Border Towns Buses of London Country Transport (North of the Thames) 1969-2019 Malcolm

Batten, 2024-04-30 London Transport was created in 1933 with monopoly powers. Not only did it have exclusive rights to run bus (and tram and trolleybus) services in the Greater London area, it also ran services in a Country Area all around London. Green Line express services linked the country towns to London and in most cases across to other country towns the other side of the metropolis. This country area extended north as far as Hitchin, east to Brentwood, south to Crawley and west to Windsor. But what of the towns at the edge of the country area? Here the green London Transport buses would meet the bus companies whose operations extended across the rest of the counties of Essex, Bedfordshire, Buckinghamshire etc. In some cases the town was at a node where more than one company worked in. At Luton there was a municipal fleet. Elsewhere, such as at Aylesbury there were local independent operators who had a share in the town services. It would all change from 1970 when the London Transport Country Area was transferred to the National Bus Company to form a new company named London Country Bus Services. This would later be split into four separate companies. Deregulation in 1985 and privatization in the 1990s led to further changes in the names and ownership of bus companies. Consolidation since then has seen the emergence of national bus groups □ Stagecoach, First Group, Arriva and Go-Ahead replacing the old names and liveries. But retrenchment by these companies has given an opportunity for new independent companies to fill the gaps. This book takes the form of an anti-clockwise tour around the perimeter of the London Country area, north of the Thames featuring a number of

key towns starting at Tilbury and ending at High Wycombe, illustrating some of the many changes to bus companies that have occurred.

Media Accountability and Freedom of Publication

Denis McQuail, 2003 What are the media's responsibilities? To whom are they accountable? Are they increasingly growing out of control? In the 21st century, our mass media are becoming more powerful and more difficult to hold to account, and attempts at control to prevent harm or make media more responsible are often viewed as infringements of market and media freedom. In this study, Denis McQuail identifies problematic trends and issues and outlines the principles underlying media regulation and accountability.

Contemporary Art and Digital Culture

Melissa Gronlund, 2016-12-08 Contemporary Art and Digital Culture analyses the impact of the internet and digital technologies upon art today. Art over the last fifteen years has been deeply inflected by the rise of the internet as a mass cultural and socio-political medium, while also responding to urgent economic and political events, from the financial crisis of 2008 to the ongoing conflicts in the Middle East. This book looks at how contemporary art addresses digitality, circulation, privacy, and globalisation, and suggests how feminism and gender binaries have been shifted by new mediations of identity. It situates current artistic practice both in canonical art history and in technological predecessors such as cybernetics and net.art, and takes stock of how the art-world infrastructure has reacted to the internet's promises of democratisation. An invaluable resource for undergraduate and postgraduate students of contemporary art – especially those studying

history of art and art practice and theory – as well as those working in film, media, curation, or art education. Melissa Gronlund is a writer and lecturer on contemporary art, specialising in the moving image. From 2007–2015, she was co-editor of the journal *Afterall*, and her writing has appeared there and in *Artforum*, *e-flux journal*, *frieze*, the *New Yorker.com*, and many other places.

Technology, Literature and Culture Alex

Goody,2013-04-25 *Technology, Literature and Culture* provides a detailed and accessible exploration of the ways in which literature across the twentieth century has represented the inescapable presence and progress of technology. As this study argues, from the Fordist revolution in manufacturing to computers and the internet, technology has reconfigured our relationship to ourselves, each other, and to the tools and material we use. The book considers such key topics as the legacy of late-nineteenth century technology, the literary engagement with cinema and radio, the place of typewriters and computers in formal and thematic literary innovations, the representations of technology in spy fiction and the figures of the robot and the cyborg. It considers the importance of broadcast technology and the internet in literature and covers major literary movements including modernism, cold war writing, postmodernism and the emergence of new textualities at the end of the century. An insightful and wide-ranging study, *Technology, Literature and Culture* offers close readings of writers such as Virginia Woolf, Samuel Beckett, Ian Fleming, Kurt Vonnegut, Don DeLillo, Jeanette Winterson and Shelley Jackson. It is an invaluable resource for students and scholars alike in literary and cultural studies, and also introduces the topic to a general reader

interested in the role of technology in the twentieth century.

The Devil's Long Tail David Stevens, Kieron O'Hara, 2015-02-28 The internet may be a utopia for free expression, but it also harbours nihilistic groups and individuals spreading bizarre creeds, unhindered by the risk-averse gatekeepers of the mass media -- and not all are as harmless as the Virtual Church of the Blind Chihuahua or Sexastrianism. With few entry barriers, ready anonymity and no centralised control, the internet offers wired extremists unprecedented access to a potential global audience of billions. Technology allows us to select the information we wish to receive -- so those of a fanatical bent can filter out moderating voices and ignore countervailing arguments, retreating into a virtual world of their own design that reaffirms their views. In *The Devil's Long Tail*, Stevens and O'Hara argue that we misunderstand online extremism if we think intervention is the best way to counter it. Policies designed to disrupt radical networks fail because they ignore the factors that push people to the margins. Extremists are driven less by ideas than by the benefits of participating in a tightly-knit, self-defined, group. Rather, extreme ideas should be left to sink or swim in the internet's marketplace of ideas. The internet and the web are valuable creations of a free society. Censoring them impoverishes us all while leaving the radical impulse intact.

The Internet as a Technology-Based Ecosystem Nigel Walton, 2017-05-04 This book examines and critiques classical approaches to strategic analysis, whilst exploring alternative methods which utilise ecosystem and platform concepts, as well as chaos and complexity theories. The innovative study provides a critique of the neoclassical Newtonian school of strategy, and proves it to be largely

inappropriate as a decision-making methodology in today's internet-based market. By developing a new biological hydrothermal vent model in which analogical comparisons are made with the Information Communication Technology (ICT) sector, the chapters challenge existing paradigms of competitive advantage and analyse the extent to which the Internet can be considered to be an ecosystem in its own right. The Internet as a Technology-Based Eco-System offers a range of alternative models and analytical frameworks for the analysis of internet-based technology companies in the twenty-first century, creating a valuable tool for students and academics undertaking research in strategy, technology and electronic engineering.

Globalization and Time Luchien Karsten, 2013-05-07
The process of globalization has brought about countless

changes in societies, communities, regions and economies across the globe. It has been analyzed from many perspectives as a result and much has been written to muddy the waters of our understanding of this important concept. In going back to the real origins of the global economy, this book demonstrates that understanding this phenomenon as a, 'battle against time' will bring a new clarity to the subject. The process of globalization was accompanied by the mastering of 'social time', thereby producing a progressive increase in the speed of business transactions, both in manufacturing and in services. The context is the development of international trade in western societies and the creation of business institutions to drive forward growth. The account takes a 'long view', beginning with early European exploration in the B.C. period, and ending with the establishment of multinational enterprises in the 20th century. Using an impressive range of sources this unique book will be valuable reading for students and academics involved with the study of international business, economic history, business history and politics, among other disciplines.

Drugs and Popular Culture in the Age of New Media Paul Manning, 2013-10-08 This book examines the history of popular drug cultures and mediated drug education, and the ways in which new media - including social networking and video file-sharing sites - transform the symbolic framework in which drugs and drug culture are represented. Tracing the emergence of formal drug regulation in both the US and the United Kingdom from the late nineteenth century, it argues that mass communication technologies were intimately connected to these control regimes from the very beginning. Manning includes original archive research revealing official fears about the

use of such mass communication technologies in Britain. The second half of the book assesses on-line popular drug culture, considering the impact, the problematic attempts by drug agencies in the US and the United Kingdom to harness new media, and the implications of the emergence of many thousands of unofficial drug-related sites.

Theorizing Digital Divides Massimo Ragnedda, Glenn W. Muschert, 2017-09-22 Although discussion of the digital divide is a relatively new phenomenon, social inequality is a deeply entrenched part of our current social world and is now reproduced in the digital sphere. Such inequalities have been described in multiple traditions of social thought and theoretical approaches. To move forward to a greater understanding of the nuanced dynamics of digital inequality, we need the theoretical lenses to interpret the meaning of what has been observed as digital inequality. This volume examines and explains the phenomenon of digital divides and digital inequalities from a theoretical perspective. Indeed, with there being a limited amount of theoretical research on the digital divide so far, *Theorizing Digital Divides* seeks to collect and analyse different perspectives and theoretical approaches in analysing digital inequalities, and thus propose a nuanced approach to study the digital divide. Exploring theories from diverse

perspectives within the social sciences whilst presenting clear examples of how each theory is applied in digital divide research, this book will appeal to scholars and undergraduate and postgraduate students interested in sociology of inequality, digital culture, Internet studies, mass communication, social theory, sociology, and media studies.

Bioremediation for Global Environmental

Conservation ,2023-12-06 The global environment has been rapidly deteriorating because of global warming, and a large population is facing severe water and food shortages. In addition to global warming, soil and groundwater contamination by heavy metals such as lead, arsenic, and chromium due to industrial development and excessive use of pesticides is also rapidly increasing. Remediation is necessary for replenishing drinking water and food, and remediation using microorganisms (bioremediation) and plants (phytoremediation) is one of the most feasible and economical methods. This book deals with strategies for efficient bioremediation and phytoremediation procedures. The authors discuss effective remediation technology, thus providing important information and new ideas for fighting the deterioration of our global environment.

Twenty-First Century Drama Siân Adiseshiah,Louise LePage,2016-06-17 Within this landmark collection, original voices from the field of drama provide rich analysis of a selection of the most exciting and remarkable plays and productions of the twenty-first century. But what makes the drama of the new millenium so distinctive? Which events, themes, shifts, and paradigms are marking its stages? Kaleidoscopic in scope, *Twenty-First Century Drama: What Happens Now* creates a broad, rigorously critical framework for approaching the drama of this

period, including its forms, playwrights, companies, institutions, collaborative projects, and directors. The collection has a deliberately British bent, examining established playwrights – such as Churchill, Brenton, and Hare – alongside a new generation of writers – including Stephens, Prebble, Kirkwood, Bartlett, and Kelly. Simultaneously international in scope, it engages with significant new work from the US, Japan, India, Australia, and the Netherlands, to reflect a twenty-first century context that is fundamentally globalized. The volume's central themes – the financial crisis, austerity, climate change, new forms of human being, migration, class, race and gender, cultural politics and issues of nationhood – are mediated through fresh, cutting-edge perspectives.
