Support Driven The Internet has opened up many freelance opportunities, expanded available markets, and has contributed to service sector growth in many economies. Offshore outsourcing, online outsourcing and crowdsourcing are heavily reliant on the Internet to provide economical access to remote workers, and frequently leverage technology to manage workflow to and from the employer. Much computer freelance work is being outsourced to developing countries outside the United States and Europe. Freelance marketplaces provide a marketplace for freelancers and buyers. Service providers or sellers create a profile where they include a description of the services they offer, examples of their work, and, in some cases, information about their rates. Buyers register and complete a basic profile, and then post projects outlining their requirements. Buyers will then bid for these projects on a fixed price or hourly basis.[29] Many of these websites have user review sections that affect the reputation of freelancers who list there, and which may be manipulated. Freelance marketplaces have globalized competition

for some jobs, allowing workers in high- and low-income countries to compete with one another. According to a 2016 study by the McKinsey Global Institute, 15% of independent workers used online marketplaces to find work. These marketplaces, including Fiverr and Lyft, have been criticized as exploiting workers. The Freelancing Maria Johnsen, 2014-09-03 Filling out job applications is a full time and unpaid job. It is like a dead-end; you keep applying and nothing happens. It has become a winning a lottery ticket these days if you actually get a job you deserve with the right salary. Being a freelancer in any discipline has explosive financial rewards, if done properly. This is unlike working for someone else who profits from your hard work. The more work you complete, the greater the revenue you will receive. This is one of the advantages of completing outsource work for a client; you get to keep

the entire payment for the work you did. Most freelance experts charge less than many of the companies that do the same type of work. The reasons your profits will be greater than companies that are competing against you for this outsource work is simple—your overheads are less. Facts about getting the higher profit from your small business are pretty basic. The higher your prices are above the product cost, the greater the profits will be, but also the fewer the sales. This is a carefully walked tightrope. For the most part, the market will dictate the price you will be able to sell your product or services for. In the beginning, the lower price is what will attract new customers. Customers are willing to try out a new vendor if the price is right. This avenue of marketing will lead to lower profit per item, but will make up the profit in the volume you will be selling. In this book I walk you through tried and true processes within the freelance and outsourcing realm. You will learn how to start, find customers, choosing price, follow ups, outsourcing and keeping record of your business. Making money online requires applying some tactics, having discipline and becoming successful in freelancing. Solution Benefits Starting your freelancing business Business planning Everything you need to know about making money online
