Location-Based Services Jochen Schiller, Agnès Voisard, 2004-05-21 Location-based services (LBS) are a new concept integrating a user's geographic location with the general notion of services, such as dialing an emergency number from a cell phone or using a navigation system in a car. Incorporating both mobile communication and spatial data, these applications represent a novel challenge both conceptually and technically. The purpose of this book is to describe, in an accessible fashion, the various concepts underlying mobile location-based services. These range from general application-related ideas to technical aspects. Each chapter starts with a high level of abstraction and drills down to the technical details. Contributors examine each application from all necessary

perspectives, namely, requirements, services, data, and scalability. An illustrative example begins early in the book and runs throughout, serving as a reference. · This book defines the LBS field and identifies its capabilities, challenges, and technologies. · The contributors are recognized experts from academia and industry. · Coverage includes navigation systems, middleware, interoperability, standards, and mobile communications. · A sample application, the find-friend application, is used throughout the book to integrate the concepts discussed in each chapter.

Looking at the Stars Lewis Hine, 2018-04-05 My illness may define the length of my life, but it won't define how I live it. My disability gave me the ability to understand and help

others. And now I finally feel like I am living. 17-year-old Lewis Hine is a global phenomenon. Diagnosed with a life-threatening brain tumour and water on the brain at 17 months, he wasn't expected to survive. But Lewis proved everyone wrong; he's not only surviving but thriving. In one Facebook post on his 16th birthday Lewis invited everyone to see how he faces head on the challenges from his ongoing illness, and he went viral. 30 million views later, Lewis now spearheads a campaign, Friend Finder, to make sure no one ever faces childhood illness alone. In his memoir, Lewis reaches out to anyone who may feel isolated in their lives. After 13 brain surgeries and continual health problems, life for Lewis is a daily challenge. From the sheer physical challenges - he is at high risk of sudden unexpected death in epilepsy (SUDEP) and has a pump in his brain just to keep him alive - to the horrendous bullying he's endured, he shares how he finds the strength to overcome all this and still lead a fun and fulfilling life. With a host of admirers around the world from Elton John to Kid Ink, Lewis is living his dream - even becoming Radio 1's Teen Hero of the Year. His story will make you laugh, cry and above all, feel inspired by life's endless possibilities, looking at the stars.

Privacy, Security and Trust within the Context of Pervasive Computing Philip

Robinson,Harald Vogt,Waleed Wagealla,2006-06-07 Privacy, Security and Trust within the Context of Pervasive Computing is an edited volume based on a post workshop at the second international conference on Pervasive Computing. The workshop was held April18-23, 2004, in Vienna, Austria. The goal of the workshop was not to focus on specific, even novel mechanisms, but rather on the interfaces between mechanisms in different technical and social problem spaces. An investigation of the interfaces between the notions of context, privacy, security, and trust will result in a deeper understanding of the atomic problems, leading to a more complete understanding of the social and technical issues in

pervasive computing.

Bird Land J. M. White, 2017-06-26 They had been in space a long time. They had examined every planet within their trajectory as ordered. There had been six planets in their path that they examined as possible sites for colonization and a nebula off in the distance. The nebula was very beautiful, kind of purple and dark blue. But, their orders were not to examine nebulas, but to find a class M planet that could be adaptable to humans. This was definitely a class M planet all the readings were perfect. But, with all the experts on board no one could find the source of the intelligence it took to make these amazing gardens that circled the planet. Some fairly large birds had been seen. But, there were no land animals with brains large enough to make these gardens. They had to be gardens, gardens with uniformed rows of growing crops. There were uniformed rows of trees as well and lines of shrubs or hedge which divided the garden areas. This planet was placed between three suns just right so as to have one side always warm. The temperature was around 70 to 80 degrees and at night near 50 degrees. The suns were orbiting in a

slightly arched line with this small planet. The planet and its two moons orbited around the larger sun. The smaller suns being further away gave little light and a small amount of warmth just enough so the other sides of the planet were not in total darkness at any time. It had water and oxygen, breathable oxygen that meant no suits or helmets. This planet was just what they were looking for. It was a small green pearl in the vast darkness of space.
