Children's Friendship Training Fred D.

Frankel,Robert J. Myatt,2013-05-13 First published in 2003. Children's Friendship Training is a complete manualized guide for therapists treating children with peer problems. This unique, empirically validated treatment is the first to integrate parents into the therapy process to ensure generalization to school and home. Representing over twelve years of research, Children's Friendship Training presents the comprehensive social skills training program developed by these pioneering authors. Step-by-step interventions help children develop the skills to initiate mutually satisfying social interactions. These interactions can lead to higher regard within the peer group and the development of satisfying dyadic relationships that will, in turn, serve to enhance overall well being. Clinical and empirical rationales, illustrative case examples and parent handouts that educate parents and give specific guidelines for homework assignments are presented for each treatment module. Brief relevant reviews of the child development literature and selective reviews of assessment techniques and other approached to children's social skills training are presented to sufficiently acquaint therapists interested in implementing children's friendship training.

Adoptive and Foster Parent Screening James L.

Dickerson,Mardi Allen,2012-10-12 Screening applicants for adoption or foster homes has life-altering consequences for

the children involved, yet there are incredibly few programs available to train screeners. The educational system that certifies thousands of social workers each year does not understand the specialized training required to screen adoptive and foster parents; social work schools provide minimal interview training and what training they do provide focuses on therapeutic interview techniques rather than screening skills. There is a clear need for a book like *Adoptive and Foster Parent Screening*, one that can be incorporated into course requirements and used by working social workers and psychologists involved with adoption and foster parent screening. *Adoptive and Foster Parent Screening*, written by a former social worker, who has placed hundreds of children into adoptive and foster homes, and a clinical psychologist, meshes the best of psychology and social work experience into a definitive guide for screening adoption and foster home applicants. The book provides information on: evaluating aberrant behavior and unhealthy parenting attitudes interview techniques psychological testing. *Adoptive and Foster Parent Screening* is based on case histories, research data, and interpretive analysis. The book is written in an accessible style free of technical language, thus making it appropriate for college-level students and professionals who don't have time to sift through empirical data to obtain accessible information that they can adapt to their profession.

The Anchora of delta gamma summer 1975 ,

The Basics of Adoption James L. Dickerson, Mardi Allen, 2006-09-30 With about 70,000 domestic and international adoptions each year in the United States and Canada, adoption remains a major means of building

families in both countries. Its continued success can be inferred not only from the yearly statistics, but from a report issued in 2003 by the U.S. Census Bureau. To the surprise of many, the report announced the existence of 1.6 million adopted children in the U.S. under the age of eighteen. Written by a former social worker who has placed hundreds of children in foster and adoptive homes and a clinical psychologist who has counseled adopted children and parents, this book offers a comprehensive look at the adoption process by merging the best of social work with the best of psychology. Adoption can be a frustrating and intimidating undertaking for the unprepared. This guide provides prospective adoptive parents with the insider information that they need to navigate the process-and it provides students with the sort of expert opinion that they need to grasp the academic theory they receive in the classroom.

Substance Use Disorder Treatment for People With Co-Occurring Disorders (Treatment Improvement Protocol) TIP 42 (Updated March 2020) U.S. Department of Health and Human Services, 2020-04-04 This Treatment Improvement Protocol (TIP) update is intended to provide addiction counselors and other providers, supervisors, and administrators with the latest science in the screening, assessment, diagnosis, and management of co-occurring disorders (CODs). For purposes of this TIP, CODs refer to co-occurring substance use disorders (SUDs) and mental disorders. Clients with CODs have one or more disorders relating to the use of alcohol or other substances with misuse potential as well as one or more mental disorders. A diagnosis of CODs occurs when at least one disorder of each type can be established independent of the other and is not simply a cluster of symptoms resulting from the one disorder. Many may think of the typical person with CODs as having a serious mental illness (SMI) combined with a severe SUD, such as schizophrenia combined with alcohol

use disorder (AUD).
