in this exciting, sprawling future, solving problems that come with the spread of "General Information." The greatest fear in this future is Cultural Fugue, a critical mass of shared knowledge that can destroy life over the surface of an entire world in hours. In this dizzyingly original novel, information is perilous, but without it a human is only a rat in a cage. Campbell Award winner Jo Walton described this science fiction landmark as being "like pop rocks for the brain. . . . Things sparkle and explode all over, and it's not entirely comfortable but it is quite wonderful." This classic read predicted the Internet and is packed with themes that still resonate today. This ebook features an illustrated biography of Samuel R. Delany including rare images from his early career.

The Enchantress of Florence Salman Rushdie, 2009-02-24 A tall, yellow-haired young European traveller calling himself "Mogor dell'Amore," the Mughal of Love, arrives at the court of the real Grand Mughal, the Emperor Akbar, with a tale to tell that begins to obsess the whole imperial capital. The stranger claims to be the child of a lost Mughal princess, the youngest sister of Akbar's grandfather Babar: Qara K  z, 'Lady Black Eyes', a great beauty believed to possess powers of enchantment and sorcery, who is taken captive first by an Uzbek warlord, then by the Shah of Persia, and finally becomes the lover of a certain Argalia, a Florentine soldier of fortune, commander of the armies of the Ottoman Sultan. When Argalia returns home with his Mughal mistress the city is mesmerised by her presence, and much trouble ensues. The Enchantress of Florence is a love story and a mystery – the story of a woman attempting to command her own destiny in a man's world. It brings together two cities that barely know each other – the hedonistic Mughal capital, in which the brilliant emperor wrestles daily with questions of belief, desire and the treachery of sons, and the equally sensual Florentine world of powerful courtesans, humanist philosophy and inhuman torture, where Argalia's boyhood friend 'il Machia' – Niccol   Machiavelli – is learning, the hard way, about the true brutality of power. These two worlds, so far apart, turn out to be uncannily alike, and the enchantments of women hold sway over them both. But is Mogor's story true? And if so, then what happened to the lost princess? And if he's a liar, must he die?
