*Protest Music in France* Dr Barbara Lebrun, 2013-01-28 Barbara Lebrun traces the evolution of 'protest' music in France since 1981, exploring the contradictions that emerge when artists who take their musical production and political commitment 'seriously', cross over to the mainstream, becoming profitable and consensual. Contestation is understood as a discourse shaped by the assumptions and practices of artists, producers, the media and audiences, for whom it makes sense to reject politically reactionary ideas and the dominant taste for commercial pop. Placing music in its economic, historical and ideological context, however, reveals the fragility and instability of these oppositions. The book firstly concentrates on music production in France, the relationships between independent labels, major companies and the state's cultural policies. This section provides the material background for understanding the development of rock alternatif, France's self-styled 'subversive' genre of the 1980s, and explains the specificity of a 'protest' music culture in late-twentieth-century France, in relation to the genre's tradition in the West. The second part looks at representations of a 'protest' identity in relation to discourses of national identity, focusing on two 1990s sub-genres. The first, chanson néo-réaliste, contests modernity through the use of acoustic instruments, but its nostalgic 'protest' raises questions about the artists' real engagement with the present. The second, rock métis, borrows from North African and Latino rhythms and challenges the 'neutral' Frenchness of the Republic, while advocating multiculturalism in problematic ways. A discussion of Manu Chao's career, a French artist who has achieved success abroad, also allows an exploration of the relationship between transnationalism and anti-globalization politics. Finally, the book examines the audiences of French 'protest' music and considers festivals as places of 'non-mainstream' identity negotiation. Based on first-hand interviews, this section highlights the vocabulary of emotions that audiences use to make sense of an 'alternative' performance, unveiling the contradictions that underpin their self-definition as participants in a 'protest' culture. The book contributes to debates on the cultural production of 'resistance' and the representation of post-colonial identities, uncovering the social constructedness of the discourse of 'protest' in France. It pays attention to its nation-specific character while offering a wider reflection on the fluidity of 'subversive' identities, with potential applications across a range of Western music practices.

*Free Jazz/Black Power* Philippe Carles, Jean-Louis Comolli, 2015-01-01 In 1971, French jazz critics Philippe Carles and Jean-Louis Comolli co-wrote *Free Jazz/Black Power*, a treatise on the racial and political implications of jazz and jazz criticism. It remains a testimony to the long ignored encounter of radical African American music and French left-wing criticism. Carles and Comolli set out to defend a genre vilified by jazz critics on both sides of the Atlantic by exposing the new sound's ties to African American culture, history, and the political struggle that was raging in the early 1970s. The two offered a political and cultural history of black presence in the United States to shed more light on the dubious role played by jazz criticism in racial oppression. This analysis of jazz criticism and its production is astutely self-aware. It critiques the critics, building a work of cultural studies in a time and place where the practice was virtually unknown. The authors reached radical conclusions—free jazz was a revolutionary reaction against white domination, was the musical counterpart to the Black Power movement, and was a music that demanded a similar political commitment. The impact of this book is difficult to overstate, as it made readers reconsider their response to African American music. In some cases it changed the way musicians thought about and played jazz. *Free Jazz / Black Power* remains indispensable to the study of the relation of American free jazz to European audiences, critics, and artists. This monumental critique caught the spirit of its time and also realigned that zeitgeist.

Three Kilos of Coffee Manu Dibango, 1994-10-03 In 1948, at the age of fifteen, Manu Dibango left Africa for France, bearing three kilos of coffee for his adopted family and little else. This book chronicles Manu Dibango's remarkable rise from his birth in Douala, Cameroon, to his worldwide success—with Soul Makossa in 1972—as the first African musician ever to record a top 40s hit. Composer, producer, performer, film score writer and humanitarian for the poor, Manu Dibango defines the African sound of modern world music. He has worked with and influenced such artists as Art Blakey, Don Cherry, Herbie Hancock, Harry Belafonte, Paul Simon, and Johnny Clegg. In Africa, he has helped younger musicians, performed benefit concerts, and transcribed for the first time the scores and lyrics of African musicians. The product of a mixed marriage (of different tribes and religions) who owes allegiances to both Africa and Europe, Dibango has always been aware of the ambiguities of his identity. This awareness has informed all of the important events of his life, from his marriage to a white Frenchwoman in 1957, to his creation of an Afro-music which joyfully blends blues, jazz, reggae, traditional European and African serenades, highlife, Caribbean and Arabic music. This music addresses the meaning of Africanness and what it means to be a Black artist and citizen of the world. This lively and thoughtful memoir is based on an extensive set of interviews in 1989 with French journalist Danielle Rouard. Richly illustrated with photographs, this book will be a must for readers of jazz biographies, students of African music and ethnomusicology, and all those who are lovers of Manu Dibango's unique artistry and accomplishments.

The Origins of the University Stephen C. Ferruolo, 1985-06 The University of Paris is generally regarded as the first true university, the model for others not only in France but throughout Europe, including Oxford and Cambridge. This book challenges two prevailing myths about the university's origins: first, that the university naturally developed to meet the utilitarian and professional needs of European society in the late Middle Ages, and second, that it was the product of the struggle by scholars to gain freedom and autonomy from external authorities, most notably church officials. In the twelfth century, Paris was the educational center of Europe, with a large number of schools and masters attracting and competing for students. Over the decades, the schools of Paris had many critics--monastic reformers, humanists, satirists, and moralists--and the focus of this book is the role such critics played in developing the schools into a university. Ferruolo argues that it was the educational values and ideas promoted by the critics--ideas of the unity of knowledge, the need to share learning freely and willingly, and the higher purposes and social importance of education--that first inspired the scholars of Paris to join together to form a single guild. Their programs for educational reforms can be seen in the first set of statutes promulgated for the nascent University of Paris in 1215.
