Digital Entertainment Superguide , Audio and video content is all around us. And these days much of it comes not from TV cables, satellite dishes, and radio antennas, but from our digital devices around the house, streaming over the Internet and local networks. And that's why we created the Digital Entertainment Superguide, a primer with everything you need to know to get started. This book walks you through how to set up your home network and choose the right hardware—set-top boxes, smart TVs, media center computers, streaming speakers, remote controls, and more—for your needs. Like to watch TV shows and movies but not sure where to find what? We've got you covered with a guide to streaming video sources for your TV or mobile devices. We don't leave music lovers out either, as we help you choose the best streaming audio service. Do you want Mog, Rdio, Rhapsody, Slacker, or Spotify? How much does each service cost? Which sounds best? We answer all those questions and more in the pages that follow. Finally, if you're wondering how to move audio and video around the house—stream music wirelessly from an iPhone to an AirPlay speaker in the living room or send video from a computer to your beautiful wall-mounted HDTV—you've come to

the right place. We'll even show you how to use your smartphone or tablet to control it all. So read on, and let the fun begin!

PC Magazine ,2007

Popular Music in a Digital Music Economy Tim J. Anderson,2013-12-17 In the late 1990s, the MP3 became the de facto standard for digital audio files and the networked computer began to claim a significant place in the lives of more and more listeners. The dovetailing of these two circumstances is the basis of a new mode of musical production and distribution where new practices emerge. This book is not a definitive statement about what the new music industry is. Rather, it is devoted to what this new industry is becoming by examining these practices as experiments, dedicated to negotiating what is replacing an object based industry oriented around the production and exchange of physical recordings. In this new economy, constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial. Finally, every element of the industry now must consider a new type of audience, the end user, and their productive and distributive capacities around which services and musicians must orient their practices and investments.
