Freeze! Henry Richard Maar III,2022-01-15 In *Freeze!*, Henry Richard Maar III chronicles the rise of the transformative and transnational Nuclear Weapons Freeze Campaign. Amid an escalating Cold War that pitted the nuclear arsenal of the United States against that of the Soviet Union, the grassroots peace movement emerged sweeping the nation and uniting people around the world. The solution for the arms race that the Campaign proposed: a bilateral freeze on the building, testing, and deployment of nuclear weapons on the part of two superpowers of the US and the USSR. That simple but powerful proposition stirred popular sentiment and provoked protest in the streets and on screen from New York City to London to Berlin. Movie stars and scholars, bishops and reverends, governors and congress members, and, ultimately, US President Reagan and General Secretary Gorbachev took a stand for or against the Freeze proposal. With the Reagan administration so openly discussing the prospect of winnable and survivable nuclear warfare like never before, the Freeze movement forcefully translated decades of private fears into public action. Drawing upon extensive archival research in recently declassified materials, Maar illuminates how the Freeze campaign demonstrated the power and importance of grassroots peace activism in all levels of society. The Freeze movement played an instrumental role in shaping public opinion and American politics, helping establish the conditions that would bring the Cold War to an end.

Deep Freeze Dian Olson Belanger,2019-04-01 “A comprehensive and lively book about the people and events that transformed Antarctica into an international laboratory for science.”—Raimund E. Goerler, Chief Archivist/Byrd Polar Research Center of The Ohio State University In Deep Freeze, Dian Olson Belanger tells the story of the pioneers who built viable communities, made vital scientific discoveries, and established Antarctica as a continent dedicated to peace and the pursuit of science, decades after the first explorers planted flags in the ice. In the tense 1950s, even as the world was locked in the Cold War, U.S. scientists, maintained by the Navy’s Operation Deep Freeze, came together in Antarctica with counterparts from eleven other countries to participate in the International Geophysical Year (IGY). On July 1, 1957, they began systematic, simultaneous scientific observations of the south-polar ice and atmosphere. Their collaborative success over eighteen months inspired the Antarctic Treaty of 1959, which formalized their peaceful pursuit of scientific knowledge. Still building on the achievements of the individuals and distrustful nations thrown together by the IGY from mutually wary military, scientific, and political cultures, science prospers today and peace endures. Belanger draws from interviews, diaries, memoirs, and official records to weave together the first thorough study of the dawn of Antarctica’s scientific age. Deep Freeze offers absorbing reading for those who have ventured onto Antarctic ice and those who dream of it, as well as historians, scientists, and policy makers. “[A] highly informative and readable narrative account of perhaps the single most striking international scientific endeavor of the twentieth century.” —The Polar Record “Deep Freeze, based on countless interviews and painstaking research, is a timely and gripping account.” —John C. Behrendt, author of Innocents on the Ice
