Defending the American Way of Life Kevin B. Witherspoon, 2018-12-01 The Cold War was fought in every corner of society, including in the sport and entertainment industries. Recognizing the importance of culture in the battle for hearts and minds, the United States, like the Soviet Union, attempted to win the favor of citizens in nonaligned states through the soft power of sport. Athletes became de facto ambassadors of US interests, their wins and losses serving as emblems of broader efforts to shield American culture—both at home and abroad—against communism. In *Defending the American Way of Life*, leading sport historians present new perspectives on high-profile issues in this era of sport history alongside research drawn from previously untapped archival sources to highlight the ways that sports influenced and were influenced by Cold War politics. Surveying the significance of sports in Cold War America through lenses of race, gender, diplomacy, cultural infiltration, anti-communist hysteria, doping, state intervention, and more, this collection illustrates how this conflict remains relevant to US sporting institutions, organizations, and ideologies today.

Coping with Crisis: The Resilience and Vulnerability of Pre-Industrial Settlements Daniel R. Curtis, 2016-05-13 Why in the pre-industrial period were some settlements resilient and stable over the long term while other settlements were vulnerable to crisis? Indeed, what made certain human habitations more prone to decline or even total collapse, than others? All pre-industrial societies had to face certain challenges: exogenous environmental hazards such as earthquakes or plagues, economic or political hazards from 'outside' such as warfare or expropriation of property, or hazards of their own-making such as soil erosion or subsistence crises. How then can we explain why some societies were able to overcome or negate these problems, while other societies proved susceptible to failure, as settlements contracted, stagnated, were abandoned, or even disappeared entirely? This book has been stimulated by the questions and hypotheses put forward by a recent 'disaster studies' literature - in particular, by placing the intrinsic arrangement of societies at the forefront of the explanatory framework. Essentially it is suggested that the resilience or vulnerability of habitation has less to do with exogenous crises themselves, but on endogenous societal responses which dictate: (a) the extent of destruction caused by crises and the capacity for society to protect itself; and (b) the capacity to create a sufficient recovery. By empirically testing the explanatory framework on a number of societies between the Middle Ages and the nineteenth century in England, the Low Countries, and Italy, it is ultimately argued in this book that rather than the protective functions of the state or the market, or the implementation of technological innovation or capital investment, the most resilient human habitations in the pre-industrial period were those that displayed an equitable distribution of property and a well-balanced distribution of power between social interest groups. Equitable distributions of power and property were the underlying conditions in pre-industrial societies that all

Through the Day, Through the Night Jan Vansina, 2014-05-20 One of twelve children in a close-knit, affluent Catholic Belgian family, Jan Vansina began life in a seemingly sheltered environment. But that cocoon was soon pierced by the escalating tensions and violence that gripped Europe in the 1930s and 1940s. In this book Vansina recalls his boyhood and youth in Antwerp, Bruges, and the Flemish countryside as the country was rocked by waves of economic depression, fascism, competing nationalisms, and the occupation of first Axis and then Allied forces. Within the vast literature on World War II, a much smaller body of work treats the everyday experiences of civilians, particularly in smaller countries drawn into the conflict. Recalling the war in Belgium from a child's-eye perspective, Vansina describes pangs of hunger so great as to make him crave the bitter taste of cod-

liver oil. He vividly remembers the shock of seeing severely wounded men on the grounds of a field hospital, the dangers of crossing fields and swimming in ponds strafed by planes, and his family's interactions with occupying and escaping soldiers from both sides. After the war he recalls emerging numb from the cinema where he first saw the footage of the Nazi death camps, and he describes a new phase of unrest marked by looting, vigilante justice, and the country's efforts at reunification. Vansina, a historian and anthropologist best known for his insights into oral tradition and social memory, draws on his own memories and those of his siblings to reconstruct daily life in Belgium during a tumultuous era.
