Winning French Minds Denis Courtois,2023-02-23 Explores how the propaganda of the Allied and Axis powers and the Vichy regime was disseminated to the French population via the radio in the first half of World War II. World War II was very much a war of the radios. A relatively new technology, radio as a tool was exploited by all of the participants of the war to win the hearts and minds of the people and to steer public opinion. The period 1940 to 1942 was the most volatile of the war, with the Nazis capturing large parts of western Europe and dominating on the Eastern front. At this time France was separated into two nominally independent zones, and public opinion could easily have been swayed in favor of the New German Order. This could have had potentially disastrous consequences for any future Allied attempt to liberate Europe, and so the battle for French minds was launched using the new technology of radio. This narrative of that campaign develops chronologically through a series of topics including major military incidents, youth, food, family, psychological warfare, sports and work, as presented by different radio stations - in particular Radiodiffusion, controlled by Vichy France; Radio Paris, controlled by the Nazis; and the BBC - offering a systematic comparative analysis of radio propaganda messages and building a vivid picture of the evolution of broadcasts in the context of the complex political and social impact of the war on the French population. Using original primary sources from archives in Britain and France, broadcast recordings, radio magazines, and interviews conducted by British Intelligence with those arriving from France during the war, this is a fascinating and unique insight into wartime radio propaganda from 1940 to 1942.

Radio and the Politics of Sound in Interwar France, 1921-1939 Rebecca Scales,2016-02-24 Explores how radio broadcasting and the emerging audio culture transformed the dynamics of French politics during the tumultuous interwar decades.

Savoir Faire Plus Géraldine Enjelvin,2013-05-24 Written by an experienced tutor, Savoir-Faire Plus is specifically designed to meet the requirements of today's generation of language undergraduates. Focusing on the life of an Anglophone first year undergraduate studying French in the UK and sharing a house with four francophone students, this engaging textbook provides: a clear, logical structure a blend of communicative, research-based and traditional exercises a wide range of activities covering the four key linguistic skills as well as intercultural skills authentic texts (with extracts from Le Monde, L'Express, Le Nouvel Observateur and Libération) guidance and practical tips for effective and independent learning. Each of the ten chapters consists of four topics-based sections which provide students with a wealth of diverse material allowing them to gain an in-depth knowledge of relevant topical subjects such as regional languages, sustainable development and fair trade, amongst others. Digestible grammar points are integrated throughout and a range of additional exercises are available on the Companion Website allowing students to perfect their language skills. Suitable for both self-study and class use Savoir Faire Plus is the ideal course for all advanced students of French, consolidating knowledge gained at A-Level while supporting the transition to undergraduate study. The Companion Website can be found at www.routledge.com/textbooks/9780415444750

The Media in France Michèle Bate,1977

Electronic Discourse in Language Learning and Language Teaching Lee B. Abraham, Lawrence Williams,2009 New technologies are constantly transforming traditional notions of language use and literacy in online communication environments. While previous research has provided a foundation for understanding the use of new technologies in instructed second language environments, few studies have investigated new literacies and electronic discourse beyond the classroom setting. This volume seeks to address this gap by providing corpus-based and empirical studies of electronic discourse analyzing social and linguistic variation as well as communicative practices in chat, discussion forums, blogs, and podcasts.

Several chapters also examine the assessment and integration of new literacies. This volume will serve as a valuable resource for researchers, teachers, and students interested in exploring electronic discourse and new literacies in language learning and teaching.

Film & Radio Propaganda in World War II K.R.M. Short,2021-11-21 This book, first published in 1983, brings together leading world experts on film and radio propaganda in a study which deals with each of the major powers as well as several under occupation. By examining each nations' propaganda content and comparing its various strands of output designed for different audiences, the historian is provided with an important source of a nation's official self-image. Total war forced governments to formulate goals consistent with the received national ideology in order to support the war effort. To this extent, much of the domestic propaganda was directed towards stimulating the population to make sacrifices with promise of a new world if the peace were won.

Radio Wars Linda Risso,2017-10-02 During the Cold War, radio broadcasting played an important role in the ideological confrontation between East and West. As archival documents gathered in this volume reveal, radio broadcasting was among the most pressing concerns of contemporary information agencies. These broadcasts could penetrate the Iron Curtain and directly address the 'enemy'. Radio was equally important in keeping sustained levels of support among the home public and the public of friendly nations. In the early Cold War in particular, listeners in the West had to be persuaded of the need for higher defence spending levels and a policy of containment. Later, even if other media - and in particular television - had become more important, radio continued to be used widely. The chapters gathered here investigate both the institutional history of the radio broadcasting corporations in the East and in the West, and their relationship with other propaganda agencies of the time. They examine the 'off-air' politics of radio broadcasting, from the choice of theme to the selection of speakers, singers and music pieces. The key issue tackled by contributors is the problem of measuring the impact of, and qualifying the success of, information policies and propaganda programmes produced during the Cultural Cold War. This book was originally published as a special issue of Cold War History.

The SAGE International Encyclopedia of Mass Media and Society Debra L. Merskin,2019-11-12 The reference will discuss mass media around the world in their varied forms—newspapers, magazines, radio, television, film, books, music, websites, and social media—and will describe the role of each in both mirroring and shaping society.

Sound in the Age of Mechanical Reproduction David Suisman,Susan Strasser,2010 During the twentieth century sound underwent a dramatic transformation as new technologies and social practices challenged conventional aural experience. As a result, sound functioned as a means to exert social, cultural, and political power in unprecedented and unexpected ways. The fleeting nature of sound has long made it a difficult topic for historical study, but innovative scholars have recently begun to analyze the sonic traces of the past using innovative approaches. Sound in the Age of Mechanical Reproduction investigates sound as part of the social construction of historical experience and as an element of the sensory relationship people have to the world, showing how hearing and listening can inform people's feelings, ideas, decisions, and actions. The essays in Sound in the Age of Mechanical Reproduction uncover the varying dimensions of sound in twentieth-century history. Together they connect a host of disparate concerns, from issues of gender and technology to contests over intellectual property and government regulation. Topics covered range from debates over listening practices and good citizenship in the 1930s, to Tokyo Rose and Axis radio propaganda during World War II, to CB-radio culture on the freeways of Los Angeles in the 1970s. These and other studies reveal the contingent nature of aural experience and demonstrate how a better grasp of the culture of sound can enhance our understanding of the past.

Studies in French Applied Linguistics Dalila Ayoun,2008-10-29 Studies in French Applied Linguistics invites the reader to adopt a broad perspective on applied linguistics, illustrating the fascinating multifaceted work researchers are conducted in so many various, inter-connected

subfields. The five chapters of the first part are dedicated to the first and second language acquisition of French in various settings: First language acquisition by normal children from a generative perspective and by children with Specific Language Impairment; second language acquisition in Canadian immersion settings, from a neurolinguistic approach to phonology and natural language processing and CALL. The six chapters of the second part explore the contribution of French in various subfields of applied linguistics such as an anthropological approach to literacy issues in Guadeloupean Kréyòl, literacy issues in new technologies, phonological and lexical innovations in the banlieues, French in North Africa, language planning and policy in Quebec, as well as the emerging field of forensic linguistics from an historical perspective.

Radio World, 1923

Psychoanalysis and the family in twentieth-century France Richard Bates, 2022-02-08 In the last quarter of the twentieth century, if French people had a parenting problem or dilemma there was one person they consulted above all: Françoise Dolto (1908-88). But who was Dolto? How did she achieve a position of such influence? What ideas did she communicate to the French public? This book connects the story of Dolto's rise to two broader histories: the dramatic growth of psychoanalysis in postwar France and the long-running debate over the family and the proper role of women in society. It shows that Dolto's continued reputation in France as a liberal and enlightened educational thinker is at best only partially deserved and that conservative and anti-feminist ideas often underpinned her prominent public interventions. While Dolto retains the status of a national treasure, her career has had far-reaching and sometimes harmful repercussions for French society, particularly in the treatment of autism.

France at War in the Twentieth Century Valerie Holman, Debra Kelly, 2000 There are suggestive and interesting contributions ... Historians of modern France and historians interested in the cultural aspects of war will find much to engage with in this stimulating collection. - French History France experienced four major conflicts in the fifty years between 1914 and 1964: two world wars, and the wars in Indochina and Algeria. In each the role of myth was intricately bound up with memory, hope, belief, and ideas of nation. This is the first book to explore how individual myths were created, sustained, and used for purposes of propaganda, examining in detail not just the press, radio, photographs, posters, films, and songs that gave credence to an imagined event or attributed mythical status to an individual, but also the cultural processes by which such artifacts were disseminated and took effect. Reliance on myth, so the authors argue, is shown to be one of the most significant and durable features of 20th century warfare propaganda, used by both sides in all the conflicts covered in this book. However, its effective and useful role in time of war notwithstanding, it does distort a population's perception of reality and therefore often results in defeat: the myth-making that began as a means of sustaining belief in France's supremacy, and later her will and ability to resist, ultimately proved counterproductive in the process of decolonization.

The Crommelynck Mystery Alain Piette, Bert Cardullo, 1997 In this book, the authors examine the works of Fernand Crommelynck (1886-1970), whose international reputation was established in 1922, when his most important and most popular play, *The Magnanimous Cuckold*, was presented in Moscow. Torn between the extremes of laughter and sorrow, frequently violent and visionary, Crommelynck's work is typically Flemish (though written in French), not least in its preoccupation with sin. Pain is always present in his plays, the pain felt by characters living in a world where happiness is destroyed by irrationalism, self-deception, and obsession. Crommelynck's plays humorously show us how human behavior can be dominated by extreme expressions of emotion or desire. The mixture of buffoonery and tragedy characteristic of his theater extends also to his prose style, which presents the most outrageous or gross situations in a language of beautifully sensuous imagery.

Across the Waves Derek W Vaillant, 2017-10-18 In 1931, the United States and France embarked on a broadcasting partnership built around radio. Over time, the transatlantic sonic alliance came to personify and to shape American-French relations in an era of increased global media

production and distribution. Drawing on a broad range of American and French archives, Derek Vaillant joins textual and aural materials with original data analytics and maps to illuminate U.S.-French broadcasting's political and cultural development. Vaillant focuses on the period from 1931 until France dismantled its state media system in 1974. His analysis examines mobile actors, circulating programs, and shifting governmental and other institutions shaping international radio's use in times of war and peace. He explores the extraordinary achievements, the miscommunications and failures, and the limits of cooperation between America and France as they shaped a new media environment. Throughout, Vaillant explains how radio's power as an instantaneous mass communications tool produced, legitimized, and circulated various notions of states, cultures, ideologies, and peoples as superior or inferior.

The French Resistance Olivier Wieviorka, 2016-04-26 Olivier Wieviorka's history of the French Resistance debunks lingering myths and offers fresh insight into social, political, and military aspects of its operation. He reveals not one but many interlocking homegrown groups often at odds over goals, methods, and leadership. Yet, despite a lack of unity, these fighters braved Nazism without blinking.

Poetry at Stake Carrie Noland, 2021-03-09 Taking seriously Guillaume Apollinaire's wager that twentieth-century poets would one day mechanize poetry as modern industry has mechanized the world, Carrie Noland explores poetic attempts to redefine the relationship between subjective expression and mechanical reproduction, high art and the world of things. Noland builds upon close readings to construct a tradition of diverse lyricists--from Arthur Rimbaud, Blaise Cendrars, and René Char to contemporary performance artists Laurie Anderson and Patti Smith--allied in their concern with the nature of subjectivity in an age of mechanical reproduction.

That Sweet Enemy Robert Tombs, Isabelle Tombs, 2009-06-17 That Sweet Enemy brings both British wit (Robert Tombs is a British historian) and French panache (Isabelle Tombs is a French historian) to bear on three centuries of the history of Britain and France. From Waterloo to Chirac's slandering of British cooking, the authors chart this cross-channel entanglement and the unparalleled breadth of cultural, economic, and political influence it has wrought on both sides, illuminating the complex and sometimes contradictory aspects of this relationship—rivalry, enmity, and misapprehension mixed with envy, admiration, and genuine affection—and the myriad ways it has shaped the modern world. Written with wit and elegance, and illustrated with delightful images and cartoons from both sides of the Channel, That Sweet Enemy is a unique and immensely enjoyable history, destined to become a classic.
