**Handbook of Electronic Security and Digital Forensics** Hamid Jahankhani,2010 The widespread use of information and communications technology (ICT) has created a global platform for the exchange of ideas, goods and services, the benefits of which are enormous. However, it has also created boundless opportunities for fraud and deception. Cybercrime is one of the biggest growth industries around the globe, whether it is in the form of violation of company policies, fraud, hate crime, extremism, or terrorism. It is therefore paramount that the security industry raises its game to combat these threats. Today's top priority is to use computer technology to fight computer crime, as our commonwealth is protected by firewalls rather than firepower. This is an issue of global importance as new technologies have provided a world of opportunity for criminals. This book is a compilation of the collaboration between the researchers and practitioners in the security field; and provides a comprehensive literature on current and future e-security needs across applications, implementation, testing or investigative techniques, judicial processes and criminal intelligence. The intended audience includes members in academia, the public and private sectors, students and those who are interested in and will benefit from this handbook.

Peer to Peer and the Music Industry Matthew David,2010 Have the music and movie industries lost the battle to criminalize downloading? This penetrating and informative book provides readers with the perfect systematic critical guide to the file-sharing phenomenon. Combining interdisciplinary resources from sociology, history, media and communication studies and cultural studies, David unpacks the economics, psychology and philosophy of file-sharing. The book carefully situates the reader in a field of relevant approaches including Network Society Theory, Post-structuralism and ethnographic research. It uses this to launch into a fascinating enquiry into: \* the rise of file-sharing, \* the challenge to intellectual property law posed by new technologies of communication, \* the social psychology of cyber crime \* and the response of the mass media and multi-national corporations. The book concludes with a balanced, eye-opening assessment of alternative cultural modes of participation and their relationship to cultural capitalism. This is a landmark work in the sociology of popular culture and cultural criminology. It fuses a deep knowledge of the music industry and the new technologies of mass communication with a powerful perspective on how multinational corporations seek to monopolize markets, how international and state agencies defend property, while a global multitude undermine and/or reinvent both.
