Handbook of Electronic Security and Digital Forensics Hamid Jahankhani, 2010 The widespread use of information and communications technology (ICT) has created a global platform for the exchange of ideas, goods and services, the benefits of which are enormous. However, it has also created boundless opportunities for fraud and deception. Cybercrime is one of the biggest growth industries around the globe, whether it is in the form of violation of company policies, fraud, hate crime, extremism, or terrorism. It is therefore paramount that the security industry raises its game to combat these threats. Today's top priority is to use computer technology to fight computer crime, as our commonwealth is protected by firewalls rather than firepower. This is an issue of global importance as new technologies have provided a world of opportunity for criminals. This book is a compilation of the collaboration between the researchers and practitioners in the security field; and provides a comprehensive literature on current and future e-security needs across applications, implementation, testing or investigative techniques, judicial processes and criminal intelligence. The intended audience

includes members in academia, the public and private sectors, students and those who are interested in and will benefit from this handbook.

Earth Force Shemer Kuznits, 2019-04-30 On the first day, a mist descended from the heavens blanketing Earth. On the second day, a cryptic message, 'Infusion commencing', appeared in the corner of everyone's eyes. On the third day, the sick were healed and the crippled walked again. On the fourth day, celebration and joy spread across the globe. And on the fifth day, the warping began... There was no warning. A mist descended from the sky, disabling all technology and causing a weird message to appear at the corner of everyone's eye. The situation grew even worse as animals and people started to warp, transforming into terrible monsters that prey on the livings. Within months, human civilization had crumbled.

Unable to fight the seemingly-indestructible beasts, the survivors are reduced to cowering in reinforced shelters. Waiting for the end to come. Helpless. All seemed lost until a few brave souls discovered the secret of their new reality: the Tec and how to use it to level up. Together they represent humanity's last best hope for salvation. But they first must find the answers to the mystery of their new existence. Their journey will require them to quickly adapt to alien technology, operate strange spaceships, and even befriend an extra-terrestrial merchant with an Inferiority Complex.

Peer to Peer and the Music Industry Matthew David, 2010 Have the music and movie industries lost the battle to criminalize downloading? This penetrating and informative book provides readers with the perfect systematic critical guide to the file-sharing phenomenon. Combining interdisciplinary resources from sociology, history, media and communication studies and cultural studies, David unpacks the economics, psychology and philosophy of file-sharing. The book carefully situates the reader in a field of relevant approaches including Network Society Theory, Post-structuralism and ethnographic research. It uses this to launch into a fascinating enquiry into: * the rise of file-sharing, * the challenge to intellectual property law posed by new technologies of communication, * the social psychology of cyber crime * and the response of the mass media and multi-national corporations. The book concludes with a balanced, eye-opening assessment of alternative cultural modes of

participation and their relationship to cultural capitalism. This is a landmark work in the sociology of popular culture and cultural criminology. It fuses a deep knowledge of the music industry and the new technologies of mass communication with a powerful perspective on how multinational corporations seek to monopolize markets, how international and state agencies defend property, while a global multitude undermine and/or reinvent both.

Blood Crazy Simon Clark, 2014-10-28 It is a quiet, uneventful Saturday in Doncaster. Nick Aten, and his best friend Steve Price – troubled seventeen year olds – spend it as usual hanging around the sleepy town, eating fast food and planning their revenge on Tug Slatter, a local bully and their arch-enemy. But by Sunday, Tug Slatter becomes the last of their worries because somehow overnight civilization is in ruins. Adults have become murderously insane – literally. They're infected with an uncontrollable urge to kill the young. Including their own children. As Nick and Steve try to escape the deadly town covered with the mutilated bodies of kids, a group of blood-thirsty adults ambushes them. Just a day before they were caring parents and concerned teachers, today they are savages destroying the future generation. Will Nick and Steve manage to escape? Is their hope that outside the Doncaster borders the world is 'normal' just a childish dream? *Blood Crazy*, first published in 1995, is a gripping, apocalyptic horror from Simon Clark.
