Unlike other translation manuals available, it transcends crude dichotomies of literal vs. free translation, specialized vs. general, communicative vs. semantic, etc. and concentrates instead on developing in the student a sensitivity to text-types and a deeper understanding of the demand. which a given text-type makes on the translator. **Complex, Intelligent, and Software Intensive Systems** Leonard Barolli,Farookh Khadeer Hussain,Makoto Ikeda,2019-06-20 This book presents scientific interactions between the three interwoven and challenging areas of research and development of future ICT-enabled applications: software, complex systems and intelligent systems. Software intensive systems heavily interact with other systems, sensors, actuators, and devices, as well as other software systems and users. More and more domains involve software intensive systems, e.g. automotive, telecommunication

systems, embedded systems in general, industrial automation systems and business applications. Moreover, web services offer a new platform for enabling software intensive systems. Complex systems research focuses on understanding overall systems rather than their components. Such systems are characterized by the changing environments in which they act, and they evolve and adapt through internal and external dynamic interactions. The development of intelligent systems and agents features the use of ontologies, and their logical foundations provide a fruitful impulse for both software intensive systems and complex systems. Research in the field of intelligent systems, robotics, neuroscience, artificial intelligence, and cognitive sciences is a vital factor in the future development and innovation of software intensive and complex systems.

*Translating Business English into Arabic* Ahmad Khuddro,2016-05-17 Forward by Prof. Alaeddin A. *The Georgetown Guide to Arabic-English Translation* Mustafa Mughazy,2016-05-16 Mughazy, a well-respected scholar of Arabic linguistics and a Georgetown Languages board member, takes a practical approach to the task of translating nonfiction from Arabic to English. Using Optimality Theory from linguistics, he provides a new way, based in linguistics, of looking at best practices for translation with the goal to find the most accurate translation. He aims to approach translation more scientifically (identify the problem, test hypotheses, selecting the best option and finding patterns) than those who use the more widely known literary translation theory. Although there are several books out on this topic, none address it as Mughazy has. This is a unique approach that offers a new, more practical way for those with advanced knowledge of Arabic to learn how to translate. As more schools begin or consider beginning translation programs, this book may find a larger audience over the years. Mughazy's book is rich with authentic examples, exercises (answer key included), and includes very valuable appendices for the learner. As Clara told me, This is a book I wish I had had in grad school.
