According to scientific research, this is the amount of vocabulary needed for varying levels of fluency: - 250 words: the essential core of a language. Without these words, you cannot construct sentences. - 750 words: those that are used every single day by every person who speaks the language. - 2500 words: those that should enable you to express everything you could possibly want to say, although some creativity might be required. - 5000 words: the active vocabulary of native speakers without

higher education.
