*Programming National Identity* Joelle Neulander, 2009 Radio provided a new and powerful medium in 1930s France. Devoted audiences responded avidly to their stations' programming and relied on radio as a source of daily entertainment, news, and other information. Within the comfortable, secure space of the home, audio culture reigned supreme. In *Programming National Identity*, Joelle Neulander examines the rise of radio as a principal form of mass culture in interwar France, exploring the intricate relationship between radio, gender, and consumer culture. She shows that, while entertaining in nature and narrative in structure, French radio programm.

**The Wireless World** Simon J. Potter, David Clayton, Senior Lecturer in Modern History David Clayton, Friederike Kind-Kovacs, Senior Lecturer in the History of International Relations Vincent Kuitenbrouwer, Vincent Kuitenbrouwer, Associate Professor of Communication Studies Nelson Ribeiro, Nelson Ribeiro, Associate Professor of History Rebecca Scales, Rebecca Scales, Andrea Stanton, Associate Professor of Islamic Studies and Interim Director Andrea Stanton, 2022-09-15 The Wireless World sets out a new research agenda for the history of international broadcasting, and for radio history more generally. It examines global and transnational histories of long-distance wireless

broadcasting, combining perspectives from international history, media and cultural history, the history of technology, and sound studies. It is a co-written book, the result of more than five years of collaboration. Bringing together their knowledge of a wide range of different countries, languages, and archives, the co-authors show how broadcasters and states deployed international broadcasting as a tool of international communication and persuasion. They also demonstrate that by paying more attention to audiences, programmes, and soundscapes, historians of international broadcasting can make important contributions to wider debates in social and cultural history. Exploring the idea of a 'wireless world', a globe connected, both in imagination and reality, by radio, *The Wireless World* sheds new light on the transnational connections created by international broadcasting. Bringing together all periods of international broadcasting within a single analytical frame, including the pioneering days of wireless, the Second World War, the Cold War, and the decades since the fall of the Berlin Wall, the study reveals key continuities and transformations. It looks at how wireless was shaped by internationalist ideas about the use of broadcasting to promote world peace and understanding, at how empires used broadcasting to perpetuate colonialism, and at how anti-colonial movements harnessed radio as a weapon of decolonization.

On the Reproduction of Capitalism Louis Althusser, 2014-02-04 Louis Althusser's renowned short text Ideology and Ideological State Apparatuses radically transformed the concept of the subject, the understanding of the state and even the very frameworks of cultural, political and literary theory. The text has influenced thinkers such as Judith Butler, Ernesto Laclau and Slavoj Zizek. The piece is, in fact, an extract from a much longer book, On the Reproduction of Capitalism, until now unavailable in English. Its publication makes possible a reappraisal of seminal Althusserian texts already available in

English, their place in Althusser's oeuvre and the relevance of his ideas for contemporary theory. On the Reproduction of Capitalism develops Althusser's conception of historical materialism, outlining the conditions of reproduction in capitalist society and the revolutionary struggle for its overthrow. Written in the afterglow of May 1968, the text addresses a question that continues to haunt us today: in a society that proclaims its attachment to the ideals of liberty and equality, why do we witness the ever-renewed reproduction of relations of domination? Both a conceptually innovative text and a key theoretical tool for activists, On the Reproduction of Capitalism is an essential addition to the corpus of the twentieth-century Left.

The Modernity Bluff Sasha Newell, 2012-05-14 In Côte d'Ivoire, appearing modern is so important for success that many young men deplete their already meager resources to project an illusion of wealth in a fantastic display of Western imitation, spending far more than they can afford on brand name clothing, accessories, technology, and a robust nightlife. Such imitation, however, is not primarily meant to deceive—rather, as Sasha Newell argues in *The Modernity Bluff*, it is an explicit performance so valued in Côte d'Ivoire it has become a matter of national pride. Called bluffeurs, these young urban men operate in a system of cultural economy where reputation is essential for financial success. That reputation is measured by familiarity with and access to the fashionable and expensive, which leads to a paradoxical state of affairs in which the wasting of wealth is essential to its accumulation. Using the consumption of Western goods to express their cultural mastery over Western taste, Newell argues, bluffeurs engage a global hierarchy that is profoundly modern, one that values performance over authenticity—highlighting the counterfeit nature of modernity itself.

**Norm and Ideology in Spoken French** David Hornsby, 2020-10-19 This volume offers a diachronic sociolinguistic perspective on one of the most complex and fascinating variable speech

phenomena in contemporary French. Liaison affects a number of word-final consonants which are realized before a vowel but not pre-pausally or before a consonant. Liaisons have traditionally been classified as obligatoire (obligatory), interdite (forbidden) and facultative (optional), the latter category subject to a highly complex prescriptive norm. This volume traces the evolution of this norm in prescriptive works published since the 16th Century, and sets it against actual practice as evidenced from linguists' descriptions and recorded corpora. The author argues that optional (or variable) liaison in French offers a rich and well-documented example of language change driven by ideology in Kroch's (1978) terms, in which an elite seeks to maintain a complex conservative norm in the face of generally simplifying changes led by lower socio-economic groups, who tend in this case to restrict liaison to a small set of traditionally obligatory environments.
