Explorations and Entanglements Hartmut Berghoff, Frank Biess, Ulrike Strasser, 2018-11-16
Traditionally, Germany has been considered a minor player in Pacific history: its presence there was more limited than that of other European nations, and whereas its European rivals established themselves as imperial forces beginning in the early modern era, Germany did not seriously pursue colonialism until the nineteenth century. Yet thanks to recent advances in the field emphasizing transoceanic networks and cultural encounters, it is now possible to develop a more nuanced understanding of the history of Germans in the Pacific. The studies gathered here offer fascinating research into German missionary, commercial, scientific, and imperial activity against the backdrop of the Pacific's overlapping cultural circuits and complex oceanic transits.

An Imperial Homeland Adam A. Blackler, 2022-08-19 At the turn of the twentieth century, depictions of the colonized world were prevalent throughout the German metropole. Tobacco advertisements catered to the erotic gaze of imperial enthusiasts with images of Ovaherero girls, and youth magazines allowed children to escape into “exotic domains” where their imaginations could wander freely. While racist beliefs framed such narratives, the abundance of colonial imaginaries nevertheless compelled German citizens and settlers to contemplate the world beyond Europe as a part of their daily lives. *An Imperial Homeland* reorients our understanding of the relationship between imperial Germany and its empire in Southwest Africa (present-day Namibia). Colonialism had an especially significant effect on shared interpretations of the *Heimat* (home/homeland) ideal, a historically elusive perception that conveyed among Germans a sense of place through national peculiarities and local landmarks. Focusing on colonial encounters that took place between 1842 and 1915, Adam A. Blackler reveals how Africans confronted foreign rule and altered German national identity. As Blackler shows, once the façade of imperial fantasy gave way to colonial reality, German metropolitans and white settlers increasingly sought to fortify their presence in Africa using juridical and physical acts of violence, culminating in the first genocide of the twentieth century. Grounded in extensive archival research, *An Imperial Homeland* enriches our understanding of German identity, allowing us to see how a distant colony with diverse ecologies, peoples, and social dynamics grew into an extension of German memory and tradition. It will be of interest to German Studies scholars, particularly those interested in colonial Africa.

Germany Examine the psyche of the Germans and discuss the psychological impact of the Second World War on the Germans Review critically not only the rise and rule of National Socialism, but also the strength of authoritarianism and militarism and the weakness of democracy in 19th Century Germany Examine the inter-relationships between social and economic change on the one hand, and political developments on the other. Analyse the significance of the Zollverein on economic growth Discuss authority and the law in the German Empire and the Weimar Republic. Analyse the contribution of German historians to 20th Century historiography Chart key events in British - German trade rivalry Include archival material from both the former East and West Germany.

Feminist Practices Dr Lori A Brown, 2013-06-28 Women continue to be extremely under-represented in the architectural profession. Despite equal numbers of male and female students entering architectural studies, there is at least 17-25% attrition of female students and not all remaining become practicing architects. In both the academic and the professional fields of architecture, positions of power and authority are almost entirely male, and as such, the profession is defined by a heterosexual, Eurasian male perspective. This book argues that it is vital for all architectural students and practitioners to be exposed to a diversity of contemporary architectural practices, as this might provide a first step into broadening awareness and transforming architectural engagement. It considers the relationships between feminist methodologies and the various approaches toward design and their impact upon our understanding and relationship to the built environment. In doing so, this collection challenges two conventional ideas: firstly, the definition of architecture and secondly, what constitutes a feminist practice. This collection of up-and-coming female architects and designers use a wide range of local and global examples of their work to question different aspects of these two conventional ideas. While focusing on feminist

perspectives, the book offers insights into many different issues, concerns and interpretations of architecture, proposing through these types of engagement, architecture can become more culturally, politically and environmentally relevant. This 'next generation' of architects claim feminism as their own and through doing so, help define what feminism means and how it is evolving in the 21st century.

Creating Germans Abroad Daniel Joseph Walther, 2002 When World War I brought an end to German colonial rule in Namibia, much of the German population stayed on. The German community, which had managed to deal with colonial administration, faced new challenges when the region became a South African mandate under the League of Nations in 1919. One of these was the issue of Germanness, which ultimately resulted in public conversations and expressions of identity. In *Creating Germans Abroad*, Daniel Walther examines this discourse and provides striking new insights into the character of the German populace in both Germany and its former colony, Southwest Africa, known today as Namibia. In addition to German colonialism, Walther considers issues of race, class, and gender and the activities of minority groups. He offers new perspectives on German cultural and national identity during the Empire, the Weimar Republic, and the Third Reich. In a larger context, *Creating Germans Abroad* acts as a model for investigating the strategies and motivations of groups and individuals engaged in national or ethnic engineering and demonstrates how unforeseen circumstances can affect the nature and outcome of these endeavors.

Weimar Publics/Weimar Subjects Kathleen Canning, Kerstin Barndt, Kristin McGuire, 2010 In

spite of having been short-lived, Weimar has never lost its fascination. Until recently the Weimar Republic's place in German history was primarily defined by its catastrophic beginning and end - Germany's defeat in 1918 and the Nazi seizure of power in 1933; its history seen mainly in terms of politics and as an arena of flawed decisions and failed compromises. However, a flourishing of interdisciplinary scholarship on Weimar political culture is uncovering arenas of conflict and change that had not been studied closely before, such as gender, body politics, masculinity, citizenship, empire and borderlands, visual culture, popular culture and consumption. This collection offers new perspectives from leading scholars in the disciplines of history, art history, film studies, and German studies on the vibrant political culture of Germany in the 1920s. From the traumatic ruptures of defeat, revolution, and collapse of the Kaiser's state, the visionaries of Weimar went on to invent a republic, calling forth new citizens and cultural innovations that shaped the republic far beyond the realms of parliaments and political parties. Kathleen Canning is Arthur F. Thurnau Professor of History, Women's Studies, and German at the University of Michigan. She is the author of *Languages of Labor and Gender: Female Factory Work in Germany, 1850-1914* (2nd ed., University of Michigan Press 2002) and *Gender History in Practice: Historical Perspectives on Bodies, Class, and Citizenship* (Cornell University Press 2006). She is currently a board member of *Central European History* and the *Journal of Modern History*. Kerstin Barndt is Associate Professor of German Studies at the University of Michigan. She is the author of *Sentiment und Sachlichkeit. Der Roman der Neuen Frau in der Weimarer Republik* (Böhlau 2004) and several articles on German modernism, gender theory, and the history of reading. Her current book project *Exhibition Time. History, Memory, and Aesthetics in Germany* focuses on contemporary exhibition culture against the backdrop of national unification, migration, and deindustrialization. Kristin McGuire is a Research

Fellow at the Institute for Research on Women and Gender at the University of Michigan and co-Director of the Global Feminisms Project based at the University of Michigan. She is the co-author of Global Feminisms through a Virtual Archive (SIGNS 2010). She is currently working on a book manuscript, Activism, Intimacy and Selfhood which offers a comparative historical analysis of women activists in Germany and Poland from 1890-1918; and co-editing a volume of translated essays entitled Women on Nietzsche, Gender, and Sexuality: An Anthology of European Women's Writings, 1880-1920.
